**Compassionate Stranger** Maureen O'Rourke Murphy,2015-01-06 The first biography of Asenath Nicholson, *Compassionate Stranger* recovers the largely forgotten history of an extraordinary woman. Trained as a school teacher, Nicholson was involved in the abolitionist, temperance, and diet reforms of the day before she left New York in 1844 “to personally investigate the condition of the Irish poor.” She walked alone throughout nearly every county in Ireland and reported on conditions in rural Ireland on the eve of the Great Irish Famine. She published *Ireland's Welcome to the Stranger*, an account of her travels in 1847. She returned to Ireland in December 1846 to do what she could to relieve famine suffering—first in Dublin and then in the winter of 1847–48 in the west of Ireland where the suffering was greatest. Nicholson's precise, detailed diaries and correspondence reveal haunting insights into the desperation of victims of the Famine and the negligence and greed of those who added to the suffering. Her account of the Great Irish Famine, *Annals of the Famine in Ireland in 1847, 1848 and 1849*, is both a record of her work and an indictment of official policies toward the poor: land, employment, famine relief. In addition to telling Nicholson's story, from her early life in Vermont and upstate New York to her better-known work in Ireland, Murphy puts Nicholson's own writings and other historical documents in conversation. This not only contextualizes Nicholson's life and work, but it also supplements the impersonal official records with Nicholson's more compassionate and impassioned accounts of the Irish poor.

**Strange Electromagnetic Dimensions** Louis Proud,2014-11-24 The author of *The Secret Influence of the Moon* explores the many strange and unexplained phenomena surrounding electromagnetism. Today, the use of electricity is so pervasive that our environment is permeated by both natural and artificial sources of electromagnetic energy—while we ourselves are electromagnetic beings. As we continue to pollute and thereby alter our electromagnetic environment, we are also altering ourselves. In particular, these changes infringe on the psychic side of our being. In *Strange Electromagnetic Dimensions*, author Louis Proud demonstrates how all things are connected by a vast electromagnetic web—a natural phenomenon that appears to have supernatural consequences. He examines ESP, poltergeist disturbances, psychokinesis, electric people, UFOs, and other paranormal phenomena from an electromagnetic perspective. He also reveals how the artificial, alien energies we've been introducing into our environment shape the way we experience the paranormal. *Strange Electromagnetic Dimensions* explores such questions as: Do human beings possess a magnetic sixth sense similar to that of homing pigeons? Are artificial electromagnetic fields, such as those emitted by power lines, gradually destroying our health? Can being struck by lightning or suffering a severe electric shock result in the development of psychic abilities? What do scientists make of the fact that ball lightning can pass through walls, enter rooms by squeezing through keyholes, and display seemingly intelligent behavior?

**Fighting God** David Silverman,2015-12-01 Fighting God is a firebrand manifesto from one of the most recognizable faces of atheism. In his book, Silverman—a walking, talking atheist billboard known for his appearances on Fox News—discusses the effectiveness, ethics and impact of the in-your-face-atheist who refuses to be silent. Silverman argues that religion is more than just wrong: it is malevolent and does not deserve our respect. It is our duty to be outspoken and do what we can to bring religion down. Examining the mentality, methods and issues facing the firebrand atheist, Silverman presents an overwhelming argument for firebrand atheism and reveals: - All religion is cafeteria religion and almost all agnostics are atheists. - American society grants religion a privileged status, despite the intentions of the Founding Fathers. - Christian politicians have adversely (and un-Constitutionally) affected our society with regard to science, health, women's rights, and gay rights. - The notion of atheist Jews is a lie forced on us by religion. - It is not Islamophobia to observe dangerous teachings and disproportionate violence in Islam. - Atheists are slowly but surely winning the battle. Fighting God is a provocative, unapologetic book that takes religion to task and will give inspiration to non-believers and serve as the ultimate answer to apologists.

**Blindsight** Peter Watts,2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

**The Technical Delusion** Jeffrey Sconce,2019-02-08 Delusions of electronic persecution have been a preeminent symptom of psychosis for over two hundred years. In *The Technical Delusion* Jeffrey Sconce traces the history and continuing proliferation of this phenomenon from its origins in Enlightenment anatomy to our era of global interconnectivity. While psychiatrists have typically dismissed such delusions of electronic control as arbitrary or as mere reflections of modern life, Sconce demonstrates a more complex and interdependent history of electronics, power, and insanity. Drawing on a wide array of psychological case studies, literature, court cases, and popular media, Sconce analyzes the material and social processes that have shaped historical delusions of electronic contamination, implantation, telepathy, surveillance, and immersion. From the age of telegraphy to contemporary digitality, the media emerged within such delusions to become the privileged site for imagining the merger of electronic and political power, serving as a paranoid conduit between the body and the body politic. Looking to the future, Sconce argues that this symptom will become increasingly difficult to isolate, especially as remote and often secretive powers work to further integrate bodies, electronics, and information.

**Haunted Massachusetts** Cheri Farnsworth,2020-06-11 Cemetery spooks, haunted historic homes and Native American legends figure prominently in this collection of eerie tales from the Bay State. **The Strange Story Book** Mrs. Andrew Lang, 2024-02-03 Now as this is the very last book of all this series that began in the long long ago, perhaps you may like to hear something of the man who thought over every one of the twenty-five, for fear lest a story should creep in which he did not wish his little boys and girls to read. He was born when nobody thought of travelling in anything but a train--a very slow one--or a steamer. It took a great deal of persuasion to induce him later to get into a motor and he had not the slightest desire to go up in an aeroplane--or to possess a telephone. Somebody once told him of a little boy who, after giving a thrilling account at luncheon of how Randolph had taken Edinburgh Castle, had expressed a desire to go out and see the Museum; 'I like old things better than new,' said the child! 'I wish I knew that little boy,' observed the man. 'He would just suit me.' And that was true, for he too loved great deeds of battle and adventure as well as the curious carved and painted fragments guarded in museums which show that the lives described by Homer and the other old poets were not tales made up by them to amuse tired crowds gathered round a hall fire, but were real--real as our lives now, and much more beautiful and splendid. All beasts were his friends, just because they were beasts, unless they had been very badly brought up. He never could resist a cat, and cats, like beggars, tell each other these things and profit by them. A cat knew quite well that it had only to go on sitting for a few days outside the window where the man was writing, and that if it began to snow or even to rain, the window would be pushed up and the cat would spend the rest of its days stretched in front of the fire, with a saucer of milk beside it, and fish for every meal. But life with cats was not all peace, and once a terrible thing happened when Dickon-draw-the-blade was the Puss in Possession. His master was passing through London on the way to take a journey to some beautiful old walled towns in the south of France where the English fought in the Hundred Years War, and he meant to spend a few weeks in the country along the Loire which is bound up with the memory of Joan of Arc. Unluckily, the night

after he arrived from Scotland Dickon went out for a walk on the high trellis behind the house, and once there did not know how to get down again. Of course it was quite easy, and there were ropes of Virginia creeper to help, but Dickon lost his presence of mind, and instead of doing anything sensible only stood and shrieked, while his master got ladders and steps and clambered about in the dark and in the cold, till he put Dickon on the ground again. Then Dickon's master went to bed, but woke up so ill that he was obliged to do without the old towns, and go when he was better to a horrid place called Cannes, all dust and tea-parties.
