**Science and technology the making of the Air Force Research Laboratory**, 2000 This history documents a watershed event within the United States Air Force -- the creation of the Air Force Research Laboratory (AFRL). As the high technology service, the Air Force has always searched for ways to continuously improve its science and technology enterprise. In that context, the making of AFRL was not a bureaucratic accident. Rather, it was the product of a complex mixture of historical forces and pressures at work that convinced people at all levels that the time was ripe to bring about fundamental reform in how the Air Force conducts its business of science and technology. In terms of significance, a wealth of past studies has focused on almost every aspect of the operational side of the Air Force. But there has been a scarcity of available scholarly studies that address the far-reaching implications of science and technology. This book is a major contribution that helps fill that gap. Organization and infrastructure are critically important components of the total science and

technology picture. Thus, the manner in which its laboratory system is organized is a critical factor in the Air Force's ability to assure that it is investing in and delivering the most relevant technologies possible. This book documents how the Air Force moved from 13 separate labs to one consolidated lab. The narrative is divided into two parts. Part one addresses the reasons why the Air Force decided to consolidate its far-flung science and technology enterprise into one lab. How the new lab was implemented is the focus of part two. This study is especially revealing because the reader is given access to the inner workings and struggles of a major Air Force organizational restructuring through interviews with key individuals who participated directly in the decision-making process to establish a single lab. A chronology of the lab's creation is included. (19 tables, 22 figures, 19 photographs).

**Research Strategies: Finding Your Way Through the Information Fog** William Badke, 2021-03-02 Everyone does research. Some just do it better than others. Ultimately, research is a way forward to a resolution of life's greatest difficulties. In this seventh edition of *Research Strategies: Finding Your Way through the Information Fog*, author William Badke walks you

Feminist, Queer, Crip Alison Kafer, 2013-05-16 In *Feminist, Queer, Crip* Alison Kafer imagines a different future for disability and disabled bodies. Challenging the ways in which ideas about the future and time have been deployed in the service of compulsory able-bodiedness and able-mindedness, Kafer rejects the idea of disability as a pre-determined limit. She juxtaposes theories, movements, and identities such as environmental justice, reproductive justice, cyborg theory, transgender politics, and disability that are typically discussed in isolation and envisions new possibilities for crip futures and feminist/queer/crip alliances. This bold book goes against the grain of normalization and promotes a political framework for a more just world.

*The Disability Studies Reader* Lennard J. Davis, 2016-10-19 The fifth edition of *The Disability Studies Reader* addresses the post-identity theoretical landscape by emphasizing questions of interdependency and independence, the human-animal relationship, and issues around the construction or materiality of gender, the body, and sexuality. Selections explore the underlying biases of medical and scientific experiments and explode the binary of the sound and the diseased

mind. The collection addresses physical disabilities, but as always investigates issues around pain, mental disability, and invisible disabilities as well. Featuring a new generation of scholars who are dealing with the most current issues, the fifth edition continues the Reader's tradition of remaining timely, urgent, and critical.

**Inside the Bubble** Barbara Trish, William J Menner, 2021-09-20  
Inside the Bubble: Campaigns, Caucuses, and the Future of the Presidential Nomination Process is a behind-the-scenes look at the 2020 Democratic nomination process focusing on

the Iowa caucuses and the campaign workers who located there. For decades, Iowa held the first contest in the presidential nomination process and individuals interested in campaign work considered it a holy grail. But in 2020, a record number of Democrats seeking to unseat President Trump - and the hundreds of young campaign workers who located to Iowa - created a political event unmatched in scope and scale. Those workers, embedded in the caucus bubble, focused for months on finding supporters for their candidate and ensuring they attended their precinct event - the first step in selecting delegates to the national convention. And then Caucus Day came, and with it a technology-driven fiasco that seemed to foreshadow a year of pandemic and protest. The lessons learned in 2020 underscored the importance of local staff who organize and mobilize supporters for a candidate in whom they believe. And those lessons are applicable to any race of any party in any state. For students of US politics as well as aspiring candidates, political journalists, and campaign professionals, this book captures the drama and human perspective of campaigns and elections in America.

**Research Strategies** William Badke, 2017-04-05 We live in a time when there is more knowledge available to us than ever before. Yet we struggle to make sense of it. When a research deadline looms and all you see is a confusing fog of data, you know you need help. In this sixth edition of *Research Strategies*, author William Badke helps you make sense of it all. He will show you how to navigate the information fog intelligently, and he will detail how to use it to your advantage to become a better researcher. Badke focuses on informational research and provides a host of tips and advices not only for conducting research, but also for everything from finding a topic to writing an outline to locating high quality,

relevant resources to finishing the final draft. Study guides, practice exercises, and assignments at the end of each chapter will help reinforce the lessons. As an experienced researcher who has led thousands of students to ramp up their research abilities, Badke uses humor to help you gain a better understanding of today's world of complex technological information. Research Strategies provides the skills and strategies to efficiently and effectively complete a research project from topic to final product.

