Supply-Side Follies Robert Atkinson,2007-10-29 Supply-Side Follies methodically debunks the common assumptions of conservative economics and demonstrates why it is a 'flawed doctrine' that is setting up the U.S. for a major economic downturn in the near future.

**99 Jumpstarts for Kids' Social Studies Reports** Peggy Whitley,Susan Williams Goodwin,2007-06-30 Building on the success and maintaining the 99 Jumpstarts format of the two previous books, 99 Jumpstarts for Kids' Social Studies Reports is divided into broad topical sections. Each topic is arranged in alphabetical order under its section. Topics are all new to this title and include the Ancient World, Historic World Events, State and Local History, US History, Government and Citizenship, Sociology, Culture and Economics. The book includes the following sections in each Jumpstart: A cited quote about the topic, Related Jumpstarts, New Words, You are There, Topics to Consider, Books, Internet, For the Teacher, and a relevant activity. Each Jumpstart provides a helpful pathfinder that enables students to efficiently access information and learn new information literacy skills as they research topics of personal interest or gather information for school reports. Grades 3-8.

Construction Supply Chain Economics Kerry London,2007-12-11 This is the first comprehensive investigation of the industrial sourcing and procurement practices throughout sixty-eight construction industry supply channels across seven major commodity sectors at all levels. London presents real-world case studies to combine theory and practice to describe the economic structural and behavioural characteristics of sectors integral to the construction industry performance. Construction Supply Chain Economics details 'everyday' experiences and procurement decisions made by people in firms in the industry related to projects as they seek out other firms to work with during the tendering stage. London creates a language that enables us to classify and understand behaviour and recognise the impact of our decisions on firms and projects within the industry. Construction Supply Chain Economics introduces a new model for mapping the construction sector of particular interest to construction management and economic researchers and to procurement decision makers, including policymakers and clients, as well as industry practitioners, such as contractors, consultants and materials suppliers.

*Wheat* Hugh Cornell,Albert W. Hoveling,2020-02-03 This book meets the need for a comprehensive, up-to-date review of wheat chemistry, processing and uses. It provides the reader with extensive new information on wheat components that will be useful in better commercial utilization of wheat and the formulation of new and upgraded wheat-based food products. The book serves as a one-volume information resource for all those involved in the research, development, formulation, and evaluation of wheat-based food products. From the Authors' Preface Wheat continues to be one of the world's most important grains, especially as a food, where the unique properties of its products can be utilized to advantage. It provides an excellent example of a natural product from which a wide range of useful by-products can be made. This book discusses the components of the wheat kernel, which provide interesting examples of study of carbohydrate and protein chemistry, as well as lipids, minerals and vitamins. This book should serve as a useful reference for the cereal chemist, as well as chemists and food technologists in those industries in which by-products of flour are used, e.g., the confectionery industry in which modified starches and starch syrups are used. In addition, nutritionists, dieticians, and many kinds of researchers will find chapters of interest. Particular attention is given to particle-size determinations, an important area in food processing, and to the role of wheat proteins in gluten intolerance and wheat allergy. . . . Both the milling of wheat and flour quality are discussed in order to give the reader an idea of the distribution of the major components and the importance of proper size reduction. The book also has a chapter on wet milling of wheat flour . . . and chapters on the properties and uses of wheat starch, starch syrups, and chemically modified wheat starch.

Internet Applications in Product Design and Manufacturing George Q. Huang,K.L. Mak,2012-12-06 This book deals with Web applications in product design and manufacture, thus filling an information gap in digital manufacturing in the Internet era. It helps both developers and users to appreciate the potentials, as well as difficulties, in developing and adopting Web applications. The objective is to equip potential users and practitioners of Web applications with a better appreciation of the technology. In addition, Web application developers and new researchers in this field will gain a clearer understanding of the selection of system architecture and design, development and implementation techniques, and deployment strategies. The book is divided into two main parts. The first part gives an overview of Web and Internet and the second explains eight typical Web applications.

