Business-to-Business Mario Glowik,Sarah Maria Bruhs,2014-06-05 Contemporary business-to-business (B2B) industries consist of networks of customers, competitors and other stakeholders. Firms which manage their relationships with these important stakeholders are more likely to enjoy a sustained competitive advantage in the international business environment. This book is the first to provide a comprehensive overview of the field from a broad and accessible perspective. The authors bring an authoritative, scholarly understanding to the subject, taking readers through the entire process of creating, developing and maintaining B2B networks. Case studies illustrating each chapter include: Apple, Panasonic, Johnson & Johnson, Epson and Samsung. In providing a single and explicit established academic framework for understanding business networks in a global setting, this book is vital reading for students and researchers involved with international management, international marketing and strategic management.

Navigating Prosperity and Security in East Asia Shiro Armstrong,Tom Westland,Adam Triggs,2023-05-18 The world's two largest economies, the United States and China, are locked in a trade war, complicating policy choices internationally. These choices are sharper for the countries of East and Southeast Asia than they are elsewhere, because the multilateral rules-based economic order on which East Asian economic integration and cooperation is built is under threat. Economic policy has never been separate from security considerations. For decades, the national security risks inherent in economic exchange have been mitigated under a US-led system that allowed the strengthening of economic ties, including between China and the rest of the world. But economics and security are increasingly entangled in a way that is damaging to both, creating a dangerous trade-off. Now, as global uncertainties grow, the risks of international exchange—rather than its benefits—are beginning to dominate the calculus for some policymakers. Against this backdrop, how can Southeast Asian countries and US allies in Asia balance their security interests and their economic interests? And how can these countries, individually and collectively, broaden their policy options and deepen economic integration? This volume investigates the domestic and international dimensions of these questions.

International Cases of Corporate Governance Jean Jinghan Chen,2022-09-14 This book provides insights into current issues in corporate governance by examining twelve cases from the 2010s and 2020s where corporate governance was seen to be an issue. The cases are designed to introduce the reader to 'real life' episodes with corporate governance implications, shedding light on why corporate scandals continue to occur, to what extent these are a corporate governance failure, and in which ways corporate governance – and the behaviour of those involved in ensuring good governance and an ethical culture in their business - may be improved in the future. This book will be of interest to businesspeople, students of business, and lawyers and motivate discussion on the reasons why corporate governance failed, or was seen to be inadequate.

Market Entry Strategies Mario Glowik,2010-10-01 The first part of the book introduces relevant theories of internationalization. In addition to traditional concepts of internationalization (e.g., the product life-cycle approach of Vernon, the Uppsala model, and Porter's diamond approach), particular attention is paid to the more modern network approaches of internationalization (e.g., systems, new venture/born global, and entrepreneur concepts). In the second part, alternatives for international market entry (e.g., exports, franchising, joint ventures, contract manufacturing, and foreign direct investments) are explained. These market entry modes are categorized according to decision determinants, such as hierarchical control, proximity to the market, risk of investment, and the factor of time, which are important from the point of view of the corporate management

involved in international business. The empirical part of this publication, which is the result of a longitudinal study, consists of case studies of Asian firms doing business in the consumer electronics industry. The cases of Samsung, Sony, Sharp, Matsushita (Panasonic), LG Electronics, and TCL China provide fundamental insights into the firms' organizational structures, corporate cultures, respective sales volume, and earnings performance as well as strategic concepts for their market penetration in Europe. A main emphasis is placed on an understanding of internal firm networks (e.g., diversified business fields and vertical production depth) and external firm networks (e.g., joint ventures, supplier and buyer clusters as well as mutual capital interests). From the author's view, these network grids fundamentally contribute to the fact that Asian firms have more successfully positioned themselves in the market within the last two decades compared to their European competitors in the television set industry (e.g. Grundig, Thomson, or Philips). The networking aims and success factors as well as the changing strategic influence over the years of the partner firms both in bilateral Japanese joint ventures and in European-Asian joint ventures are examined. The book provides complex background information about the development of the European television set market. The analysis demonstrates that firms holding the position of technological market leaders in their segment simultaneously indicate the most intensive network activities. The further development of the network theory and the detailed and up-to-date case studies of the most important Asian enterprises in the consumer electronics industry contribute to the value of this publication. Furthermore, on the basis of the knowledge gained from this study, chances and risk potentials can be derived for other European industries (e.g., automotive). The book, written in English, is suitable for internationally oriented bachelor's, master's and MBA programs. Additionally, against the background of worldwide competition, the publication at hand offers relevant industry insights for interested political and economic decision makers.

