Dummies 101 Asha Dornfest,1997 This easy-to-use tutorial should be helpful to users who are looking for an easy way to create and manage professional-quality Web sites using Microsoft's Web authoring software. The book explains how FrontPage's functionality, such as WYSIWYG editing and wizards, guide users through the creation of a Web site. It introduces novice users to FrontPage's authoring and editing tools, showing them how to build an eye-catching site.

Blindsight Peter Watts,2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Running Microsoft FrontPage 2000 Jim Buyens,1999 A reference that takes readers through the most-used tasks and functions of FrontPage 2000, Microsoft's bestselling Web authoring tool. The Running series is designed to be easy to use, with a friendly open design featuring copious screen shots, call-outs, cross-references, and tips.

Guide to Graphics Software Tools Jim X. Chen,2007-08-23 Today, many scientists in different disciplines realize the power of graphics, but are also bewildered by the numerous graphics tools. More often than not, they choose the improper software tools and end up with unsatisfactory results. This book introduces and categorizes the most commonly used graphics tools and their applications. The purpose is not to provide an exhausting list of tools and their explicit functions, but rather to provide scientific researchers with different means and application areas in computer graphics, so as to help them efficiently use visualization, modeling, simulation, and virtual reality to complement their research needs. This guide includes coverage of the most widely used commercial software, freeware and open-source software.

The R Book Michael J. Crawley,2007-06-13 The high-level language of R is recognized as one of the most powerful and flexible statistical software environments, and is rapidly becoming the standard setting for quantitative analysis, statistics and graphics. R provides free access to unrivalled coverage and cutting-edge applications, enabling the user to apply numerous statistical methods ranging from simple regression to timeseries or multivariate analysis. Building on the success of the author's bestselling *Statistics: An Introduction using R*, *The R Book* is packed with worked examples, providing an all inclusive guide to R, ideal for novice and more accomplished users alike. The book assumes no background in statistics or computing and introduces the advantages of the R environment, detailing its applications in a wide range of disciplines. Provides the first comprehensive reference manual for the R language, including practical guidance and full coverage of the graphics facilities. Introduces all the statistical models covered by R, beginning with simple classical tests such as chi-square and t-test. Proceeds to examine more advanced methods, from regression and analysis of variance, through to generalized linear models, generalized mixed models, time series, spatial statistics, multivariate statistics and much more. *The R Book* is aimed at undergraduates, postgraduates and professionals in science, engineering and medicine. It is also ideal for students and professionals in statistics, economics, geography and the social sciences.

A Switch in Time Kenneth M. Pollack,2007-02-01 There is no greater foreign policy challenge for the United States today than the reconstruction of Iraq. The Saban Center for Middle East Policy at Brookings recently assembled a small group of experts to consider U.S. policy toward Iraq in all of its dimensions—military, political, and economic. Saban Center director of research Ken Pollack took the recommendations of the Iraq Policy Working Group and combined them with findings from trips to Iraq and to U.S. Central Command in Tampa to produce *A Switch in Time*, a comprehensive strategy for stabilizing Iraq in the near term and setting it back on the path toward political and economic advancement. The current U.S. approach is encountering considerable difficulty and appears unlikely to produce a stable Iraq within the next few years, not only because of the military insurgency but also because of government failure in Iraq: the overthrown Saddam regime was not replaced by effective military or political institutions. The alternative proposed by some Bush administration critics, however—a rapid withdrawal—would not serve U.S. interests. While many thoughtful experts have attempted to offer a realistic third course of action, none has so far succeeded. This report proposes such a strategy by detailing the essential need to integrate military, political, and economic policies in Iraq. This concise and straightforward book offers a comprehensive, alternative approach to current U.S. military, political, and economic policies in Iraq. Iraq Policy Working Group: Raad Alkadiri (PFC Energy Consulting), Frederick Barton (Center for Strategic and International Studies), Daniel Byman (Saban Center and Georgetown University), Noah Feldman (New York University), Paul Hughes (United States Army [ret.], United States Institute of Peace), Brian Katulis (Center for American Progress), Andrew Krepinevich Jr. (United States Army [ret.], Center for Strategic and Budgetary Assessments), Andrew Parasiliti (Barbour, Griffith & Rogers), Kenneth M. Pollack (Saban Center), Irena Sargsyan (Saban Center), and Joseph Siegle (Development Alternatives)