*Go Green, Live Rich* David Bach,Hillary Rosner,2008-04-08 Let David Bach show you a whole new way to prosper—by going green Internationally renowned financial expert and bestselling author David Bach has always urged readers to put their financial lives in line with their values. But what if your values are a cleaner and greener earth? Most people think that “going green” is an expensive choice they can’t afford. Bach is here to say that you can have both: a life in line with your green values and a million dollars in the bank. Go Green, Live Rich outlines fifty ways to make your life, your home, your shopping, and your finances greener—and get rich trying. From driving the right car to making your home energy smart, Bach offers ways to improve the environment while you spend less, save more, earn more, and pay fewer taxes. Best of all, he shows you exactly how to take advantage of the green wave in personal finance without the difficult work of evaluating individual stocks. What's more, he will get you thinking about a green business of your own so you can help the world along as it is changing for the better. David Bach is on a mission to teach the world that you can live a great life by living a green life. With Go Green, Live Rich, you can live in line with your eco-values on the road to financial freedom.

Free Market Missionaries Sharon Beder,2012-06-25 In her recent book Suiting Themselves, bestselling author Sharon Beder exposed how the global corporate elite have brazenly rewritten the rules of the global economy to line their pockets. In this new book she trains her sights on the insidious underbelly of this global trend to show how they have also orchestrated a mass propaganda campaign to manipulate community values and convince us that their interest - co-opting and controlling all of us in the name of the free market - is in our interest. During the 20th century, business associations coordinated mass propaganda campaigns combining 20th century American PR methods with revitalized free market ideology from 18th century Europe. The aim was to persuade people to eschew their own power as workers and citizens, and forego their democratic power to restrain and regulate business activity. Sophisticated corporate-funded think tanks augmented these campaigns in the 1970s and 1980s, promoting free enterprise and business-friendly policies. These free market missionaries now seek to change individual and institutional values through bolder strategies such as expanding share ownership and manipulating wider public concerns. In each case the goal is the same: the triumph of business values over community values. Beder’s is an intellectual call to

arms: challenge the ideology of the free market missionaries or be converted to it.

**Rethinking Market Regulation** John N. Drobak, 2021-05-25 A subversive approach to economic theory, *Rethinking Market Regulation* explores the devastating impact of globalisation and a lack of governmental regulation on the US workforce. It challenges two key economic principles: that markets are competitive, making government intervention unnecessary, and the claim that corporations exist for the benefit of their shareholders, but not for other stakeholders. Arguing that both principles are based in myth, this book offers an insightful perspective into the plight of workers faced with widespread job losses through the merging and outsourcing of resources. *Rethinking Market Regulation* ties together the problems that come with using economic principles as a justification for a lack of government intervention with the harm and widespread social repercussions faced by workers. With a close focus on the personal and financial consequences of losing employment, this book offers a compelling comparison of the legal and social treatment of labor in the US and the EU, closing with the recommendation for a new regulatory regime as a prescription for the current system of mass inequality and widespread job losses. *Rethinking Market Regulation* is ideal for scholars, professionals and anyone else interested in gaining an alternative perspective to modern US economic theory and market regulation.

The Political Economy of Global Responses to COVID-19 Alan W. Cafruny, Leila Simona Talani, 2023-03-25 This book seeks to identify the reasons why some countries were more efficient and effective than others in responding to the COVID 19 pandemic, and why the global community failed to coalesce. What are the political determinants of the different state responses to the pandemic? Why was scientific advice rejected or ignored in many countries? What has been the role, respectively, of neoliberalism, populism, and authoritarianism in the making of Covid-19 policy? What role have each of these factors played in the uneven and clearly inadequate global response to the pandemic? In an effort to understand why some states failed to handle the pandemic properly, some of the literature suggests that populism is at the root of the current failure of international co-operation. The global financial crisis of 2008-10 triggered significant cooperation within the G-20, led by the combined efforts of the United States and China. These forms of cooperation have clearly disappeared in the context of the pandemic, not only with respect to economic policy but also in public health and management. The authors of this volume link the different state responses to the pandemic-- from its inception to the start of the vaccination campaign, and to the political regimes prevailing in each. In particular, the present volume focuses on a distinction between the responses of neo-liberal regimes, populist regimes and authoritarian ones.

Quality and Operations Management Revised Edition Elearn, 2013-06-17 Management Extra brings all the best management thinking together in one package. The series fuses key ideas with applied activities to help managers examine and improve how they work in practice. Management Extra is an exciting, new approach to management development. The books provide the basis for self-paced learning at level 4/5. The flexible learning structure allows busy participants to study at their own convenience, minimising time away from the job. The programme allows trainers to quickly plan and deliver high quality, business-led courses. Trainers can select materials to meet the needs of their delegates, clients, and budget. Each book is divided into themes of ideal length for delivering in a training session. Each theme has a range of activities for delegates to complete, putting the training into context and relating it to their own situation and business. The books' lively style will stimulate further interest in the subjects covered. Guides for further reading and valuable web references provide a lead-in to further research. Management Extra is based on the NVQ framework to ease the creation of Diploma, Post Graduate Diploma or NVQ programmes for managers. It is accredited with all leading awarding bodies.