Corporate Social Responsibility & International Development Claudia Bara, 2010-01-12 Inhaltsangabe: Introduction: Global changes of the worldwide economy and free markets offer many business opportunities and advantages for multinational corporations (MNC), but also a lot of social challenges and ecological threats. In the last decades many scandals hit various industries for different casualties, for instance the oil industry for several oil spills, the mining industry for collaboration with corrupt governments and exposing workers to unsafe labor conditions, the clothing industry for exploiting employees or using child labor in sweatshops, the toy industry and other industries for importing tainted and unsecure products from China. As corporations have reaped the benefits of globalization and international trade, they are now, more than ever, demanded to take responsibility for the consequences resulting from their business activities. Due to the risk of a damaged reputation, losing consumers and hence decreasing profits and as a result of public criticism, more and more corporations are pushed to change their business strategy in a way that fosters sustainable development. As the business world becomes smaller and more transparent, an increasing number of corporations are embracing Corporate Social Responsibility (CSR) to demonstrate their stewardship. CSR is a concept that demands corporations to address the economic, social and environmental impacts of their global operations while generating profits. The idea of CSR has become a concept that is growing in its importance and it is not only endorsed by corporations and organizations but also by individual consumer and governments. Henry Ford quoted once If there is any one secret of success, it lies in the ability to get the other person's point of view and see things from that person's angle as well as from your own. This statement shows that companies striving to be economically successful are also demanded to consider the interests of all its multiple stakeholders. As corporations are gaining an increasing power and have an enormous impact on the society in industrialized and developing countries, they are expected to respond to the societal demands and ecological concerns of all those who are affected by a company's business practices. The aim of this paper is to give a detailed overview of CSR with all its components and its implementation process into the overall business strategy. It analyzes the role corporations play or should play in fostering sustainable [...]

Nanotechnology World Economy James A. Harris (Sr.), 2009 The cornerstone and linch-pin of the assessment of Chapter One manifest itself in the (i) galvanization of numerous inventions, innovations, discoveries and

huge production of nanotechnology and nanometer-scale practical applications of nanodevices, nanostructures, nanosystems, and global management of nanotech industries, growth and its maximization of global competitive advantage, and the (ii) conglomeration of nanometer-scale technologies driven multinational enterprises, cross border transactions, strategic alliances, high degree of concentration, and global management in contrast to the global economic crisis, threats, and challenges. Chapter Two gives prominence to the Japanese mega-industrial concentration directions in nanotechnology global industries, investment, growth and diversification underwritten in combination and centralization of huge sources of financing and loanable funds made available by joint Japan-China use of massive reserves of government-owned. The distinguishing feature of Chapter Three is the global competitive advantage market dominance generated by the creation, discoveries and innovation of Japan/China nanotechnology and practical applications of nanometer-scale technologies revolution high degree of concentration that contrast to and surpass competitiveness embedded in the strong bilateral U.S. and China Strategic and Economic Dialogue, and the U.S./Japan Investment Initiative. The Japan/China nanotechnology multinational enterprises high degree concentration are engaged in the widespread use of nanotechnologies groundbreaking transformation to creative and innovative nanodevices and nanostructures leading to the global competitive advantage, where size is measured on a scale of 1 to 100 nanometers (nm); one nanometer is equal to one billionth of a meter or 1000 times smaller than the diameter of a human hair. The underutilization of practical applications of nanotechnologies is evident in Chapter Four where the distinguishing feature is the global demand for Africa and the Middle East Area (The Area) huge mineral resources and production exceed the Area's supply technical capabilities. Chapter Five assesses additional revenue sources and investment for financing health care for the uninsured through establishment of commercialization and transformation of patents and licensing agreements of U.S. hospital inventions and discoveries under the U.S. Department of Defense Military Health System (DoD MHS), with practical applications of nanotechnology advantages.
