Touch Typing in 10 Hours Gerard Strong,2015-10-13 With this book you can learn to touch type and 10 hours at a fraction of the cost of the course. Most people use computers today, but how many of us can type? Learning to touch type with this method takes only 10 hours. You will reap the benefits for a lifetime, whether you are using a keyboard at work or at home. The easy-to-use lessons are provided into manageable one-hour blocks and there are plenty of exercises to consolidate what you have learned. And touch-typing is a skill that can make you money as well as saving you time.

Touch Typing in Ten Lessons Ruth Ben'Ar,1982 Do you need to learn how to type in a hurry? Or do you just need a refresher course to practice with and tune up your skills? This is the shortest typing course that covers all of the fundamental skills of touch typing. This classic handbook, which has literally taught more than a million people the basics of typing, can teach you to type too. Touch Typing in 10 Lessons starts by teaching you the basic combinations for fingering the keyboard, and then helps you master the entire alphabet. Once you've learned the alphabet, the book jumps right into capitals, punctuation, and numbers. Learning the keyboard is just the beginning. The book will teach you how to set up professional business letters and tricks to help you get the most out of your typewriter (or word processor). There are dozens of drills that will help you develop the accuracy and speed you need in school and at the office. Finally, there are practice tests that will help you get over fears concerning typing tests and that will build up your speed on the keyboard. Book jacket.

Assistive Technology from Adapted Equipment to Inclusive Environments Pier Luigi Emiliani,L. Burzagli,2009 The concept of assistive technology is moving away from adopting the most appropriate devices to overcome the limitations of users, to the designing and setting up of total environments in which people can live, supported by suitable services and additional support devices integrated within the environment. These two perspectives are deeply intertwined, both from technological and social points of view, and the relationship between them currently represent the primary challenge for the field of assistive technology. This publication covers the proceedings of the 10th European Conference of the Association for the Advancement of Assistive Technology in Europe (AAATE), the organization which stimulates the advancement of assistive technology for the benefit of people with disabilities, including elderly people. This conference seeks to bridge the gap between these two complementary approaches, providing an opportunity to clarify differences and common points and to better define future direction. This publication is a significant contribution to the advancement of inclusion for people living with a disability everywhere.

Making the Library Accessible for All Jane Vincent, 2024-04-02 Libraries have an ethical, and usually a legal, obligation to make their services

accessible to disabled patrons and employees. Making the Library Accessible for All is a single-source guide that librarians can refer to when planning, remediating, or evaluating accessibility. With a unique holistic approach, it emphasizes the perception of people with disabilities as partners in meeting a common goal rather than as a population to be “served.” Topics addressed and updated in this second edition include: Multiple interviews with librarians and other experts in the field about proven accessibility strategies for libraries, personal experiences, and cutting-edge innovations; Innovations in providing assistive digital technology, many of which are free or built into common programs; An overview of changes coming to accessibility guidelines for digital content; Up-to-date information on legislation that may affect some or all libraries; An evaluation of how the COVID pandemic has changed both library services and patron needs
