The Teacher's Survival Guide Marc R. Major,2008-07-25 Based on extensive research as well as the author's own teaching and mentoring experience, this lively book covers best practices in the essentials of teaching-from organizational tips to proven pedagogic and classroom management techniques. It combines insights from some of the most respected psychologists and educational thinkers with hundreds of firsthand discussions. In style, the book combines the intellectual rigor of a college textbook with the readability, practical relevance, and appropriate humor common to bestselling how-to manuals. While avoiding oversimplification, the author has distilled this vast reservoir of expert wisdom into an easily-digestible guidebook packed with diagrams, interviews, anecdotes, and case studies. The result is both enlightening and enjoyable to read.

Native Education With A Different Purpose Nisheducator,2010-11 Native Education With a Different Purpose offers to teachers and to parents a unique perspective on the current conditions of our education system, of our approach to teacher training and our expectations of our children as learners. This volume will spark practitioners to re-examine their approach to teaching, to the children and to their parents. Carey Conway

Men and Feminism Shira Tarrant,2009-05-12 There's no denying that men's involvement and interest in feminism is key to its continuing relevance and importance. Addressing the question of why men should care about feminism in the first place, *Men and Feminism* lays the foundation for a larger discussion about feminism as a human issue, not simply a women's issue. Men are crucial to the movement – as fathers, brothers, husbands, boyfriends, and friends. From why to how to what can men do, *Men and Feminism* answers all the questions men have about how and why they should get behind feminism.

Unpacking E-commerce Business Models, Trends and Policies OECD,2019-06-06 As digital transformation has accelerated, the e-commerce landscape has become increasingly dynamic. New players have emerged at the same time that established actors have taken on new roles; some barriers to e-commerce at the firm, individual and country levels have been overcome, while other barriers have emerged. Innovative business models have transformed buyer-seller relationships and pushed out the frontier of what is possible to buy and sell online.

Citizenship Pedagogies in Asia and the Pacific Kerry J Kennedy,Wing On Lee,David L Grossman,2012-02-28 How are students in Asia and the Pacific taught to be effective citizens? Following two successful volumes previously published in this series, *Citizenship Education in Asia and the Pacific: Concepts and Issues* and *Citizenship Curriculum in Asia and the Pacific*, this volume focuses on citizenship pedagogies that are promoted by governments in the region, advocated by scholars, and adapted in the schools and classrooms where citizenship education takes place every day. Thirteen case studies from diverse societies in Asia and the Pacific highlight the ways in which teachers and students think about, experience or plan for citizenship teaching and learning. Different methods – vignettes, student surveys, case studies and literature reviews – are used to portray these experiences, from both macro- and micro-analytic perspectives. The wide array of case studies provides rich information and insights into the realities and possibilities of pedagogies for citizenship across the region.

Science in Primary Schools: Examining the Practices of Effective Teachers Angela Fitzgerald,2012-10-19 If the status and quality of science education in schools is to improve, efforts need to be made to better understand the classroom practices of effective science teachers. Teachers are key players in a re-imagining of science education. This book explores how two primary school teachers, identified as effective practitioners, approached science teaching and learning over a unit of work. In recording the teaching and learning experiences in their classrooms, the author highlights how the two teachers adopted different approaches, drawing on their particular beliefs and knowledge, to support student learning in science in ways that were appropriate to their contexts as well as reflected their different experiences, strengths and backgrounds. Through sharing their stories, this book illustrates, that due to the complex nature of teaching and learning, there is no one way of defining effectiveness. In documenting this research, it is hoped that other teachers and teacher educators will be inspired to think about primary school science education in innovative ways.

Social and Professional Applications of Actor-Network Theory for Technology Development Tatnall, Arthur,2012-10-31 The latest advances in technology development have been particularly useful to actor-network theory as a structure for much of its research. With a socio-technical approach to the understanding of information systems and applications, the actor-network theory aims to bring support for social influence on technological innovations. *Social and Professional Applications of Actor-Network Theory for Technology Development* presents a platform for the approaches and implementations on the actor-network theory and its relationship with technology development. This book provides researchers and practitioners with a better understanding of the usefulness of the social and technical connection.

