The Geek Manifesto: Why Science Matters to Government (mini ebook) Mark Henderson, 2012-05-04 This mini ebook features a sample chapter from Mark Henderson's brilliant new book THE GEEK MANIFESTO: why science matters. The geeks are coming. And our world needs them. We live in a country where: -A writer can be forced into court for telling the scientific truth. -The media would rather sell papers by scaremongering about the MMR vaccine or GM crops than reporting the facts. -A government advisor was sacked for a decision based on science rather than public opinion. -Only one of our 650 MPs has ever worked as a research scientist. It is time to entrench scientific thinking more deeply into politics and society. To fight for policy based on evidence. The full book

is available from 12th May 2012.

Negotiating the New Normal Saurav Jha, 2023-08-17
The world economy was still reeling from the Global Financial Crisis of 2008 when the COVID-19 pandemic struck like a bolt of lightning in late 2019. Whatever remained of the neoliberal credo - based on the salience of free markets - was upended, and economic nationalism fast became the new stock ideology. In *Negotiating the New Normal*, Saurav Jha carefully examines why, in the wake of the coronavirus shock, strong economic recovery in the developed world is more doubtful than ever. Instead of throwing its weight behind a multipolar world order, China, by far the largest economy among the BRICS nations, has chosen to create a Pax Sinica. However, it is unlikely to make much headway owing to both internal economic contradictions and pushback from the West and beyond. And what of India? Can it become a 'new China' to serve as a key engine of global growth, overcoming the pandemic-induced setback, as well as earlier policy missteps like demonetization? Answering all these questions and raising many more, Jha's deeply researched and cogently argued account examines the 'new normal' of a transactional, even predatory geoeconomic climate where central banks are fast running out of answers and heavily indebted governments are desperately searching for silver bullets. This work of extraordinary depth and ambition, tracing the destinies of the major economic centres of the world, provides a nuanced if sobering context to the reader as it suggests what India must do to rise in this grave new pandemic-ridden world.

These decision trees enable practitioners to distinguish înormalî patients from those who require more customized therapeutic interventions. This holistic text integrates neurobiology, theory, and research evidence related to psychotherapy,

psychopharmacology, and complementary and alternative medicine interventions. While providing comprehensive information on theory and practice, it simplifies complex aspects of treatment with clarity and provides the depth of content appropriate to support sound clinical reasoning required in advanced practice. The book responds to the current backlash against overmedication in psychiatry. It also fulfills the upcoming requirements by APNA and ISPN that advanced practice psychiatric nurses must have skills in psychotherapy. Additionally, the text focuses on treatment issues across the life span and highlights pertinent clinical differences from the adult population through pediatric pointers and aging alerts. Advanced Practice Psychiatric Nursing reflects the extensive practice and educational experience of editors and contributors from the United States, Canada, and Scotland, all of whom are expert APNs.