**China's Belt and Road Initiative** The International Institute for Strategic Studies (IISS), 2022-12-16 The IISS Strategic Dossier China's Belt and Road Initiative provides a geopolitical and geo-economic assessment of President Xi Jinping's flagship foreign-policy initiative. The dossier explores the Belt and Road Initiative's role in China's domestic industrial strategy and in the country's growing influence around the world. It studies how Beijing's ambitions, management and financing of the initiative have evolved since its launch in 2013. In addition, the volume reflects on the future of China's initiative following the COVID-19 pandemic. The dossier is organised around a region by region assessment of what Beijing has sought to achieve in different countries and how the Belt and Road Initiative has played out over time. The volume examines recipient countries' responses to the Belt and Road Initiative and how these have affected it. It also looks at responses from other global and regional powers to China's economic activities around the world and offers thoughts on ways the West might better contend with Beijing's geo-economic influence.

*Crossing the Himalayas* Nian Peng, Ghulam Ali, Yi Zhang, 2021-10-27 This book aims to analyze two contrasting trends of integration and rivalry among great powers and regional states of Himalaya. It examines the interactions between the great powers and the small states in the Himalayan region, analyzes the multiple effects of the great power rivalry on the regional cooperation, and predicts the possible directions of the future of the geo-politics and geo-economy in the Himalayan region by incorporating the most recent developments. The main content of the book is divided into 11 parts. The Introduction briefly explains the aims and scope of this book. The following chapter focuses on the Buddhist ties between China and the Himalayan states in the past two millennia and its dual influence in the Himalayan region. The rest 9 chapters provide an in-depth analyses of the security dilemma between China and India, Indian perspectives on China-South Asian relations, Chinese perspectives on U.S. and Japan's engagement with South Asia and Indo-Myanmar relations, and Pakistan, Sri Lanka, Bangladesh and Nepal's responses to the regional integration and great power rivalry in the Himalayan region respectively. This is the first study which brings the Himalaya region at the center of geopolitical and geo-economics cooperation and rivalry thus highlighting its significance in Asian politics. It offers a comprehensive analysis of the complicated geo-political and geo-economic competition in the Himalayan region by inviting experts from both South Asia and China to contribute chapters. It also balances the west-centered views on the great power rivalry by introducing cultural perspective and small state perspective. The broad approach adopted in the book with focus on all important countries expands the scope of readership beyond specific academic community. The book will interest academics, policy makers, journalists, general reader and students of Asian politics.

*Choosing Green* Jerry Yudelson, 2008-05-01 I find *Choosing Green* incredibly insightful and chock full of insider's experience. This is the kind of book that will help homebuyers cut to the chase and leap frog the poseurs towards legitimate green home living. I think *Choosing Green* would also be helpful to builders that are trying to green their business. Building green, as Yudelson discusses in the book, is the hottest trend in the building industry, but you have to know how to do so in the best, most effective way. So if you're looking for a thorough guide to good green homes, make sure to pick up a copy of *Choosing Green*. Reviewed by Preston D K, Jetson Green Energy-efficient, non-toxic, healthy homes are the hottest trend in the building industry. Homebuilders are constructing green homes in astonishing numbers—nearly 200,000 in the United States alone in 2006. How does a home buyer who wants a green home know what to look for, what questions to ask a builder, which green home rating systems to trust, and what homes are on the market? Nationally recognized green-building expert Jerry Yudelson provides answers to

some common areas of concern, including: Energy-efficient home features Water conservation fixtures Non-toxic finishes Green products Healthy indoor air Drawing from the expertise of dozens of homebuilders, government officials, and green home experts, Choosing Green deftly takes the reader through these considerations with easy-to-use tables, charts, maps, score sheets, and checklists. The book includes a glossary of green building terms, an extensive resource section, and a list of homebuilders, green rating programs, and financial incentives. This comprehensive book provides home buyers with every thing they will need to make a successful search for their own green home. Jerry Yudelson is the president of Yudelson Associates, green building consultants. He has trained over 3,000 people in the LEED green building rating system. He chairs Greenbuild, the world’s largest green building conference, and has written six books on green building, including Green Building A to Z (New Society Publishers).