Beginning Teachers Michael Crowhurst,2015-04-27 In this collection of narratives, beginning teachers describe and reflect on critical incidents – classes that didn't quite go to plan. These experiences are recalled in a general way and all names and locations are fictionalized. Each narrative, while situated in a classroom, focuses on the experience of the teacher/author and sheds light on their thinking as they work through the complex event they are remembering. Beginning teachers then imagine how they might approach a similar situation in the future. While developing reflective practice techniques can support and enhance individual practice when these accounts are shared with others there is some scope for enhancing educative

experiences generally. There is a long tradition of reflective practice writing in education, and this small workbook aims to make a contribution to this genre. Each reflective practitioner narrative is followed with an invitation to discussion section and periodically through the workbook sideline methodologies are introduced that readers can use to support further analysis. The beginning teacher narratives are authentic, complex and alive and as a consequence they will generate lively discussion in tutorial spaces with beginning teachers. The materials are informed by various strands of poststructural and critical theory and therefore they are intended to reflect a dialogic stance – rather than signpost specific directions.

Memory Road Trip Krista Marson,2021-09-07 MEMORY ROAD TRIP is a collection of travel stories ranging from the sublime to the surreal as recounted by a former travel agent who saw the world on the cheap. The journey down memory road is a heartfelt excursion into the past that takes armchair explorers on an odyssey of life, love, and loneliness. The circuitous path is full of philosophical nooks and crannies, and many stories get told from the bottom of a well. Many of Krista's stories speak to the angst that simmers inside all of us as we confront the many absurdities that exist in this world. Her passion for nature, art, history, and architecture gush across the page, along with her contagious curiosity in life and her pragmatic acceptance of death. MEMORY ROAD TRIP is not only an adventurous journey to certain parts of the globe, but it is also an introspective and witty journey to the mysterious self. For as large as the world is, it has grown infinitely smaller, yet currently exists relatively out of reach. Travel, for the moment, is safer done mentally these days, so now's the time to go on a MEMORY ROAD TRIP with someone who knows the way.

Teaching the Silk Road Jacqueline M. Moore,Rebecca Woodward Wendelken,2012-02-01 Advocating a global as opposed to a Eurocentric perspective in the college classroom, discusses why and how to teach about China's Silk Road. The romance of the Silk Road journey, with its exotic locales and luxury goods, still excites the popular imagination. But study of the trade routes between China and central Asia that flourished from about 200 BCE to the 1500s can also greatly enhance contemporary higher education curricula. Indeed, with people, plants, animals, ideas, and beliefs traversing it, the Silk Road is both a metaphor of globalization and an early example of it. Teaching the Silk Road highlights the reasons to incorporate this material into a variety of courses and shares resources to facilitate that process. It is intended for those who are not Silk Road or Asian specialists but who wish to embrace a global history and civilizations perspective in teaching, as opposed to the more traditional approach that focuses on cultures in isolation. The book explores both classroom and experiential learning and is intentionally interdisciplinary. Each essay focuses on pedagogical strategies or themes that teachers can use to bring the Silk Road into the classroom. Based on years of experience, the authors of Teaching the Silk Road offer sound strategies for both stand-alone courses on aspects of the route and mainstreaming what has been uncovered in three decades of research into existing courses in a variety of disciplines. H-Net Reviews (H-Asia) This collection of essays and personal reflections allows the reader to listen in on a relaxed conversation on teaching the topic of the Silk Road. It offers a nice blueprint for integrating the Silk Road into new or existing curricula. J. Michael Farmer, author of The Talent of Shu: Qiao Zhou and the Intellectual World of Early Medieval Sichuan

Everyday Writing Center Anne Ellen Geller,2007 In a landmark collaboration, five co-authors develop a theme of ordinary disruptions (the everyday) as a source of provocative learning moments that can liberate both student writers and writing center staff. At the same time, the authors parlay Etienne Wenger's concept of community of practice into an ethos of a dynamic, learner-centered pedagogy that is especially well-suited to the peculiar teaching situation of the writing center. They push themselves and their field toward deeper, more significant research, more self-conscious teaching.

