Nuwaubian Pan-Africanism Emeka C. Anaedozie, 2019-12-03

This book examines the contemporary operational and theoretical

parameters of Pan-Africanism and black nationalism in the post-civil rights era. It uses the Nuwaubian movement as a case study to explore this essential strand in African Diasporan history, culture, and tradition. The author argues that the Nuwaubian Nation, like their contemporaries such as the Nation of Islam, represents contemporary efforts of African descendants to dialectically and culturally fight oppression. He argues that unlike the classical Back to Africa movements, the contemporary ones do not seek to primarily relocate to Africa, but to go to Africa culturally and bring back Africa to the diaspora. This effort can be seen in the Nuwaubian attempts at unearthing and importing classical African traditions, mores, and values in their various communities across the United States, especially in Eatonton, Georgia. Their aim was to chart an identity for their adherents and inspire racial pride for people of African descent.

Marketing Cases from Emerging Markets Dilip Mutum, Sanjit Kumar Roy, Eva Kipnis, 2013-09-03 Despite the fact that experts acknowledge the importance of the emerging markets, there is a dearth of real case studies specially focussed on marketing issues. This case study book addresses that need. It is also important and timely in providing a framework for instructors and researchers

(both academic and industry) to understand the dynamics occurring in emerging markets. This book is composed of long and short real cases with varying complexity in different sectors including airlines, hotel, fashion, etc. These will cover issues which are unique to the emerging markets (including the BRIC countries) to understand the dynamics occurring in these countries. With its case studies, collection of questions, and real-life marketing examples, this book offers unique benefits to marketing students and educators across the world. A must-have for every marketing course module.

British Foreign Policy and the Anglican Church Timothy

Blewett, Adrian Hyde-Price, 2021-08-27 Whilst the views of leaders within the Church of England are frequently canvassed during periods of national crisis, little attention has been devoted to finding out whether there are Church perspectives on contemporary foreign policy issues. The Church of England has not been regarded as an actor with a strong input into international affairs, preferring to speak out on domestic and individual issues. Yet world politics present fundamental ethical dilemmas which call for careful deliberation and the Church has a role to play both in shaping the debate and arguing for particular policy directions. To what extent is national policy shaped by underlying Christian

values. Do the campaigning efforts of faith groups really exert influence and guide the development of state policy? This book seeks to elucidate whether there are particular Christian perspectives on the role that Great Britain should play in the world today. It investigates the role that the Church of England has played in contemporary foreign policy issues: including the use of force - intervention, counter-terrorism and arms sales - and overseas trade, aid and debt forgiveness. The book brings together senior individuals from within the Church, academia and non-governmental organisations to investigate these various ethical dilemmas.
