The Role of the Cerebellum in Cognition Giuseppina Rizzo, Angelo Quartarone, Maria Felice Marina Ghilardi, 2022-11-02

**Biomimetics** Yoseph Bar-Cohen, 2005-11-02 Nature is the world's foremost designer. With billions of years of experience and boasting the most extensive laboratory available, it conducts research in every branch of engineering and science. Nature's designs and capabilities have always inspired technology, from the use of tongs and tweezers to genetic algorithms and autonomous legged robots. Taking a systems perspective rather than focusing narrowly on materials or chemistry aspects, **Biomimetics: Biologically Inspired Technologies** examines the field from every angle. The book contains pioneering approaches to biomimetics including a new perspective on the mechanization of cognition and intelligence, as well as defense and attack strategies in nature, their applications, and potential. It surveys the field from modeling to applications and from nano- to macro-scales, beginning with an introduction to principles of using biology to inspire designs as well as biological mechanisms as models for technology. This innovative guide discusses evolutionary robotics; genetic algorithms; molecular machines; multifunctional, biological-, and nano- materials; nastic structures inspired by plants; and functional surfaces in biology. Looking inward at biological systems, the book covers the topics of biomimetic materials, structures, control, cognition, artificial muscles, biosensors that mimic senses, artificial organs, and interfaces between engineered and biological systems. The final chapter contemplates the future of the field and outlines the challenges ahead. Featuring extensive illustrations, including a 32-page full-color insert, **Biomimetics: Biologically Inspired Technologies** provides unmatched breadth of scope as well as lucid illumination of this promising field.

**Wilderness Medicine E-Book** Paul S. Auerbach, 2011-10-31 Quickly and decisively manage any medical emergency you encounter in the great outdoors with **Wilderness Medicine**! World-renowned authority and author, Dr. Paul Auerbach, and a team of experts offer proven, practical, visual guidance for effectively diagnosing and treating the full range of emergencies and health problems encountered in situations where time and resources are scarce. Every day, more and more people are venturing into the wilderness and extreme environments, or are victims of horrific natural disasters...and many are unprepared for the dangers and aftermath that come with these episodes. Whether these victims are stranded on mountaintops, lost in the desert, injured on a remote bike path, or ill far out at sea, this indispensable resource--now with online access at [www.expertconsult.com](http://www.expertconsult.com) for greater accessibility and portability--equips rescuers and health care professionals to effectively address and prevent injury and illness in the wilderness! This textbook is widely referred to as **The Bible of Wilderness Medicine**. Be able to practice emergency medicine outside of the traditional hospital/clinical setting whether you are in remote environments, underdeveloped but highly populated areas, or disaster areas, are part of search and rescue operations, or dealing with casualties from episodes of extreme sports and active lifestyle activities. Face any medical challenge in the wilderness with expert guidance: Dr. Auerbach is a noted author and the world's leading authority on wilderness medicine. He is a founder and Past President of the Wilderness Medical Society, consultant to the Divers Alert Network and many

other agencies and organizations, and a member of the National Medical Committee for the National Ski Patrol System. Handle everything from frostbite to infection by marine microbes, not to mention other diverse injuries, bites, stings, poisonous plant exposures, animal attacks, and natural disasters. Grasp the essential aspects of search and rescue. Respond quickly and effectively by improvising with available materials. Improve your competency and readiness with the latest guidance on volcanic eruptions, extreme sports, splints and slings, wilderness cardiology, living off the land, aerospace medicine, mental health in the wilderness, tactical combat casualty care, and much more. Meet the needs and special considerations of specific patient populations such as children, women, elders, persons with chronic medical conditions, and the disabled. Make smart decisions about gear, navigation, nutrition, and survival. Be prepared for everything with expanded coverage on topics such as high altitude, cold water immersion, and poisonous and venomous plants and animals. Get the skills you need now with new information on global humanitarian relief and expedition medicine, plus expanded coverage of injury prevention and environmental preservation. Get guidance on the go with fully searchable online text, plus bonus images, tables and video clips - all available on ExpertConsult.com.