Global Issues 2012 CQ Researcher,2012-06-12 Are you tired of simplistic treatment of the world's most important issues? So many competing readers offer simple black and white treatment of today's complex problems. Help your students see the shades of gray. In this annual reader, CQ Researcher reporters offer students an in-depth and nuanced look at sixteen of today's most pressing issues, ranging from changes in the Middle East and prospects for peace to climate change and terrorism. Each chapter identifies the key players, explores what's at stake, and offers necessary background and analysis so students understand how past and current developments impact the future of each issue. Also included: Pro/con box that examines two competing sides of a single issue question; Detailed chronology; Annotated bibliography and web resources; and Photos, charts, graphs, and maps

Sustainability Unpacked Kristiina Vogt,Toral Patel-Weynand,Maura Shelton,Daniel J Vogt,John C. Gordon,Cal Mukumoto,Asep. S. Suntana,Patricia A. Roads,2012-06-25 Food, water and energy form some of the basic elements of sustainability considerations. This ground-breaking book examines and decodes these elements, exploring how a range of countries make decisions regarding their energy and bio-resource consumption and procurement. The authors consider how these choices impact not only the societies and environments of those countries, but the world in general. To achieve this, the authors review the merits of various sustainability and environmental metrics, and then apply these to 34 countries that are ranked low, medium or high on the human development index. The book assesses their resource capacities and the environmental impacts, both within and outside

their country boundaries, from consuming food, water, and energy. The final section uses the lessons derived from the earlier analyses of resource consumption to explore the importance of geography, climates and sustainable management of forests and other natural resources for building resilient societies in the future.

The Exposed City Nadia Amoroso,2010 Amoroso draws on unseen elements of the city - like crime rates and surveillance - to create mapping for the twenty-first century. Including expert interviews and examples of maps exposing the hidden elements of the city, The Exposed City shows how the urban invisibles can be made visible.

Captive Audience Susan Crawford,2013-01-08 Ten years ago, the United States stood at the forefront of the Internet revolution. With some of the fastest speeds and lowest prices in the world for high-speed Internet access, the nation was poised to be the global leader in the new knowledge-based economy. Today that global competitive advantage has all but vanished because of a series of government decisions and resulting monopolies that have allowed dozens of countries, including Japan and South Korea, to pass us in both speed and price of broadband. This steady slide backward not only deprives consumers of vital services needed in a competitive employment and business market—it also threatens the economic future of the nation. This important book by leading telecommunications policy expert Susan Crawford explores why Americans are now paying much more but getting much less when it comes to high-speed Internet access. Using the 2011 merger between Comcast and NBC Universal as a lens, Crawford examines how we have created the biggest monopoly since the breakup of Standard Oil a century ago. In the clearest terms, this book explores how telecommunications monopolies have affected the daily lives of consumers and America's global economic standing.

Repossessing Shanland Jane M. Ferguson,2021-08-17 The Shan have been fighting since 1958 for the autonomous state in Southeast Asia they were promised. Jane M. Ferguson articulates Shanland as an ongoing project of resistance, resilience, and accommodation within Thailand and Myanmar, showing how the Shan have forged a homeland and identity during great upheaval.

Unpacked Blake C. Scott,2022-11-15 Unpacked offers a critical, novel perspective on the Caribbean's now taken-for-granted desirability as a tourist's paradise. Dreams of a tropical vacation have become a quintessential aspect of the modern Caribbean, as millions of tourists travel to the region and spend extravagantly to pursue vacation fantasies. At the beginning of the twentieth century, however, travelers from North America and Europe thought of the Caribbean as diseased, dangerous, and, according to many observers, the white man's graveyard. How then did a trip to the Caribbean become a supposedly fun and safe experience? Unpacked examines the historical roots of the region's tourism industry by following a well-traveled sea route linking the US East Coast with the island of Cuba and the Isthmus of Panama. Blake C. Scott describes how the cultural and material history of US imperialism became the heart of modern Caribbean tourism. In addition, he explores how advances in tropical medicine, perceptions of the tropical environment, and development of infrastructure and transportation networks opened a new playground for visitors.
