**Learn to Code HTML and CSS** Shay Howe,2014-04-22 HTML and CSS can be a little daunting at first but fear not. This book, based on Shay Howe's popular workshop covers the basics and breaks down the barrier to entry, showing readers how they can start using HTML and CSS through practical techniques today. They'll find accompanying code examples online, while they explore topics such as the different structures of HTML and CSS, and common terms. After establishing a basic understanding of HTML and CSS a deeper dive is taken into the box model and how to work with floats. The book includes an exercise focused on cleaning up a web page by improving the user interface and design, solely using HTML and CSS. With a few quick changes the web page changes shape and comes to life. Interactive, technically up-to-the-minute and easy-to-understand, this book will advance a student's skills to a professional level.

**The Arab Lobby and US Foreign Policy** Khalil Marrar,2008-10-27 The US foreign policy stance on Israel-Palestine has shifted considerably in recent years, from a position of Israel only to one which embraces both Israel and Palestine in a call for peace. This volume assesses why the US stance has evolved in the way that it has, concluding that while international factors cannot be overlooked, developments within the United States itself are also crucial. After years of vacillating on Palestinian national aspirations, the majority of Americans, the author notes, have come to favor the establishment of an independent Palestinian state on the West Bank and the Gaza strip. Considering what accounts for changes in US policy on Israel-Palestine, this volume: delivers a thorough assessment of the role of international and domestic factors in shaping US policy in this area considers how US policy has evolved from the Camp David negotiations of the 1970s up to the occupation of Iraq in the mid 2000s explores the significance of American public opinion and the pro-Israel and Arab lobbies in the evolution of US policy The Arab Lobby and US Foreign Policy will be of interest to students and scholars of Foreign Policy and Political Science, Current Affairs and American Studies. Khalil M. Marrar is Professor at DePaul University, USA. He has served in editorial positions at the Arab Studies Quarterly and the Association of Arab-American University Graduates.

*The Animal Experimentation Debate* David E. Newton,2013-05-09 Reviewing the topic from antiquity to the present day, this book examines the debate over the use of animals in research in a fair and balanced way. The debate over the use of nonhuman animals in experimental research has gone on for centuries, and it continues as vigorously today as it ever has. In fact, in the last decade, the controversy has intensified, making animal testing a topic at the highest level of debate of any socioscientific issue in the United States. This book presents all sides of the issue so that readers can come to their own conclusions as to the morality and validity of animal experimentation, and provides biographies of individuals and descriptions of organizations that have been involved in the debate over the centuries. Additionally, it documents the historical shift in thinking that made animal experimentation commonplace between the time of the ancient Greeks and the 19th century, to the mindset of some who argue for an end to the practice and alternative ways of conducting medical experimentation to benefit human health.

**Essential XHTML fast** John Cowell,2012-12-06 XHTML is a flexible XML-based markup language for designing Web sites. In January 2000, the W3C announced that it was supporting the development of XHTML as a replacement to HTML. HTML will continue to be around for a while, but if you want to develop Web sites for the future you need to switch to XHTML. Designers who make the change find that they can develop faster, better sites using XHTML. Most Web sites are interactive, responding to the viewer. To do this you need to use a scripting language - JavaScript is the most popular scripting language and interfaces easily with XHTML. To develop powerful interactive Web sites you need to understand these technologies and how they work together. Essential XHTML fast gives you everything you need to develop great Web sites in XHTML, including an introduction to scripting with JavaScript so that you can create dynamic interactive Web pages. There are many step-by-step examples, which you can download from the series Web site. It covers key aspects such as: - The relationship between XML and XHTML - Cascading Style sheets for formatting layout - Using text, images and image maps as links - Creating and using tables - The new standard for frames - Interactive XHTML forms - The JavaScript language - Incorporating JavaScript into XHTML pages - Handling events in JavaScript The source code for the examples in this book is available at the Essential series web site <http://www.essential-series.com>.

**Empire and Emancipation** S. Karly Kehoe,2021-12-17 Empire and Emancipation explores how the agency of Scottish and Irish Catholics redefined understandings of Britishness and British imperial identity in colonial landscapes. In highlighting the relationship of Scottish and Irish Catholics with the British Empire, S. Karly Kehoe starts an important and timely debate about Britain's colonizer constituencies. The colonies of Nova Scotia, Cape Breton Island, Newfoundland, and Trinidad had some of the British Empire's earliest, largest, and most diverse Catholic populations. These were also colonial spaces where Catholics exerted significant influence. Given the extent to which Scottish and Irish Catholics were constrained at home by crippling legislation, long-established patterns of socio-economic exclusion, and increasing discrimination, the British Empire functioned as the main outlet for their ambition. Kehoe shows how they engaged with and benefitted from the security needs of an expanding empire, the aspirations of an emerging middle class, and Rome's desire to expand its influence in British territories. Examining the experience of Scottish and Irish Catholics in these colonies exposes how the empire levelled the playing field for Britain's national groups and brokered a stronger and more coherent British identity. In highlighting specific aspects of the complex and multifaceted relationship between Catholicism and the British imperial state, Kehoe presents Britishness as an identity defined much more by civil engagement and loyalism than by religion. In this way, Empire and Emancipation furthers our understanding of Britain and Britishness in the Atlantic world.

