**Gender Differences at Critical Transitions in the Careers of Science, Engineering, and Mathematics Faculty** National Research Council,Division of Behavioral and Social Sciences and Education,Committee on National Statistics,Policy and Global Affairs,Committee on Women in Science, Engineering, and Medicine,Committee on Gender Differences in Careers of Science, Engineering, and Mathematics Faculty,2010-07-18 Gender Differences at Critical Transitions in the Careers of Science, Engineering, and Mathematics Faculty presents new and surprising findings about career differences between female and male full-time, tenure-track, and tenured faculty in science, engineering, and mathematics at the nation's top research universities. Much of this congressionally mandated book is based on two unique surveys of faculty and departments at major U.S. research universities in six fields: biology, chemistry, civil engineering, electrical engineering, mathematics, and physics. A departmental survey collected information on departmental policies, recent tenure and promotion cases, and recent hires in almost 500 departments. A faculty survey gathered information from a stratified, random sample of about 1,800 faculty on demographic characteristics, employment experiences, the allocation of institutional resources such as laboratory space, professional activities, and scholarly productivity. This book paints a timely picture of the status of female faculty at top universities, clarifies whether male and female faculty have similar opportunities to advance and succeed in academia, challenges some commonly held views, and poses several questions still in need of answers. This book will be of special interest to university administrators and faculty, graduate students, policy makers, professional and academic societies, federal funding agencies, and others concerned with the vitality of the U.S. research base and economy.

**Unexpected Revolutionaries** Manuela Moschella,2024-05-15 In Unexpected Revolutionaries, Manuela Moschella investigates the institutional transformation of central banks from the 1970s to the present. Central banks are typically regarded as conservative, politically neutral institutions that uphold conventional macroeconomic wisdom. Yet in the wake of the 2008 global financial crisis and the 2020 COVID-19 crisis, central banks have upended observer expectations by implementing largely unknown and unconventional monetary policies. Far from abiding by well-established policy playbooks, central banks now engage in practices such as providing liquidity support for a wide range of financial institutions and quantitative easing. They have even stretched the remit of monetary policy into issues such as inequality and climate change. Moschella argues that the political nature of central banks lies at the heart of these transformations. While formally independent, central banks need political support to justify their policies and powers, and to obtain it, they carefully manage their reputation among their audienceselectd officials, market actors, and citizens. Challenged by reputational threats brought about by twenty-first-century recessionary and deflationary forces, central banks such as the Federal Reserve System and the European Central Bank strategically deviated from orthodox monetary policies to preempt or manage political backlash and to regain public trust. Central banks thus evolved into a new role only in coordination with fiscal authorities and on the back of public contestation. Eye-opening and insightful,

Unexpected Revolutionaries is necessary reading for discussions on the future of the neoliberal macroeconomic regime, the democratic oversight of monetary policymaking, and the role that central banks can or cannot play in our domestic economies.

Gender, Human Security and the United Nations Natalie Florea Hudson, 2009-09-22 This book examines the relationship between women, gender and the international security agenda, exploring the meaning of security in terms of discourse and practice, as well as the larger goals and strategies of the global women's movement. Today, many complex global problems are being located within the security logic. From the environment to HIV/AIDS, state and non-state actors have made a practice out of securitizing issues that are not conventionally seen as such. As most prominently demonstrated by the UN Security Council Resolution 1325 (2001), activists for women's rights have increasingly framed women's rights and gender inequality as security issues in an attempt to gain access to the international security agenda, particularly in the context of the United Nations. This book explores the nature and implications of the use of security language as a political framework for women, tracing and analyzing the organizational dynamics of women's activism in the United Nations system and how women have come to embrace and been impacted by the security framework, globally and locally. The book argues that, from a feminist and human security perspective, efforts to engender the security discourse have had both a broadening and limiting effect, highlighting reasons to be sceptical of securitization as an inherently beneficial strategy. Four cases studies are used to develop the core themes: (1) the campaign to implement UN Security Council Resolution 1325; (2) the strategies utilized by those advocating women's issues in the security arena compared to those advocating for children; (3) the organizational development of the UN Development Fund for Women and how it has come to securitize

women; and (4) the activity of the UN Peacebuilding Commission and its challenges in gendering its security approach. The work will be of interest to students of critical security, gender studies, international organizations and international relations in general. Natalie Florea Hudson received her PhD in Political Science from the University of Connecticut and is an Assistant Professor at the University of Dayton. She specializes in gender and international relations, human rights, international security studies, and international law and organization.
