**Buddhism in Dialogue with Contemporary Societies** Carola Roloff,Wolfram Weiße,Michael Zimmermann,2020 The growing pluralization of religion and culture in Europe means that we encounter an increasing number of Buddhist immigrants as well as ‘Western’ converts. Against this background, in June 2018, the Academy of World Religions and the Numata Center for Buddhist Studies at the University of Hamburg (Germany), invited scholars of Theravāda, East Asian and Tibetan Buddhism. The questions discussed referred to: - Does Buddhism matter today? What can it contribute? - Must Buddhism adapt to the modern world? How can Buddhism adapt to a non-Asia context? - When Buddhism travels, what must be preserved if Buddhism is to remain Buddhism? The contributions in this volume show not only that Buddhism matters in the West but that it already has its strong impact on our societies. Therefore, universities in Europe should include Buddhist theories and techniques in their curricula.

**Be(com)ing Human** Andrew Stables,2012-10-17 Educational theory is necessarily concerned with what it means to become human, ‘becoming’ implying a process of growth and change. In general, philosophy of education has tended to view childhood (defined as the period during which one is being educated) as preparation for a settled period as adult citizen, during which one’s human nature is given its full expression. Traditionally, then, first we become human, then we are (fully) human. However, when we speak of ourselves as human, we do so in these two senses: as a present species marker, and as a regulative ideal. Most literature focuses on the former sense; the present argument will focus on the latter. What, therefore, should be the grounds for a theory of the individual in society and the world that can best underpin approaches to social policy and education on the assumption that the human animal is always aspiring to fully human status that can never be attained? Central to the argument are the acknowledgment of the human as an open system and the concomitant acceptance of overlapping phenomenal worlds, whereby experience is shared but never exactly duplicated between sentient beings.ent beings

**A Curriculum of Imagination in an Era of Standardization** Robert Lake,2013-03-01 A Curriculum of Imagination in an Era of Standardization In A Curriculum of Imagination in an Era of Standardization: An Imaginative Dialogue with Maxine Greene and Paulo Freire, a volume in Landscapes of Education [Series Editors: William H. Schubert, University of Illinois at Chicago & Ming Fang He, Georgia Southern University], Robert Lake explores with the reader what is meant by imagination in the work of Maxine Greene and Paulo Freire and their relevance in an era of increasingly standardized and highly scripted practices in the field of education. The author explores how imagination permeates every aspect of life with the intent to develop capacity with the readers to look beyond the taken-for-granted, to question the normal, to develop various ways of knowing, seeing, feeling, and to imagine and act upon possibilities for positive social and educational change. The principal aspect of the work illustrated in this book that distinguishes it from other work is that an “imaginary” dialogue between Maxine Greene and Paulo Freire runs through the book using actual citations from their work. Each chapter starts with such a dialogue interspersed with the works of others and the author’s critical autobiographical reflections. With a brief overview of the socio-cultural evolution of imagination from pre-literate times to the present, the author explores some of the current iterations of imagination including the eugenics movement and “dark” imagination, sensing gaps and creative/critical imagination, metaphors as the language of imagination and empathy as social imagination. Reflecting upon emerging tensions, challenges, and possibilities curriculum workers face in such an era of standardization, the author calls for a curriculum of imagination. After providing a brief overview of the socio-cultural evolution of imagination from pre-literate times to the present, the author looks at some of the current iterations of imagination, including the eugenics movement and “dark” imagination, sensing gaps and creative/critical imagination, metaphors as the language of the imagination, and empathy as social imagination. All of these ideas are then incorporated in a curriculum of imagination that is envisioned through Joseph Schwab’s four commonplaces of curriculum followed by a discussion of emerging tensions, issues and possibilities for praxis and scholarship in present and future inquiry.

**Multi-Religious Perspectives on a Global Ethic** Myriam Renaud,William Schweiker,2020-11-29 Ratified by the Parliament of the World’s Religions in 1993 and expanded in 2018, Towards a Global Ethic (An Initial Declaration), or the Global Ethic, expresses the minimal set of principles shared by people—religious or not. Though it is a secular document, the Global Ethic emerged after months of collaborative, interreligious dialogue dedicated to identifying a common ethical framework. This volume tests and contests the claim that the Global Ethic’s ethical directives can be found in the world’s religious, spiritual, and cultural traditions. The book features essays by scholars of religion who grapple with the practical implications of the Global Ethic’s directives when applied to issues like women’s rights, displaced peoples, income and wealth inequality, India’s caste system, and more. The scholars explore their respective religious traditions’

ethical response to one or more of these issues and compares them to the ethical response elaborated by the Global Ethic. The traditions included are Hinduism, Engaged Buddhism, Shi'i Islam, Sunni Islam, Confucianism, Protestantism, Catholicism, Judaism, Indigenous African Religions, and Human Rights. To highlight the complexities within traditions, most essays are followed by a brief response by an expert in the same tradition. Multi-Religious Perspectives on a Global Ethic is of special interest to advanced students and scholars whose work focuses on the religious traditions listed above, on comparative religion, religious ethics, comparative ethics, and common morality.

Researchers and practitioners from five continents discuss three central themes that concern learning-centered higher education - the concept of learning; curriculum; and learning, teaching, and assessment processes. The chapters integrate theoretical conceptualizations and empirical examples. The book thereby offers both new approaches to the understanding of learning-centered higher education, as well as normative implications and examples of best practices from people involved in everyday practices of quality enhancement within higher education.

**Raising Secular Jews** Naomi Prawer Kadar,2016-11-01 This unique literary study of Yiddish children's periodicals casts new light on secular Yiddish schools in America in the first half of the twentieth century. Rejecting the traditional religious education of the Talmud Torahs and congregational schools, these Yiddish schools chose Yiddish itself as the primary conduit of Jewish identity and culture. Four Yiddish school networks emerged, which despite their political and ideological differences were all committed to propagating the Yiddish language, supporting social justice, and preparing their students for participation in both Jewish and American culture. Focusing on the Yiddish children's periodicals produced by the Labor Zionist Farband, the secular Sholem Aleichem schools, the socialist Workmen's Circle, and the Ordn schools of the Communist-aligned International Workers Order, Naomi Kadar shows how secular immigrant Jews sought to pass on their identity and values as they prepared their youth to become full-fledged Americans.

**Dewey's Democracy and Education Revisited** Patrick M. Jenlink,2009-04-16 Dewey's Democracy and Education Revisited focuses on democratic schools/democratic education and the work of teacher and leader practitioners in the new millennium, taking into consideration the complex and dynamic nature of preparing leaders for changing roles in schools amidst the challenges of standards and accountability, the No Child Left Behind Act, licensure/certification issues, increasing diversity, issues of social justice, shifting demographics, and the myriad of social issues that make democratic leadership necessary. The book presents a collection of contemporary discourses that reconsider the relationship of democracy as a political ideology and American ideal (i.e., Dewey's progressivist ideas) and education as the foundation of preparing democratic citizens in America. Jenlink takes the reader into a reflective and critical examination of Dewey's ideas on democratic education, set forth in the classic philosophy text, Democracy and Education. Each chapter draws the reader into a discussion of the salient and relevant points Dewey argued, and juxtaposes Dewey's points with the issues challenging educators today, in particular focusing on the challenge of fostering democratic education and leadership for America's schools.