**Night Hunters** William Pace Head,2014-03-18 In Night Hunters, air power historian William P. Head provides the first detailed study of the development and deployment of the AC-130 gunship. While other airframes and other types of close air support (CAS) and interdiction weapon systems preceded or flew with the AC-130s, this four-engine cargo airframe proved to be not only the longest serving fixed-wing gunship but also the most effective by far. During the Vietnam War, the US military developed new tactics and weapons systems to counter a diversity of enemy tactics and geographic features, the difficult climate, and the shifting diplomatic context. One of the most important was the development of the AC-130. Its ability to transport heavier payloads at higher altitudes across longer

distances made it the logical choice to be the final Vietnam-era fixed-wing gunship and the only one that continues to fly missions in the twenty-first century. In addition, it employed many of the most advanced weapons, sensors, targeting devices, and fire control systems of the 1970s or of any era. By recounting both the technical development and the combat operations of the plane, and by looking at the proposed alternatives for its use in the War on Terror, Night Hunters offers a clear view of the role of gunships and of close air support in US wars. In today's never-ending brushfire wars, the AC-130s continue to uphold their reputation for excellence.

**The Complete Idiot's Guide to the Reformation & Protestantism** James S. Bell, Tracy Macon Sumner, 2002 An easy-to-understand history of the Reformation and how it created modern Protestantism, for anyone interested in understanding why the Protestant churches, denominations and beliefs are what they are today.

**Restoration and History** Marcus Hall, 2010-02 Papers from a meeting of an interdisciplinary group of ecologists, geographers, anthropologists, sociologists, historians, and philosophers held July 2006 in Zurich, Switzerland.

**The Advanced HTML Companion** Keith Schengili-Roberts, 1997 Learn how to master the Web through this advanced guide to the ins and outs of HTML, the lingua franca of the Internet. This knowledge-packed how-to reference will equip you with the ammunition necessary to create powerful Web pages through the latest HTML innovations such as Style Sheets and Document Types. In covering the entire HTML spectrum, this book will appeal to beginners who are looking for a good grounding in HTML, experts who need a complete and in-depth reference, and those who are simply looking to stay on the cutting edge of Web technologies.

**Transgender History, second edition** Susan Stryker, 2017-11-07 Covering American transgender history from the mid-twentieth century to today, Transgender History takes a chronological approach to the subject of transgender history, with each chapter covering major movements, writings, and events. Chapters cover the transsexual and transvestite communities in the years following World War II; trans radicalism and social change, which spanned from 1966 with the publication of *The Transsexual Phenomenon*, and lasted through the early 1970s; the mid-'70s to 1990-the era of identity politics and the changes witnessed in trans circles through these years; and the gender issues witnessed through the '90s and '00s. Transgender History includes informative sidebars highlighting quotes from major texts and speeches in transgender history and brief biographies of key players, plus excerpts from transgender memoirs and discussion of treatments of transgenderism in popular culture.

**UNIX** Deborah S. Ray, Eric J. Ray, 1998 With in-depth information on over 250 of the most common UNIX commands of any flavor, this is an essential guide containing secrets of the UNIX wizards with simple visual, step-by-step instructions

**Tracing Your Naval Ancestors** Simon Fowler, 2011-12-13 This concise guide to naval history and naval records is essential reading and reference for anyone researching the fascinating story of Britain's navy and the men and women who served in it. Whether you are interested in the career of an individual seaman, finding out about a medal winner or just want to know more about a particular ship, campaign or operation, this book will point you in the right direction. Simon Fowler assumes the reader has little prior knowledge of the navy and its history. His book shows you how to trace an officer, petty officer or rating from the seventeenth century up to the 1960s using records at the National Archives and elsewhere. The book also covers the specialist and auxiliary services associated with the navy among them the Royal Marines, the Fleet Air Arm, the naval dockyards, the WRNS and the Fleet Auxiliary. In each section he explains which records survive, where they can be found and how they can be used for research. He also recommends resources available online as well as books and memoirs. His handbook is a valuable research tool for anyone who is keen to find out about the career of an ancestor who served in the Royal Navy or was connected with it.