Globalizing Automobilmism Gijs Mom, 2020-08-07 Why has "car society" proven so durable, even in the face of mounting environmental and economic crises? In this follow-up to his magisterial *Atlantic Automobilmism*, Gijs Mom traces the global spread of the automobile in the postwar era and investigates why adopting more sustainable forms of mobility has proven so difficult. Drawing on archival research as well as wide-ranging forays into popular culture, Mom reveals here the roots of the exuberance, excess, and danger that define modern automotive culture.

**Seagull One** Lily Prellezo, 2010-09-26 There was a time in Miami when it seemed impossible to go through a week without news coverage of the men, women and children escaping Cuba and being pulled off of makeshift rafts in the middle of the Florida Straits. One out of four did not survive the dangerous journey; the others barely hung on with little food and water. Most of the lucky ones were saved by a group of volunteers who called themselves Brothers to the Rescue (BTTR). *Seagull One* is the never-before-told story of the men and women representing nineteen nationalities who came together to fly in rickety Cessnas over the Florida Straits to search for rafters fleeing Communist Cuba. It is a fascinating account of how José Basulto, a Cuban exile and Bay of Pigs veteran, founded BTTR with the humanitarian mission of saving the lives of the desperate souls willing to brave the ocean in pursuit of freedom. The group's tactics were sometimes controversial, including protests against both the Cuban and U.S. governments, yet the organization managed to save over 4,200 people they would seldom, if ever, meet. *Seagull One* also records the infiltration of two spies, one who was a double agent working for the FBI. Together these two volunteers collaborated with the Castro government in planning the shoot down over international waters of two unarmed Cessnas flying a humanitarian mission on February 24, 1996. The cold-blooded murder of four innocent men (three American citizens and one legal resident) led to significant changes in U.S.-Cuba relations. Over one hundred people were interviewed for *Seagull One*. Their stories come to life in this nonfiction narrative that reads like a novel.

Essentials of Cerebellum and Cerebellar Disorders Donna L. Gruol, Noriyuki

Koibuchi, Mario Manto, Marco Molinari, Jeremy D. Schmahmann, Ying Shen, 2023-03-20 This monograph, now in its 2nd edition with 31 new chapters and significant updates, is the first book of its kind written specifically for graduate students and clinicians. The monograph is based on the 4-volume treatise, *Handbook of the Cerebellum and Cerebellar Disorders* (Springer, 2013; 2nd edition: 2022), the definitive reference for scientists and neurologists in the field of cerebellar neurobiology and related areas. There have been fundamental advances in the basic science and clinical neurology of the cerebellum and its role in sensorimotor function and cognition. *Essentials of the Cerebellum and Cerebellar Disorders* makes this large and expanding body of knowledge readily accessible to trainees and clinicians alike. It is organized into easy to read and short chapters that are ideal for students and clinicians. The most common cerebellar disorders encountered in the clinic are covered. The editors are world leaders in the field, and the chapters are authored by an international panel of experts drawn from cerebellar laboratories and ataxia clinics throughout North America, Europe and Asia. *Essentials* provides a solid grounding in the field of cerebellar research and ataxiology from cerebellar cellular biology and circuitry to clinical practice, and it serves as a springboard to a deeper appreciation of both the principles and the complexities of cerebellar neurobiology. Clinicians are expected to have a deep appreciation of cerebellar disorders, not only in specialized ataxia clinics but also in adult and pediatric neurology, neurosurgery, psychiatry and neuropsychology practices, and in outpatient and inpatient rehabilitation settings. This book is an indispensable resource for students and practitioners navigating the evolving field of cerebellar motor and cognitive neurology. It also links to the more expansive *Handbook* for those who need to explore the topics in this monograph in greater depth.

