SCM Core Text Christian Doctrine Mike Higon,2013-01-25 The SCM Core Text: Christian Doctrine offers an up-to-date, accessible introduction to one of the core subjects of theology. Written for second and third-year university students, it shows that Christian Doctrine is not a series of impossible claims to be clung to with blind faith. Mike Higon argues that it is, rather, a set of claims that emerge in the midst of Christian life, as Christian communities try to make enough sense of their lives and of their world to allow them to carry on. Christian communities have made sense of their own life, and the life of the wider world in which they are set, as life created by God to share in God's own life. They have seen themselves and their world as laid hold of God's life in Jesus of Nazareth, and as having the Spirit of God's own life actively at work within them. This book explores these and other central Christian doctrines, and in each case, shows how the doctrine makes sense, and how it is woven into Christian life. It will help readers to see what sense it might make to say the things that Christian doctrine says, and how that doctrine might affect the way that one looks at everything: the natural world, gossip, culture, speaking in tongues, politics, dieting, human freedom, love, High Noon, justice, computers, racism, the novels of Jane Austin, parenthood, death and fashion.

Crimes Against Nature Donald R. Liddick,2011-02-18 This comprehensive analysis of garbage trafficking, wildlife trafficking, illegal fishing, and illegal logging highlights the difficulty in balancing human interests and environmental responsibility. The alarming consequences of eco-crime go far beyond the widespread degradation of the natural world; important societal institutions are undermined and negative social and economic impacts also result from garbage trafficking, wildlife trafficking, illegal fishing, and illegal logging. In order to successfully combat these problems, a consistent, international response will be necessary. Crimes Against Nature: Illegal Industries and the Global Environment addresses an important topic that is largely unknown and rarely documented other than in reports published by environmental NGOs and a limited number of academic articles and journalistic accounts. A comprehensive and up-to-date description of each illicit industry is provided, emphasizing the damages caused, the transnational nature of these activities, the roles played by organized crime and public and private elites, and the range of possible solutions. The author addresses the complexity of balancing human concerns with environmental interests and concludes with information regarding promising recent developments.

Seventy-Seven Museum Gems Jan Young,2016-10-05 There are thousands of museums in the USA, almost all of interest and almost all a source of learning but, after a while, they tend to blur together. How many stuffed buffalo are enough? How many re-created country stores? How many gun collections? This book lists and describes seventy-seven American museums (including a few non-museum attractions) that definitely stand out due to their uniqueness and the depth to which they document their subject. Many are small and only lightly promoted, some are in out-of-the-way places, some are quirky or even odd, but all are memorable and well worth a visit.

Pushing the Limits Carl P Lavo,2013-12-15 Vice Admiral Allan Rockwell McCann left no reminiscences that might reveal a deeper sense of his extraordinary service, but naval historian Carl LaVO has filled that void by writing this revealing—and often inspiring—biography. Among McCann's many accomplishments: Served as liaison

officer for the modification of the antiquated 0-12 submarine into the privately-leased Nautilus that made the first attempt to sail beneath the Arctic ice shelf in 1931; pioneered the McCann Submarine Rescue Chamber; directed fire from the sub tender Pelias at Japanese aircraft attacking Pearl Harbor; commanded the battleship Iowa during the Battle of Leyte Gulf; was Chief of Staff of the Navy’s 10th Fleet that stymied a last ditch effort to attack North America via U-boats; headed the Navy task force that transported President Truman to the Potsdam conference; and as ComSubPac was aboard the first submarine to navigate under the polar ice in 1947. This book is an overdue appreciation of a significant admiral who has been all but ignored in naval history.

The role of CITES in the governance of transnational timber trade Rosalind Reeve,2015-07-15 This scoping paper analyzes the governance of trade in timber-producing species regulated by CITES (the Convention on International Trade in Endangered Species of Wild Fauna and Flora) in light of the Convention’s increasing relevance as a tool to control transnational timber trade. The CITES regulatory framework is outlined as it relates to tree species, along with the compliance mechanisms developed to build range state capacity for implementing trade controls in relation to tropical timber species and to apply sanctions to countries that fail to take recommended action to resolve implementation problems. The study describes stricter domestic measures developed by consumer countries, most notably the EU, to control imports of CITES-listed species, including trees, as well as additional regulatory frameworks designed by importing countries to exclude illegal timber from their markets. It also examines the implications for CITES of regional economic integration given the Convention’s dependence on national border controls, with a focus on experience in the EU and trends in Asia. Key findings from three case studies of how CITES has approached governance of trade in valuable timber-producing species – ramin (Gonystylus spp.) from Asia, afrormosia (Pericopsis elata) from Central and West Africa and bigleaf mahogany (Swietenia macrophylla) from Latin America – are presented and other potential case studies identified. The study concludes by identifying priority areas where further research could contribute towards catalyzing positive change to strengthen the governance of transnational timber trade, and ultimately towards the survival of tree species traded illegally and unsustainably.
