**The Psychological Fictions of J.G. Ballard** Samuel Francis, 2013-06-20 J. G. Ballard self-professedly 'devoured' the work of Freud as a teenager, and entertained early thoughts of

becoming a psychiatrist; he opened his novel-writing career with a manifesto declaring his wish to write a science fiction exploring not outer but 'inner space', and declaring the need for contemporary fiction to be viewed 'as a branch of neurology'. He also apparently welcomed a reader's report on Crash (1973) condemning him as 'beyond psychiatric help' as confirming his achievement of 'total artistic success'. Samuel Francis investigates Ballard's engagement with psychology and the psychological in his fiction, tracing the influence of key figures including Sigmund Freud, C.G. Jung and R.D. Laing and placing his work in the context of the wider fields of psychology and psychiatry. While the psychological preoccupations of his writing are very clear - including his use of concepts such as the unconscious, psychopathology, 'deviance', obsession, abnormal psychology and schizophrenia - this is the first book to offer a detailed analysis of this key conceptual and historical context for his fiction.

**Do You Believe in Rock and Roll?** Raymond I. Schuck, Ray Schuck, 2012-09-26 Since its release in 1971, Don McLean's song *American Pie* has become an indelible part of U.S. culture. It has sparked countless debates about the references within the lyrics; been celebrated as a chronicle of American life from the late

1950s through the early 1970s; and has become iconic itself as it has been remade, parodied, and referenced within numerous texts and forums. This volume offers a set of new essays that focus on the cultural and historical significance of the song. Representing a variety of perspectives and fields of study, the essays address such topics as historical and literary interpretations of the song's lyrics, its musical qualities, the commentary the song offers on rock and roll history, the continuing significance of the song, and the ways in which the song has been used by various writers and artists. Instructors considering this book for use in a course may request an examination copy here.

Crisis Communications A. Michael Noll, 2003 On September 11, 2001, AT&T's traffic was 40 percent greater than its previous busiest day. Wireless calls were made from the besieged airplanes and buildings, with the human voice having a calming influence. E-mail was used to overcome distance and time zones. And storytelling played an important role both in conveying information and in coping with the disaster. Building on such events and lessons, *Crisis Communications* features an international cast of top contributors exploring emergency communications during crisis. Together, they evaluate the use, performance, and effects of traditional mass media (radio, TV, print), newer media (Internet, email), conventional telecommunications (telephones, cell phones), and interpersonal communication in emergency situations. Applying what has been learned from the behavior of the mass media in past crises, the authors clearly show the central role of communications on September 11. They establish how people learned of the tragedy and how they responded; examine the effects of media globalization on terrorism; and, in many cases, give specific advice for the future.
