Take My Money Noel Rappin,2017-02-01 Getting paid using Stripe or PayPal is only the beginning of creating a fully-functional e-commerce application. You also need to handle failure cases, inventory management, administration, security, reporting, and be compliant with legal issues. Manage one-time transactions and recurring subscriptions, handle inventory management, issue discounts and refunds, mitigate administration and compliance issues, and test your code to ensure your customers have a smooth, hassle-free experience. An e-commerce payment application is literally rewarding to build--you can see the return on investment as genuine money is added to your account. But it can be stressful to manage, with security and compliance concerns and administration issues. And your entire business may depend on these features working smoothly. Let Noel Rappin guide you through the setup and complications of dealing with online financial transactions. Go beyond just the interaction with the gateway service and build an application that will be robust and useful over time. Set up a Stripe and PayPal payment gateway and accept credit card payments. Use the Stripe API to improve security by validating credit card data without sending it through your own server. Design your application for maximum flexibility against the inevitable complexities of business logic, including handling discounts. Manage the multiple failure points of dealing with payment gateways and test for failure cases. Use background jobs to simplify third-party interactions. Handle administrative tasks such as issuing refunds and discounts while maintaining data integrity and security. Create subscription plans and manage recurring payments, and stay on top of legal issues regarding taxes, reporting, and compliance. Pay affiliates or contributors from your application. By the end, you will know how to create a fully-functional web payment-taking machine. What You Need: The code in this book works with Ruby 2.3.1 and Rails 5, though nearly all of the code will run with earlier versions of Ruby and Rails.

Stripe Sarit Markovich,Nilima Achwal,Eric Queathem,2017 This case features Stripe, a startup that enables merchants to accept payments from customers on the web, on mobile devices, and at the point of sale (POS). Stripe was launched in 2011 by the Collison brothers and quickly gained traction with e-commerce startups, particularly software and platform developers who needed help building their payment processing infrastructures. Stripe incurred high fixed costs in developing its platform and had low margins per transaction, so the company needed to reach high processing volumes (i.e., scale) to survive. This was challenging, as Stripe competed with large payment processors and traditional banks that had high processing volumes and were able to offer merchants significantly lower rates than Stripe. Still, merchants valued Stripe's solution because it was simple and versatile. Students assume the role of the Collisons to think about possible strategies Stripe could pursue to process higher volumes of transactions. Students are challenged to think about the potential response of the incumbents to Stripe's different growth alternatives. The teaching note presents the Value Net framework and discusses the importance of considering complementors and their effect on a firm's strategy. Finally, a discussion about Stripe's potential entry into the Indian market allows students to apply the concepts they learned in the discussion of a new market.

Lies, Incorporated Ari Rabin-Havt,Media Matters for America,2016-04-19 A stunning investigation of the history of organized misinformation in politics. In today's post-truth political landscape, there is a carefully concealed but ever-growing industry of organized misinformation that exists to create and disseminate lies in the service of political agendas. Ari Rabin-Havt and Media Matters for America present a revelatory history of this industry—which they've dubbed Lies, Incorporated—and show how it has crippled legislative progress on issues including tobacco regulation, public health care, climate change, gun control, immigration, abortion, and same-sex marriage. Eye-opening and indispensable, Lies, Incorporated takes an unflinching look at the powerful network of politicians and special interest groups that have launched coordinated assaults on the truth to shape American politics.
