🔍 [Blindsight](#) Peter Watts, 2006-10-03 Hugo and Shirley Jackson Award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Psychology, Humour and Class Babak Fozooni, 2020-03-27 This challenging book critically examines three forms of contemporary psychology, all displaying various signs of crisis, through analogy with humour associated with three different class perspectives: mainstream psychology; critical psychology; and postpsychology. By fusing the best of the three psychologies with political and cultural critiques, the book poses the question: what if class conflict and the crises of psychology are related? This is precisely the Gordian Knot which Fozooni tries to untangle. First, the author demonstrates how psychology has traditionally veered towards either an upper-class or a middle-class paradigm. With the demise of these two old paradigms a new understanding of psychology is gradually emerging - a postpsychology. Describing how 'mainstream' and 'critical' psychologies are undergoing late-life crisis, and 'postpsychology' is experiencing its birth pangs in an environment hostile to its existence, the book provides an alternative narrative of psychology. The author suggests that whilst all three forms of psychology have contributed to our self-comprehension, it is only postpsychology that possesses the attributes necessary for a global remaking of humanity. Tackling the discipline of psychology head-on, Fozooni pits against it a series of scathing yet tongue-in-cheek critiques, making this fascinating and provocative reading for all students and academics interested in psychology, as well as the general reader.
