**Handheld and Ubiquitous Computing** Peter Thomas, Hans-W. Gellersen, 2003-07-31 The papers collected here are those selected for presentation at the Second International Symposium on Handheld and Ubiquitous Computing 2000 (HUC 2000) held in Bristol, UK in September 2000. The symposium was the second in a series of symposia which explores new research in the area of emerging mobile, personal, and handheld technologies. The first event, HUC'99, was held in Karlsruhe (Germany), organised by the Telecooperation Office (TecO) of the University of Karlsruhe in close collaboration with the Center for Arts and Media Technology (ZKM). This previous event, the first of its kind in the world, attracted a large number of paper submissions, was attended by over 200 international delegates, and demonstrated the growing international interest in the area with contributions from the United States, Japan and Europe. The 18 papers collected here were chosen from 70 submissions to HUC 2000, and represent a valuable resource for those wishing to understand the themes being pursued in this vibrant and exciting area of technology. The papers range from work on intelligent environment and devices, user experience, and interface design, to research in context aware systems, wearable computing, and location-based services. Together, the papers represent a snapshot of the state of the art in research in handheld and ubiquitous computing. The symposium also attracted a large number of short paper submissions, and these are available in the Springer journal *Personal Technologies* volume 4, number 4, which was published in tandem with these proceedings.

### **Development and implementation of a Service Access**

**Concept** Michael Fischer, 2001-09-06 Inhaltsangabe: Abstract: Successive to a preceding study about Service Discovery, this thesis covers the topics Service Description and Service Access. Starting with an analysis and comparison of existing technologies, a new protocol for the service access was developed and an operating environment, capable of accessing services of any type was programmed. Thereby emphasis is placed on high scalability, extensibility, modularity and comprehensive documentation, to provide easy association with existing or future works. The first part deals with the various versions of Service Descriptions, followed by a description of the service access methods and concluding with a comprising comparison. All technologies or protocols qualified for Service Discovery and Access discovered during this diploma thesis are discussed. The main part comprises the software implementation which was written in Java, including a comprehensive documentation containing, among others, the protocol specification, software architecture, an user guide and proposals for advancements. Zusammenfassung: Aufbauend auf

einer vorangegangenen Arbeit über Service Discovery, werden in dieser Diplomarbeit die Themen Service Description und Service Access behandelt. Beginnend mit einer Analyse und dem Vergleich existierender Technologien, wurde ein neues Protokoll für den dynamischen Dienstzugriff entwickelt und eine funktionsfähige Umgebung programmiert, die mittels dieses Protokolls auf Dienste jeglicher Art zugreifen kann. Dabei wurde das Augenmerk auf eine hohe Skalierbarkeit, Erweiterbarkeit, Modularität und umfassende Dokumentation gelegt, so dass es nicht schwer fallen sollte, die Software mit folgenden oder existierenden Arbeiten zu verknüpfen. Im ersten Teil wird auf die verschiedenen Varianten der Dienstbeschreibungen eingegangen, gefolgt von einer Beschreibung der Dienstzugriffe und anschließend einem zusammenfassenden Vergleich. Aufgeführt sind dabei alle für Service Discovery und Access geeigneten Technologien, bzw. Protokolle, die im Rahmen der Diplomarbeit aufgefunden wurden. Der Hauptteil der Arbeit umfasst die Implementierung der Software, die in Java geschrieben wurde, inklusive einer umfassenden Dokumentation dazu, die unter anderem die Protokollspezifikation, die Architektur der Software, eine Bedienungsanleitung und Vorschläge zur Weiterentwicklung beinhaltet. International Conference on Computational Science (ICCS 2005) held in Atlanta, Georgia, USA, May 22-25, 2005, continued in the tradition of previous conferences in the series: ICCS 2004 in Krakow, Poland; ICCS 2003 held simultaneously at two locations, in Melbourne, Australia and St. Petersburg, Russia; ICCS 2002 in Amsterdam, The Netherlands; and ICCS 2001 in San Francisco, California, USA. Computational science is rapidly maturing as a mainstream discipline. It is central to an ever-expanding variety of fields in which computational methods and tools enable new discoveries with greater accuracy and speed. ICCS 2005 was organized as a forum for scientists from the core disciplines of computational science and numerous application areas to discuss and exchange ideas, results, and future directions. ICCS participants included researchers from many application domains, including those interested in advanced computational methods for physics, chemistry, life sciences, engineering, economics and finance, arts and humanities, as well as computer system vendors and software developers. The primary objectives of this conference were to discuss problems and solutions in all areas, to identify new issues, to shape future directions of research, and to help users apply various advanced computational techniques. The event highlighted recent developments in algorithms, computational kernels, next generation computing systems, tools, advanced numerical methods, data-driven systems, and emerging application fields, such as complex systems, finance, bioinformatics, computational aspects of wireless and mobile networks, graphics, and hybrid computation.

### **Advances in Multimedia Information Processing - PCM**

**2005** Yo-Sung Ho, Hyoung Joong Kim, 2005-10-31 We are delighted to welcome readers to the proceedings of the 6th Pacific-Rim Conference on Multimedia (PCM). The first PCM was held in Sydney, Australia, in 2000. Since then, it has been hosted successfully by Beijing, China, in 2001, Hsinchu, Taiwan, in 2002, Singapore in 2003, and Tokyo, Japan, in 2004, and finally Jeju, one

of the most beautiful and fantastic islands in Korea. This year, we accepted 181 papers out of 570 submissions including regular and special session papers. The acceptance rate of 32% indicates our commitment to ensuring a very high-quality conference. This would not be possible without the full support of the excellent Technical Committee and anonymous reviewers that provided timely and insightful reviews. We would therefore like to thank the Program Committee and all reviewers. The program of this year reflects the current interests of the PCM's. The accepted papers cover a range of topics, including, all aspects of multimedia, both technical and artistic perspectives and both theoretical and practical issues. The PCM 2005 program covers tutorial sessions and plenary lectures as well as regular presentations in three tracks of oral sessions and a poster session in a single track. We have tried to expand the scope of PCM to the artistic papers which need not to be strictly technical.
