*Cyber Worship in Multifaitth Perspectives* Mohamed Taher,2006 Cyber Worship in Multifaitth Perspectives, as is implied by its name, explores worship (i.e., Prayer, Praise, Scripture, Sacrament, Rituals, Confessions, Eucharist, Rites, Pilgrimages, Reflection, Contemplation, etc.) on the Internet. It is not an 'everything you need to know' guide about the subjects of faith and belief, religions-online, religions on the Net, or religions in cyberspace. Rather, it is a book about religious and spiritual experience under the rubric, cyber worship, which is the variety of ways religious devotion is

performed and carried out on the Internet. The term 'Cyber Worship' is a catchall phrase, which includes variants such as online worship, virtual worship, electronic prayer, cyber puja, cyber synagogue, and so on. Dr. Mohamed Taher has thus assembled a quick reference for two groups: those communities that are involved in Cyber Worship and business Webs that collaborate in sustaining wired environments. As such, this book provides an interesting and current perspective on a practice that will continue to grow in the future.

**Digital Prohibition** Carolyn Guertin, 2012-04-26 The act of creation requires us to remix existing cultural content and yet recent sweeping changes to copyright laws have criminalized the creative act as a violation of corporate rights in a commodified world. Copyright was originally designed to protect publishers, not authors, and has now gained a stranglehold on our ability to transport, read, write, teach and publish digital materials. Contrasting Western models with issues of piracy as practiced in Asia, Digital Prohibition explores the concept of authorship as a capitalist institution and posits the Marxist idea of the multitude (à la Antonio Negri and Michael Hardt, and Paulo Virno) as a new collaborative model for creation in the digital age. Looking at how digital culture has transformed unitary authorship from its book-bound parameters into a collective and dispersed endeavor, Dr. Guertin examines process-based forms as diverse as blogs, Facebook, Twitter, performance art, immersive environments, smart mobs,

hacktivism, tactical media, machinima, generative computer games (like Spore and The Sims) and augmented reality.
