Lady Gaga and Popular Music Martin Iddon,Melanie L. Marshall,2014-01-03 This book is a multi-faceted, interdisciplinary examination of the music and figure of Lady Gaga, combining approaches from scholars in cultural studies, art, fashion, and music. It represents one of the first scholarly volumes devoted to Lady Gaga, who has become, over a few short years, central to both popular (and, indeed, populist) as well as more scholarly thought in these areas and who, the contributors argue, is helping to shape—directly and indirectly—thought and culture both in the fields of the scholarly and the everyday. Lady Gaga's output is firmly embedded in a self-consciously intellectual pop culture tradition, and her music videos are intertextually linked to icons of pop culture intelligentsia like Alfred Hitchcock and open to multiple interpretations. In examining her music and figure, this volume contributes both to debates on the status of intertextuality, held in tension with originality, and to debates on the figuring of the sexualized female body, and representations of disability. There is interest in these issues from a wide range of disciplines: popular musicology, film studies, queer studies, women's studies, gender studies, disability studies, popular culture studies, and the burgeoning sub-discipline of aesthetics and philosophy of fashion.

The 2030 Spike Colin Mason,2013-06-17 The clock is relentlessly ticking! Our world teeters on a knife-edge between a peaceful and prosperous future for all, and a dark winter of death and destruction that threatens to smother the light of civilization. Within 30 years, in the 2030 decade, six powerful 'drivers' will converge with unprecedented force in a statistical spike that could tear humanity apart and plunge the world into a new Dark Age. Depleted fuel supplies, massive population growth, poverty, global climate change, famine, growing water shortages and international lawlessness are on a crash course with potentially catastrophic consequences. In the face of both doomsaying and denial over the state of our world, Colin Mason cuts through the rhetoric and reams of conflicting data to muster the evidence to illustrate a broad picture of the world as it is, and our possible futures. Ultimately his message is clear; we must act decisively, collectively and immediately to alter the trajectory of humanity away from catastrophe. Offering over 100 priorities for immediate action, The 2030 Spike serves as a guidebook for humanity through the treacherous minefields and wastelands ahead to a bright, peaceful and prosperous future in which all humans have the opportunity to thrive and build a better civilization. This book is powerful and essential reading for all people concerned with the future of humanity and planet earth.

Proofiness Charles Seife,2010-09-23 The bestselling author of Zero shows how mathematical misinformation pervades-and shapes-our daily lives. According to MSNBC, having a child makes you stupid. You actually lose IQ points. Good Morning America has announced that natural blondes will be extinct within two hundred years. Pundits estimated that there were more than a million demonstrators at a tea party rally in Washington, D.C., even though roughly sixty thousand were there. Numbers

have peculiar powers-they can disarm skeptics, befuddle journalists, and hoodwink the public into believing almost anything. Proofiness, as Charles Seife explains in this eye-opening book, is the art of using pure mathematics for impure ends, and he reminds readers that bad mathematics has a dark side. It is used to bring down beloved government officials and to appoint undeserving ones (both Democratic and Republican), to convict the innocent and acquit the guilty, to ruin our economy, and to fix the outcomes of future elections. This penetrating look at the intersection of math and society will appeal to readers of Freakonomics and the books of Malcolm Gladwell.

15 Minutes L. Douglas Keeney, 2011-02-01 Packed with startling revelations, this inside look at the secret side of the Cold War exposes just how close America came to total annihilation During the Cold War, a flight crew had 15 minutes to get their nuke-laden plane in the air from the moment Soviet bombers were detected—15 minutes between the earliest warning of an incoming nuclear strike and the first flash of an enemy warhead. This is the chilling true story of the incredibly risky steps our military took to protect us from that scenario, including: • Over two thousand loaded bombers that crossed American skies. They sometimes crashed and at least nine times resulted in nuclear weapons being accidentally dropped • A system that would use timers and rockets to launch missiles even after everyone was dead • Disastrous atmospheric nuclear testing including the horrific runaway bomb—that fooled scientists and put thousands of men in uniform in the center of a cloud of hot fallout • A plan to use dry lake beds to rebuild and launch a fighting force in the aftermath of nuclear war Based on formerly classified documents, military records, press accounts, interviews and over 10 years of research, 15 Minutes is one of the most important works on the atom bomb ever written.