**The Room Is on Fire** Susan Weinstein, 2018-05-31 Blends history and theory with practical descriptions of how spoken word poetry is taught and how to produce spoken word events. *The Room Is on Fire* offers an overview of youth spoken word poetry's history, its practitioners, participants, and

practices. Susan Weinstein explores its grounding in earlier literary/performance/educational traditions and discusses its particular challenges. In order to analyze these issues, the story of how youth spoken word poetry developed as a field is told through the voices of those involved. Interviewees include the people who organized the first youth poetry slam festivals, the founders of central youth spoken word organizations, and a selection of young people who have participated in their local programs and in regional and national events over the last two decades. Narratives about individual and communal efforts and experiences are supported by analyses of full-text poems by youth poets and by reference to contemporary scholarship in performance studies, critical youth studies, and new literacy studies. Blending history and theory with practical descriptions of how spoken word poetry is taught and how to produce spoken word events, the book will appeal to researchers, teacher educators, and K-12 teachers.

*Beyond Sputnik* Homer Alfred Neal, Tobin Smith, Jen McCormick, 2010-09-22 Science and technology are responsible for almost every advance in our modern quality of life. Yet science isn't just about laboratories, telescopes and particle accelerators. Public policy exerts a huge impact on how the scientific community conducts its work. *Beyond Sputnik* is a comprehensive survey of the field for use as an introductory textbook in courses and a reference guide for legislators, scientists, journalists, and advocates seeking to understand the science policy-making process. Detailed case studies---on topics from cloning and stem cell research to homeland security and science education---offer readers the opportunity to study real instances of policymaking at work. Authors and experts Homer A. Neal, Tobin L. Smith, and Jennifer B. McCormick propose practical ways to implement sound public policy in science and technology and highlight how these policies will guide the results of scientific discovery for years to come. Homer A. Neal is the Samuel A. Goudsmit Distinguished University Professor of Physics, Interim President Emeritus, and Vice President for Research Emeritus at the University of Michigan, and is a former member of the U.S. National Science Board. Tobin L. Smith is Associate Vice President for Federal Relations at the Association of American Universities. He was formerly Assistant Director of the University of Michigan and MIT Washington, DC, offices. Jennifer B. McCormick is an Assistant Professor of Biomedical Ethics in the Division of General Internal Medicine at the Mayo College of Medicine in Rochester, Minnesota, and is the Associate Director of the Research Ethics Resource, part of the Mayo Clinic's NIH Clinical Translational Science Award research programs. GO BEYOND SPUTNIK ONLINE--Visit [www.science-policy.net](http://www.science-policy.net) for the latest news, teaching resources, learning guides, and internship opportunities in the 21st-Century field of science policy. *Beyond Sputnik* is a readable, concise, yet remarkably comprehensive introduction to contemporary science policy. It is devoid of 'wonkishness' yet serves the needs of policymakers and students alike. Because science and technology policy is of central importance in the twenty-first century this accessible volume is a godsend. ---Charles M. Vest, President of the National Academy of Engineering and Vice Chair of the National Research Council of the National Academies of Sciences and Engineering This highly researched book is a treasure trove for anyone concerned with science policy relating to such challenges as providing energy, preserving the environment, assuring healthcare, creating jobs, and more. ---Norman Augustine, retired Chairman and CEO of Lockheed Martin Corporation and recipient of the 2008 Vannevar Bush Award from the National Science Board Science policy is a subject of growing importance in the United States, yet there has long been a vacuum among textbooks in the field. *Beyond Sputnik* fills it splendidly and will be greeted with enthusiasm by students and faculty alike. Even those who have practiced the art for years will learn from it. ---Albert Teich, Director of Science and Policy Programs at the American Association for the Advancement of Science Homer A. Neal, Tobin L. Smith, and Jennifer B. McCormick have written a landmark work calling for a national effort to restore our nation's power in the fields of science, energy, and education, as we did in the remarkable year following Sputnik. The next president should read *Beyond Sputnik* and accept this call to action as did President Eisenhower. ---Ambassador David M. Abshire, President of the Center for the Study of the Presidency, Cofounder and Vice Chairman of the Center for Strategic and International Studies, and President of the Richard Lounsbery Foundation At last we have a text that tells the story from where A. Hunter Dupree left off; an excellent core text for courses

in science and technology policy, DC policymakers, and anyone who needs to get up to speed in the field . . . The book that we have all been waiting for. ---Christopher T. Hill, Professor of Public Policy and Technology, George Mason University

*Directory of Web Sites* Graham Bennett, 1999 Overloaded with the mass of information on the Internet? Frustrated by how difficult it is to find what you really want? Now you don't need to spend hours browsing around the Internet or grappling with the huge number of hits from an Internet search engine: the Directory of Web Sites will take you straight to the best educational sites on the Internet. From archaeology to zoology, from dance to technology, the Directory provides information more than 5,500 carefully selected Web sites that represent the best of what the Internet has to offer. The sites are grouped by subject; each one features a full description; and the text is complemented throughout by screenshots and fact boxes. As well, sites have been selected purely on educational merit: all sites with overtly commercial content and influence from Internet providers have been excluded.
