Sams Teach Yourself ASP.NET in 21 Days Chris Payne,2003 Sams Teach Yourself ASP.NET in 21 Days, Second Edition offers an approachable guide to the latest in Microsoft .NET technologies. The author's example-packed and accessible presentation style helped make the previous edition a success. The book walks the reader through the .NET Framework and teaches techniques needed to program Web applications efficiently. For experienced user of the previous version of ASP, this title will serve as an invaluable upgrade tool. After covering Web Forms and Server Controls, the author explores at database access with ADO.NET and XML. An application will be built throughout the book to illustrate techniques learned each day. XML Web Services are covered in detail due to their tight integration with ASP.NET applications. Overall this title will make ASP.NET accessible for just about anyone, with or without exposure to the older ASP standard.

Subject Librarians Penny Dale,2016-04-01 The university subject librarians' role is at the centre of new models of teaching and learning, yet further debate and published contributions are still needed to shape its future direction. *Subject Librarians: Engaging with the Learning and Teaching Environment* assesses trends and challenges in current practice, and aims to encourage renewed thinking and improved approaches. Its editors and authors include experienced practitioners and academics. At a time of great change and increasing challenges in higher education this book offers directors of academic services, library managers, librarians and lecturers a chance to reflect on the key issues and consider the needs of the learning community. *Subject Librarians: Engaging with the Learning and Teaching Environment* also provides a perspective on current practice and a reference source for students of Information Management and Information Studies.

Windows Installation and Update Troubleshooting Chris Rhodes,Andrew Bettany,2016-10-12 Understand, troubleshoot and repair issues with local Windows installations, automating the OS deployment and configuring updates via WSUS and Windows Intune. When tasked with deploying Windows operating systems, there can seem to be an overwhelming amount of tools and techniques to learn to master this process. Whether you are installing a new Windows operating system locally, or looking to deploy a customized build to 1000s of devices in your network, you will need to understand how to do this successfully and reliably. This book steps up through local installations and upgrades through to Lite Touch deployments using WDS and MDT, and then to Zero Touch installations using Microsoft System Center. Management of updates to Windows is also covered, using both on-premises technologies and cloud-based services. In this book you'll learn how to decide between local installation types, perform upgrades, use automation techniques to deploy images and how to maintain Windows throughout the operational phase of the lifecycle. What You'll Learn Install Windows 7, 8.1, or 10 locally Perform upgrades locally on a Windows PC, including migrating data and user profiles Deploy operating systems using Lite Touch techniques Deploy operating systems using Zero Touch technologies Maintain on-premises and devices not connected to the company network by using WSUS and Windows Intune Who This Book Is For IT pros including IT support personnel and system administrators. This book will also be of interest to Windows experts and power users.

Legal Instruments in the Fight Against International Terrorism Cyrille J.C.F. Fijnaut,Jan Wouters,Frederik Naert,2004-06-01 This book finds its origins in a transatlantic colloquium held in the European Parliament in Brussels in May 2002. After an introductory overview of the US and European responses to 9/11 it addresses the main legal aspects of the fight against international terrorism, namely police and judicial cooperation (including mutual legal assistance, extradition and the role of entities like Europol and Eurojust), financial initiatives (e.g. by the UN Security Council, the FATF and the EU), human rights and rule of law issues (such as trial by military commissions, detention of alleged unlawful combatants and others, state of emergency derogations, due process, the death penalty and privacy) and international law aspects (inter alia self-defence, the application of international humanitarian law, prisoner of war status, the role of the UN, in particular the Security Council, sanctions and the negotiations on a comprehensive convention on combating terrorism). Each topic is considered from a US and from a European perspective.

NATO and Weapons of Mass Destruction Eric Terzuolo,2009-05-07 NATO was hugely successful in facing off the Soviet Union during the Cold War. But has it been equally successful in addressing the new threats of the post-Cold War era? This new study assesses the organization's political and military initiatives, and how its outreach to Russia, Ukraine, and other countries in the Euro-Atlantic and Mediterranean regions, devoted considerable attention to WMD proliferation risks. It also probes the political factors, both inside and outside NATO, as well as resource constraints, which have limited the alliance's added value in the international community's effort to combat proliferation. The events of 11 September 2001 and bitter intra-alliance controversy over the 2003 Iraq intervention have highlighted questions regarding NATO's future role, and even its continued viability. This is a serious reflection on how the alliance should figure in the fight against WMD and terrorist threats and an examination of today's key issues, including the use of force in international relations and the possibility of constructing new, post-Cold War collective security rules. This is the first study to evaluate, critically and in-depth, how a long-standing security organization has adapted - and must continue to adapt - to the global security challenges of our time. This book will be of great interest to all students and scholars of international politics, military history and all readers interested in the future of NATO and international security.

The European Union and Enlargement G. Christou,2004-10-15 The European Union and Enlargement is about the EU's 'power of attraction' - an exploration of the potential for EU impact on conflicts within Europe - and the implications for the EU to influence the 'order' beyond its borders. It provides both a theoretical and historical context in order to understand the EU's impact and combines this with empirical analysis of the perceptions of the Greek Cypriots, Turkish Cypriots and Turkey on the accession process and its effect on the Cyprus issue. It demonstrates the limits and the potential of the EU as a global actor through its power of attraction.

Fate of the States Meredith Whitney,2013-06-04 Forget everything you think you know about the direction of the American economy, about our growing need for foreign oil, about the rise of the service economy and the decline of American manufacturing. The story of the next thirty years will not be a repeat of the last thirty. One of the most respected voices on Wall Street, Meredith Whitney shot to global prominence in 2007 when her warnings of a looming crisis in the financial sector proved all too prescient. Now, in her first book, she expands upon her biggest call since the financial crisis.

Computers and Networks in the Age of Globalization Leif Bloch Rasmussen,Colin Beardon,Silvio Munari,2013-04-17 In modernity, an individual identity was constituted from civil society, while in a globalized network society, human identity, if it develops at all, must grow from

communal resistance. A communal resistance to an abstract conceptualised world, where there is no possibility for perception and experience of power and therefore no possibility for human choice and action, is of utmost importance for the constituting of human choosers and actors. This book therefore sets focus on those human choosers and actors wishing to read and enjoy the papers as they are actually perceiving and experiencing their lives in a diversity of social and cultural contexts. In so doing, the book tries to imagine in what kind of networks humans may choose and act based on the knowledge and empirical evidence presented in the papers. The topics covered in the book include: People and Their Changing Values. Citizens in a Network Society. The Individual and Knowledge Based Organisations. Human Responsibility and Technology. Exclusion and Regeneration. This valuable new book contains the edited proceedings of the Fifth World Conference on Human Choice and Computers (HCC-5), which was sponsored by the International Federation for Information Processing (IFIP) and held in Geneva, Switzerland in August 1998. Since the first HCC conference in 1974, IFIP's Technical Committee 9 has endeavoured to set the agenda for human choices and human actions vis-à-vis computers.