Austrian Review of International and European Law 2001 Gerhard Loibl, 2003-01-01 The *Austrian Review of International and European Law* is an annual publication that provides a scholarly forum for the discussion of issues of public international and European law, with particular emphasis on topics of special interest for Austria. Its analytical articles focus on theoretical questions, current developments, and emerging tendencies in all areas of the field, including detailed reviews of relevant recent literature. Issues of human rights law and the law of international organisations are also covered. An important integral element of the *Review* is its digest of Austrian practice in public international law, encompassing both executive and judicial developments. The editorial board and advisory board comprise scholars and practitioners in public international and European law, ensuring that the *Review* adequately reflects the interrelationships between current developments and the continuing evolution of this important area of legal theory and practice.

*Texts and Materials on International Human Rights* Rhona K.M. Smith, 2009-10-16 *International Human Rights*, now more than ever, is at the forefront of global politics and encompasses a broad and diverse range of subjects, issues and geographical jurisdictions. This book takes a thematic approach to the subject by collecting material around concepts and frameworks rather than specific rights making it the ideal companion for most courses in *International Human Rights*. Cases and material are clearly separated from the main body of the text so that extracted material is immediately recognizable.

The surrounding text contextualizes each extract and explains the relevant issues, while questions throughout the book encourage students to analyse and debate the material they are reading. This book is ideal for students seeking to truly engage with and understand the key issues concerning the study of international human rights. This second edition has been fully updated to take into account key developments since the publication of the previous edition in 2006 including the reform of the UN mechanisms. Each chapter now also includes expanded author commentary as well as more questions to encourage students to reflect and consider the broader issues and context of the law. New chapter summaries outline the content of each chapter and a detailed table of contents has been added, making it easier to locate specific topics within the text. Finally additional guidance is provided to help students to locate sources online and develop research skills within this expanding and exciting area of law.

**Regulating Transnational Corporations in Domestic and International Regimes** Evaristus Oshionebo, 2009-01-01 This study explores the range of strategies for regulating the social and environmental practices of TNCs in Africa's extractive industries.

**Extracting The Future from The Present** Ion Storland, 2020-11-26 Mapping accurately the future is no longer a storytelling fantasy; rather, a workplace of data scientists, programmers or analysts. With a background in engineering and as an estimator, Ion Storland presents a book that explores in the present, a future scenario of human civilization on Earth and beyond, based on information and observations from the past. The interdisciplinary content gathered and described in the book seeks to build a panoramic view of how the various domains and sectors of economy, technology, and society are interrelated and interact with peoples' day-to-day lives; and also to picture the consequences of actions that frame the events of the future. An inevitable future of interlinked brains will form a mindociety – a society of people whose minds are connected through brain implants. What can we expect from such an outcome? How should we prepare? From describing confined norms and mindset (from Storland's point of view) on planet Earth, to the astonishing, universal, philosophical burden of existence, Sorland raises the hypothesis of Existential Infinitylock, which makes it impossible for anyone or anything to be able to define the origin of existence; not today, not in million or billions years. The argument is based on and takes into account the properties of infinite order.

**Protecting Civilians** Siobhán Wills, 2009-02-26 This book examines the obligations of troops to prevent serious abuses of human rights towards civilians under international humanitarian law and international human rights law. It analyses the duty to intervene to stop the commission of serious abuses of human rights by analysing the meaning and practical consequences for troops, in terms of civilian protection, of the Article 1 duty to respect

and ensure respect for the Geneva Conventions; of the duty to secure human rights (found in most international human rights treaties); and of the duty to restore law and order in an occupation. The book also analyzes the extent of troops' obligations to provide protection in light of various different operational and legal contexts in and discusses 'grey areas' and lacuna of coverage. A discussion of whether new approaches are needed, for example where operations are undertaken explicitly to protect people from serious violations of their human rights follows; and the book concludes by offering some guidelines for troops faced with such violations.

