**Blindsight** Peter Watts, 2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight*. Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray

they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

*Fester Hadar Aviram, Chad Goerzen, 2024* The COVID-19 disaster in California's prisons stands out as the worst medical prison catastrophe in the state's history. Three-quarters of the state's prison population was infected; 264 incarcerated people and 50 staff members died. In *Fester*, authors Hadar Aviram and Chad Goerzen expose the COVID-19 correctional experience through hundreds of first-person accounts, months of courtroom observations, years of carefully collected quantitative COVID-19 data, and a wealth of policy documents. Already vulnerable from decades of overcrowding and abysmal healthcare, California's prison population bore the brunt of the COVID-19 horror. *Fester* bears witness to the immense suffering we bring on ourselves and our fellow humans through dehumanization, fear, and ignorance, and stands as a monument for a brave coalition of incarcerated and formerly incarcerated people, family members and loved ones, advocates and activists, doctors and journalists, who worked to shed light on one of the darkest times in the Golden State's correctional system--

**Low-Power Electronics Design** Christian Piguet, 2018-10-03 The power consumption of integrated circuits is one of the most problematic considerations affecting the design of high-performance chips and portable devices. The study

of power-saving design methodologies now must also include subjects such as systems on chips, embedded software, and the future of microelectronics. *Low-Power Electronics Design* covers all major aspects of low-power design of ICs in deep submicron technologies and addresses emerging topics related to future design. This volume explores, in individual chapters written by expert authors, the many low-power techniques born during the past decade. It also discusses the many different domains and disciplines that impact power consumption, including processors, complex circuits, software, CAD tools, and energy sources and management. The authors delve into what many specialists predict about the future by presenting techniques that are promising but are not yet reality. They investigate nanotechnologies, optical circuits, ad hoc networks, e-textiles, as well as human powered sources of energy. *Low-Power Electronics Design* delivers a complete picture of today's methods for reducing power, and also illustrates the advances in chip design that may be commonplace 10 or 15 years from now.

*Sheikhs Batmobile* Richard Poplak, 2009-03-24 What happens to our pop culture when it meets another culture head-on—especially one that according to some is completely at odds with our own? In *The Sheikh's Batmobile*, pop-cultural commentator Richard Poplak sets out on an unusual two-year odyssey. His mission is to see what becomes of his, and North America's, obsessions—pop songs and sitcoms, Hollywood movies and shoot-em-up video games, muscle cars and punk music—when they make

their way into the Muslim world. Over the course of his journey, Poplak is body slammed by WWE fans in Afghanistan, hangs out with hip-hop artists in Palestine, head bangs to heavy metal in Cairo, discovers a world of extreme makeovers in Beirut, bowls with the chief of police in small-town Kazakhstan, and encounters a mysterious Texan building rocket-propelled batmobiles for a clientele of sheikhs. With uproarious humour and keen cultural insight, Poplak asks some vital questions: How is American pop culture consumed and reinterpreted in the Islamic world? What does that say about how we are viewed by young Muslims? And can Homer Simpson bridge the differences that are tearing our world apart?

**Dysfunction** Dennis McConaghy, 2017-01-21 #1  
Calgary Herald Bestseller An investigation of the history and demise of the most controversial North American energy infrastructure project. In 2015, President Barack Obama denied approval for TransCanada's Keystone XL pipeline, which would have carried crude oil from the Canadian oil sands to the U.S. Gulf Coast, providing great economic benefit to Canada. Over seven years of regulatory process, environmental activism, and media attention, the project had become infamous, a cause célèbre for North America's ENGO movement and a test of Obama's bona fides in the face of global climate change risk. As one of TransCanada's senior executive group, Dennis McConaghy provides an insider's perspective of Keystone XL's history and demise. How did this routine infrastructure acquire iconic status? Why couldn't government and industry find some

accommodation to salvage the project? And most importantly, what must Canada learn from Keystone XL's demise? Can the country find common ground between economic value and credible carbon policy?

Default Gregory Makoff, 2024-02-01 The dramatic inside story of the most important case in the history of sovereign debt law Unlike individuals or corporations that become insolvent, nations do not have access to bankruptcy protection from their creditors. When a country defaults on its debt, the international financial system is ill equipped to manage the crisis. Decisions by key individuals—from national leaders to those at the International Monetary Fund, from holdout creditors to judges—determine the fate of an entire national economy. A prime example is Argentina's 2001 default on \$100 billion in bonds, which stands out for its messy outcomes and outsized impact on sovereign debt markets, sovereign debt law, and IMF policy. Default is the riveting story of Argentina's sovereign debt drama, which reveals the obscure inner workings of sovereign debt restructuring. This detailed case study describes the intense fight over the role of the IMF in Argentina's 2005 debt restructuring and the ensuing bitter decade of litigation with holdout creditors, demonstrating that outcomes for sovereign debt are determined by a complex interplay between financial markets, governments, the IMF, the press, and the courts. This cautionary tale lays bare the institutional, political, and legal pressures that come into play when a country cannot repay its debts. It offers a deeper understanding of how global financial

capitalism functions for those who work in or study debt markets, international finance, international relations, and international law.