Critical Perspectives on the Hallmark Channel Carlen Lavigne, 2024-03-05 This multinational, multidisciplinary collection of essays focuses on Hallmark Channel movies and Hallmark's position in the changing North American media landscape. This book covers the 'Countdown to Christmas' offerings, year-round productions, made-for-TV mysteries and romances, Hallmark's use of specific filming locations, and its relationship to viewer desires. Chapters examine Hallmark's position in a changing sociopolitical context and the tensions the company must navigate in creating more "progressive" content; they discuss issues of gender, race, sexuality, and place, as well as analyzing the extensive ranges and reactions of social media participants and interrogating the nature of Hallmark's popularity. Suitable for scholars and students of film and tv and popular culture studies, this is a multifaceted look at both Hallmark and its viewers at a particular moment of Hallmark's market dominance.

Society Of The Spectacle Guy Debord, 2012-10-01 The Das Kapital of the 20th century, Society of the Spectacle is an essential text, and the main theoretical work of the Situationists. Few works of political and cultural theory have been as enduringly provocative. From its publication amid the social upheavals of the 1960's, in particular the May 1968 uprisings in France, up to the present day, with global capitalism seemingly staggering around in its Zombie end-phase, the volatile theses of this book have decisively transformed debates on the shape of modernity, capitalism, and everyday life in the late 20th century. This 'Red and Black' translation from 1977 is Introduced by Notting Hill armchair insurrectionary Tom Vague with a galloping time line and pop-situ verve, and given a more analytical over view by young upstart thinker Sam Cooper.

How Strong Is Your Firm's Competitive Advantage? Daniel Marburger, 2012-11-20 Perhaps the most confounding characteristic of the competitive marketplace is that everyone wants a piece of the action. If a firm successfully enters a new market, creates a new product, or designs new innovations for an existing product, it's just a matter of time before competitors follow suit. And the influx of competition inevitably places downward pressure on both price and profitability. Whether you're an economics student or a manager with absolutely no background in economics, this book will help you make better decisions and learn more about the Five Forces Model, first published in 1979 by Harvard economist Michael Porter, which identifies the characteristics that can help insulate a firm from competitive forces. Unlike most managerial economics textbooks that devote an inordinate amount of space to elements of theory of a firm (which is a bit useful to economics as a social science), this book brings microeconomic theory into the world of the business manager rather than the other way around. Marburger believes if an element of theory has no practical application, there is no reason to discuss it. In short, Marburger's intent is to expound on microeconomic theory that can be taken back to the office and put into use.

Launch! Advertising and Promotion in Real Time Michael Solomon, 2009 Launch! Advertising and Promotion is written for advertising and promotion courses taught to

students in the business school and journalism & mass communication students. This textbook is the first of its kind to teach advertising concepts by reverse engineering a real advertising campaign from beginning to end. In April 2007, SS+K, an innovative New York City communications agency, launched the first ever branding campaign for msnbc.com with the tag A Fuller Spectrum of News. Launch! follows that campaign from initial agency pitch through roll-out of print and media assets to post-campaign analysis. Throughout, it exposes readers to the theory and concepts of advertising and promotion, and the personalities and decisions that drove this campaign. The book takes a rare look behind the curtain - even letting you see some of the paths not chosen by the agency and client. Students get a realistic sense of how theory plays out in practice, and get a flavor for the exciting field of advertising and promotion. And, they consistently learn the perspectives of both the advertising agency (where many journalism and communications students will work) and the client (where many marketing majors will work). This is a unique book, with a unique perspective, by a unique author team, and you won't find this kind of insight in any other text on the market. We think you're going to love it! This textbook has been used in classes at: Ball State University, Emerson College, Florida Institute of Technology, Grand Valley State University, Johnson County Community College, Manchester Business School, McLennan Community College, Michigan State University, North Hennepin Community College, Pierce College, Rochester Institute of Technology, Saint Louis University, Salem State College, South Dakota State University, Texas State University, Texas Tech University, University of New Hampshire, University of North Carolina, University of Notre Dame, University of South Florida, Virginia Tech, Western Kentucky University.

Programming for TV, Radio & The Internet Lynne Gross,Brian Gross,Philippe Perebinossoff,2012-11-12 Where do program ideas come from? How are concepts developed into saleable productions? Who do you talk to about getting a show produced? How do you schedule shows on the lineup? What do you do if a series is in trouble? The answers to these questions, and many more, can be found in this comprehensive, in-depth look at the roles and responsibilities of the electronic media programmer. Topics include: Network relationships with affiliates, the expanded market of syndication, sources of programming for stations and networks, research and its role in programming decisions, fundamental appeals to an audience and what qualities are tied to success, outside forces that influence programming, strategies for launching new programs or saving old ones. Includes real-life examples taken from the authors' experiences, and 250+ illustrations!