**Censored 1998** Peter Phillips, Project Censored, 1998-04-07 The yearly volumes of Censored, in continuous publication since 1976 and since 1995 available through Seven Stories Press, is dedicated to the stories that ought to be top features on the nightly news, but that are missing because of media bias and self-censorship. The top stories are listed democratically in order of importance according to students, faculty, and a national panel of judges. Each of the top stories is presented at length, alongside updates from the investigative reporters who broke the stories. Beyond the Top 25 stories, additional chapters delve further into timely media topics: The Censored News and Media Analysis section provides annual updates on Junk Food News and News Abuse, Censored Déjà Vu, signs of hope in the alternative and news media, and the state of media bias and alternative coverage around the world. In the Truth Emergency section, scholars and journalists take a critical look at the US/NATO military-industrial-media empire. And in the Project Censored International section, the meaning of media democracy worldwide is explored in close association with Project Censored affiliates in universities and at media organizations all over the world. A perennial favorite of booksellers, teachers, and readers everywhere, Censored is one of the strongest life signs of our current collective desire to get the news we citizens need—despite what Big Media tells us.

Space Walks Kathleen W. Deady, 2002-06 Explains the history of space walks and describes the type of equipment and training astronauts need for walking in space.

Inducing Compliance with International Humanitarian Law Heike Krieger, 2015-09-18 The number of armed conflicts featuring extreme violence against the civilian population in areas with no or little State authority has risen significantly since the early 1990s. This phenomenon has been particularly prevalent in the African Great Lakes Region. This collection of essays evaluates, from an interdisciplinary perspective, the various traditional and alternative instruments for inducing compliance with international humanitarian law. In particular, it explores the potential of persuasion, as well as hierarchical means such as criminal justice on the international and domestic level or quasi-judicial mechanisms by armed groups. Furthermore, it evaluates the role and potential of human rights bodies, peacekeeping missions and the UN Security Council's special compliance system for children and armed conflicts. It also considers how Common Article 1 to the Geneva Conventions and the law of State responsibility could both potentially increase compliance with international humanitarian law.

*A Quirky Eye* William E. Woodruff, 2008-09-17 The Collected Works of William E. Woodruff Jr. is being published posthumously by William's wife, Gloria Avrech, to honor him. William died on April 22, 2004. Brace yourself for an

unforgettable reading experience as Xlibris releases *A Quirky Eye*. William E. Woodruff Jr. is a writer of great clarity, wit and wisdom. His gifted facility with imagery and love of the English language shines through in this unique collection that contains most of his creative writing. Inside are an enticing and diverse smorgasbord, including haiku, light and serious lyric poems, gimmick, visual and scrabble poems, and several short stories. Regarding his literary work Mr. Woodruff comments, All my writings, whatever their differences, have in common the darkness outside my window as I write, the green glow of the letters on my computer screen, and caffeine.

Spacewear Barbara Brownie,2019-01-10 Today, we are living in the New Space Age, where mass commercial space travel is almost within our grasp. This

otherworldly possibility has opened up new cultural images of space, both real and fictional, and has caused fashion design and spacesuit engineering to intersect in new, exciting ways. Spacewear traverses this uncharted territory by exploring the changing imagination of space in fashion-and fashion in space-from the first Space Age to the 21st century. Exploring how space travel has stylistically and technologically framed fashion design on earth and how we need to revisit established design practices for the weightless environment, Spacewear connects the catwalk and the space station. This book draws together speculative fantasies in sci-fi films such as *Star Trek* and *2001: A Space Odyssey*, with the engineered spacesuits Biosuit, and the NASA Z-2 and with catwalk interpretations by the likes of Alexander McQueen, Hussein Chalayan, André Courrèges, and Iris van Herpen. While the development of commercial space agencies has led to new concerns for style in garments for outer space that re-think fundamental design principles such as drape, high fashion has experimented with new possibilities for weightlessness that extend far beyond the 1960s vision of Space Age metallic fabrics and helmet-style headwear. Brownie takes the reader on a fascinating journey from fantasy to function and to form, deepening our understanding of this new category of fashion that is prompting new approaches to garment design and construction both on earth and in outer space.