Internal and External Aspects of Corporate Governance Ahmed Naciri, 2009-10-16 An effective system of corporate governance has both internal and external aspects that have to be sufficiently responsive if governance is to succeed. In this book, Ahmed Naciri examines these two core aspects or the latest buzzword in business and management theory. Internal aspects include ownership structure, the board of directors and committees, internal control, risk management, transparency and financial reporting. External aspects can either be market-oriented, or can take the form of credit ranking, and/or social requirements. Due to the original orientation of the Sarbanes/Oxley Law, concentrating solely on financial disclosure and given its decisive and tremendous influence on all other similar corporate governance legislations all over the world, most writings on corporate governance have dealt with solely internal corporate governance mechanisms. This book aims to fill up the gap by using a systemic approach and giving a global picture of the corporate governance theoretical foundations, mainly by putting the emphasis on its double dimension: internal and external.

### **Renewing Rhetoric's Relation to Composition**

Shane Borrowman, Stuart Brown, Thomas Miller, 2010-02-25 *Renewing Rhetoric's Relation to Composition* comprehensively examines the

development of rhetoric and composition, using the writings of Theresa Jarnagin Enos as points of departure for studies of broader trends. Chapters explore such topics as the historical relations of rhetoric and composition, their evolution within programs of study, and Enos's research on gender. The volume presents the growing disjunction between rhetoric and composition and paints a compelling picture of the current state of both disciplines as well as their origins. This volume acknowledges the influential role that Theresa Enos has had in the writing and rhetoric disciplines. Her career provides benchmarks for plotting developments in rhetoric and composition, including the evolving relations between the two. This collection offers a tribute to her work and to the new directions in the discipline stemming from her research. With an all-star line-up of contributors, it also represents the state of the art in rhetoric and composition scholarship, and it will serve current and future scholars in both disciplines.

**Spinal Cord Injury** Institute of Medicine, Board on Neuroscience and Behavioral Health, Committee on Spinal Cord Injury, 2005-08-27 An estimated 11,000 spinal cord injuries occur each year in the United States and more than 200,000 Americans suffer from maladies associated with spinal cord injury. This includes paralysis, bowel and bladder dysfunction, sexual dysfunction, respiratory impairment, temperature regulation problems, and chronic pain. During the last two decades, longstanding beliefs about the inability of the adult central nervous system to heal itself have been eroded by the flood of new information from research in the neurosciences and related fields. However, there are still no cures and the challenge of restoring function in the wake of spinal cord injuries remains extremely complex. Spinal Cord Injury examines the future directions for research with

the goal to accelerate the development of cures for spinal cord injuries. While many of the recommendations are framed within the context of the specific needs articulated by the New York Spinal Cord Injury Research Board, the Institute of Medicine's panel of experts looked very broadly at research priorities relating to future directions for the field in general and make recommendations to strengthen and coordinate the existing infrastructure. Funders at federal and state agencies, academic organizations, pharmaceutical and device companies, and non-profit organizations will all find this book to be an essential resource as they examine their opportunities.

### **Cultural Proficiency in Addressing Health**

It identifies our most vulnerable populations and offers guidelines on how to avoid cultural incompetence and promote cultural proficiency. *Cultural Proficiency in Addressing Health Disparities* will help us to address Healthy People 2010, which challenges individuals, communities, and professionals to take specific steps to ensure that good health, as well as long life, is enjoyed by all. ### *The New Digital Storytelling* Bryan

Alexander, 2011-04-07 This book surveys the many ways of telling stories with digital technology, including blogging, gaming, social media,

podcasts, and Web video. Digital storytelling uses new media tools and platforms to tell stories. The second wave of digital storytelling started in the 1990s with the rise of popular video production, then progressed in the new century to encompass newer, social media technologies. The New Digital Storytelling: Creating Narratives with New Media is the first book that gathers these new, old, and emergent practices in one place, and provides a historical context for these methods. Author Bryan Alexander explains the modern expression of the ancient art of storytelling, weaving images, text, audio, video, and music together. Alexander draws upon the latest technologies, insights from the latest scholarship, and his own extensive experience to describe the narrative creation process with personal video, blogs, podcasts, digital imagery, multimedia games, social media, and augmented reality—all platforms that offer new pathways for creativity, interactivity, and self-expression.

**Gary/Chicago International Airport, Master Plan Development Including Runway Safety Area Enhancement/extension of Runway 12-30, and Other Improvements ,2004**

*Brilliant Imperfection* Eli Clare,2017-01-13 In *Brilliant Imperfection* Eli Clare uses memoir, history, and critical analysis to explore cure—the deeply held belief that body-minds considered broken need to be fixed. Cure serves many purposes. It saves lives, manipulates lives, and prioritizes some lives over others. It provides comfort, makes profits, justifies violence, and promises resolution to body-mind loss. Clare grapples with this knot of contradictions, maintaining that neither an anti-cure politics nor a pro-cure worldview can account for the messy, complex relationships we have with our body-minds. The stories he tells range widely, stretching from disability stereotypes to weight loss surgery, gender transition to skin lightening creams. At each turn, Clare weaves race, disability, sexuality, class, and gender together, insisting on the nonnegotiable value of body-mind difference. Into this mix, he adds environmental politics, thinking about ecosystem loss and restoration as a way of delving more deeply into cure. Ultimately *Brilliant Imperfection* reveals cure to be an ideology grounded in the twin

notions of normal and natural, slippery and powerful, necessary and damaging all at the same time.
