Blindsight Peter Watts,2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Al Qaeda's Global Crisis V. G. Julie Rajan,2015-01-30 This book focuses on the crises facing Al Qaeda and how the mass killing of Muslims is challenging its credibility as a leader among Islamist jihadist organizations. The book argues that these crises are directly related to Al Qaeda's affiliation with the extreme violence employed against Muslims in Iraq, Syria, Afghanistan and Pakistan in the decade since 9/11. Al Qaeda's public and private responses to this violence differ greatly. While in public Al Qaeda has justified those attacks declaring that, for the establishment of a state of 'true believers', they are a necessary evil, in private Al Qaeda has been advising its local affiliates to refrain from killing Muslims. To better understand the crises facing Al Qaeda, the book explores the development of Central Al Qaeda's complex relationship with radical (mis)appropriations and manifestations of takfir, which allows one Muslim to declare another an unbeliever, and its unique relationship with each of its affiliates in Iraq, Syria, Afghanistan and Pakistan. The author then goes on to consider how the prominence of takfir is contributing to the deteriorating security in those countries and how this is affecting Al Qaeda's credibility as an Islamist terror organization. The book concludes by considering the long-term viability of Al Qaeda and how its demise could allow the rise of the even more radical,

violent Islamic State and the implications this has for the future security of the Middle East, North Africa and Central/South Asia. This book will be of much interest to students of political violence and terrorism, Islamism, global security and IR.

Midwestern Native Shrubs and Trees Charlotte Adelman, Bernard L. Schwartz, 2017-03-30 In this companion volume to the bestselling *The Midwestern Native Garden: Native Alternatives to Nonnative Flowers and Plants*, Charlotte Adelman and Bernard L. Schwartz offer another indispensable guide to replacing nonnative plants with native alternatives. This time, their subject is the native woody species that are the backbone of our gardens and landscapes. Among other ecological benefits, native shrubs and trees provide birds and butterflies with vital food and reproductive sites that nonnative species cannot offer. And they tend to be hardier and easier to maintain. The authors provide a comprehensive selection of native woody alternatives that, season by season, provide effects similar to those of nonnative shrubs and trees used for ornamental purposes and shade. These plants are suitable for all garden styles, provide blooms and fall color, and have the same cultivation requirements as their nonnative counterparts. Nature notes alert readers to the native species' unique ecological roles. Unlike other gardening guides, *Midwestern Native Shrubs and Trees* goes beyond mere suggestion to provide gardeners with the tools they need to make informed, thoughtful choices. Knowing which native species to plant for desired effects empowers landscapers and gardeners to take on a greater role in protecting our midwestern environment.

Sex, Gender and Social Change in Britain since 1880 Lesley A. Hall, 2017-09-16 Sexual attitudes and behaviour have changed radically in Britain between the Victorian era and the twenty-first century. However, Lesley A. Hall reveals how slow and halting the processes of change have been, and how many continuities have persisted under a façade of modernity. Thoroughly revised, updated and expanded, the second edition of this established text: • explores a wide range of relevant topics including marriage, homosexuality, commercial sex, media representations, censorship, sexually transmitted diseases and sex education • features an entirely new last chapter which brings the narrative right up to the present day • provides fresh insights by bringing together further original research and recent scholarship in the area. Lively and authoritative, this is an essential volume for anyone studying the history of sexual culture in Britain during a period of rapid social change.

Terrorism, Ticking Time-Bombs, and Torture Fritz Allhoff, 2012-07-24 A provocative philosophical investigation into the ethics of torture, The War on Terror, and making tough choices in exceptional circumstances. The general consensus among philosophers is that the use of torture is never justified. In *Terrorism, Ticking Time-Bombs, and Torture*, Fritz Allhoff demonstrates the weakness of the case against torture; while allowing that torture constitutes a moral wrong, he nevertheless argues that, in exceptional cases, it represents the lesser of two evils. Allhoff does not take this position

lightly. He begins by examining the way terrorism challenges traditional norms, discussing the morality of various practices of torture, and critically exploring the infamous ticking time-bomb scenario. After carefully considering these issues from a purely philosophical perspective, he turns to the empirical ramifications of his arguments, addressing criticisms of torture and analyzing the impact its adoption could have on democracy, institutional structures, and foreign policy. The crucial questions of how to justly authorize torture and how to set limits on its use make up the final section of this timely, provocative, and carefully argued book.

A Debate to Remember Chaitanya Ravi, 2018-04-19 The US–India nuclear deal, popularly known as the 123 Agreement, announced by George W. Bush and Manmohan Singh on 18 July 2005, was a defining moment in the relationship of the two countries, as also India's relationship with the non-proliferation regime. The Bush administration's implied recognition of India's nuclear weapons, and its abrupt reversal of three decades of sanctions to restore Indian access to nuclear fuel, reactors, and dual-use technologies despite being a non-proliferation treaty non-signatory, led to contentious debates in both India and the USA. *A Debate to Remember* emphasizes the multifaceted debate in India over the nuclear deal using concepts from science and technology studies. It focuses on the intense contestation over the civil-military mix of India's separation plan, the competition between the Iran–Pakistan–India pipeline and the nuclear deal, the role of retired nuclear scientists, and the issue of liability that has stalled the full implementation of the nuclear deal. The impact of domestic factors on issues ranging from the civil-military status of breeder reactors to the Indian insistence on no restriction on future nuclear testing in the 123 Agreement is also revealed in this book.

