An Integrative Approach to Counseling Robert G. Santee,2007-05-18 *An Integrative Approach to Counseling: Bridging Chinese Thought, Evolutionary Theory, and Stress Management* offers a global and integrative approach to counseling that incorporates multiple concepts and techniques from both eastern and western perspectives. The book identifies commonalities rather than the differences between them. The book also compares and contrasts the underlying cultural assumptions of western counseling with those of the Chinese perspectives of Confucianism, Daoism, and Buddhism, relative to integrating and applying a more global approach to helping individuals functionally adapt to challenges in their environments. The book will be used by faculty and students in those advanced undergraduate and graduate courses in psychology, counseling, or social work that cover such areas as introduction to counseling, counseling skills and techniques, counseling theories, multi-cultural awareness and counseling, and stress management.

Advances in Information Retrieval Fabio Crestani,Mark Girolami,C.J.van Rijsbergen,2003-07-31 The annual colloquium on information retrieval research provides an opportunity for both new and established researchers to present papers describing work in progress or final results. This colloquium was established by the BCS IRSG(British Computer Society Information Retrieval Specialist Group), and named the Annual Colloquium on Information Retrieval Research. Recently, the location of the colloquium has alternated between the United Kingdom and continental Europe. To reflect the growing European orientation of the event, the colloquium was renamed "European Annual Colloquium on Information Retrieval Research" from 2001. Since the inception of the colloquium in 1979 the event has been hosted in the city of Glasgow on four separate occasions. However, this was the first time that the organization of the colloquium had been jointly undertaken by three separate computer and information science departments; an indication of the collaborative nature and diversity of IR research within the universities of the West of Scotland. The organizers of ECIR 2002 saw a sharp increase in the number of go-quality submissions in answer to the call for papers over previous years and as such 52 submitted papers were each allocated 3 members of the program committee for double blind review of the manuscripts. A total of 23 papers were eventually selected for oral presentation at the colloquium in Glasgow which gave an acceptance rate of less than 45% and ensured a very high standard of the papers presented.