Ticking Craig Vann, 2018-10-10 Skypilot Sewell loves the past. It's no surprise then, that when his brilliant inventress aunt Beatrice provides him with the opportunity to time travel, Sky is immediately on board. His best friend Zac will take a little more convincing... So begins the young men's journey through time, space, and 18th century England—where, separated from each other immediately, they meet a host of fascinating characters. Among them are people of fancy and fact, including the charming and roguish highwayman Jacques DuTemps, the beautiful Lady Rachel, and Brummbär the famous bear, as well as history's own Henry Cavendish, the celebrated scientist and natural philosopher, and John Fielding, the 'Blind Beak' of London and founder of Britain's first police force. The pair has 39 days to find each other and enjoy what history has to offer without being found out... or hanged for witchcraft. Will Sky and Zac have the wits to survive the 1700s? Can Sky really leave Helena to the history books? And how to explain their Nikes?

Reminiscences of Los Alamos 1943–1945 Lawrence Badash, J.O. Hirschfelder, H.P. Broida, 2012-12-06 Although the World War II efforts to

develop nuclear weapons have inspired a very large literature, it struck us as noteworthy that virtually nothing existed in the form of firsthand accounts. Now It Can Be Told, by General Leslie Groves, the Manhattan Project's military commander, is probably the most prominent exception, but the scientists themselves seem to have shown little interest in publishing their reminiscences. Believing that it would be not only worthwhile for posterity, but extremely interesting for the present generation to hear about the aspirations, fears, and activities of those who participated in this watershed of science and government collaboration, we arranged the public lecture series represented by this book. We chose to focus upon Los Alamos since the project's efforts culminated there. The isolated laboratory in New Mexico was created to design and construct the first atomic bombs. More scientific brainpower was accumulated there than at any time since Isaac Newton dined alone, and the interactions with this community are of sociological interest, as the results of their work are of political import.

Reconstructing Post-Saddam Iraq Sultan Barakat, 2007-08-16 Previously published as a special issue of Third World Quarterly, this volume seeks to analyze to what extent the controversial US policy of democratizing the Middle East with pre-emptive invasions was justified or effective. Post 9/11 the US developed a policy of War on Terror, taking the decision to democratize the Middle East with pre-emptive invasions in both Afghanistan and Iraq. As Barakat puts it Iraq was deliberately de-constructed in order to be reconstructed in a new model. Looking not only at the evidence of democracy post-invasion, the author also considers the global, regional and internal politics leading up to the decision to invade. The effect is an insightful and vital volume that fulfils an urgent need and seeks to answer the questions most troubling the international community since the invasion of Iraq. Were the invasion of Iraq and Afghanistan an exploitation of military supremacy to secure a favourable balance of power for the US? Is it possible to build a stable democracy after a pre-emptive invasion? What is the current outlook for a stable democracy in Iraq? Reconstructing Post-Saddam Iraq is vital reading for all those interested in international politics and the future in Iraq.

Divorce Busting Michele Weiner Davis, 1993-02 A step-by-step approach to making your marriage loving again.

Ticking 4 Craig Vann, 2022-09-09 This is the fourth novel in the Ticking time travel series. While this adventure can be read as a standalone piece, the author recommends that the reader first read Ticking: The Hawking Sequence which provides the background for this story. Following that logic, you may want to read the other two as well to get you ticking along at the right speed. Skypilot Sewell and Zachary Burling are chrononauts; that is, time travellers. They became chrononauts because Sky's aunt and renowned theoretical physicist, Beatrice Westover, needed some adventurous persons to

travel through space and time. You see, Beatrice invented time travel. As far as we know, that is. She is the inventor, or founder if you prefer, as time travel has always been possible, through a proven effect called time dilation. It appears, though, that others have mastered the process. These others do not necessarily live in our dimension. The chrononauts made a discovery of their own, accidentally travelling into another dimension in their second adventure. They had planned to travel to ancient Galilee to find Jesus Christ but found themselves instead in a bizarre place called Southumbria. This story is based there. It is a place like no other on Earth. Mostly because it is not on Earth; at least not the planet as we know it. With flying machines, gadgets, and a few gizmos, all in what some might refer to as a steampunk world. A steampunk world has a very visual quality. It resembles our world in the late 1800's, with a whirring steampunk vibe. This vibe includes the ticking of clocks, the clicking of gears, the sheen of burnished metal, the softness of velvet, and steamy goggles everywhere. Many of these devices were steam powered; like the ornithopter, a bird-like contraption that seemed to defy conventional physics. Indeed, Southumbria may not be subject to the laws of physics that we are accustomed to. Southumbrian time, on the contrary, seems to tick right along in the conventional way, into the future. Unless you are a chrononaut.

The United States, International Law, and the Struggle against Terrorism

Thomas McDonnell, 2009-10-22 This book discusses the critical legal issues raised by the US responses to the terrorist threat, analyzing the actions taken by the Bush administration during the so-called War on Terrorism and their compliance with international law. Thomas McDonnell highlights specific topics of legal interest including torture, extra-judicial detentions and the invasions of Afghanistan and Iraq, and examines them against the backdrop of terrorist movements which have plagued Britain and Russia. The book extrapolates from the actions of the USA, going on to look at the difficulties all modern democracies face in trying to combat international terrorism. This book demonstrates why current counter-terrorism practices and policies should be rejected, and new policies adopted that are compatible with international law. Written for students of law, academics and policy-makers, the volume demonstrates the dangers that breaking international law carries in the War on Terrorism.

From Crisis to Peace Supreme Master Ching Hai, 2010 At conferences, in interviews with journalists and at gatherings with disciples in recent years, Supreme Master Ching Hai has spoken with increasing urgency about Earth's current climate crisis. As she states, "Our planet is a house that is burning. If we don't work together with a united spirit to put out the fire, we will not have a home anymore". But she also offers humankind an uplifting solution, one that every individual can easily achieve: "Be veg to save the planet."
