Computer Networking James F. Kurose, Keith W. Ross, 2005 *Computer Networking* provides a top-down approach to this study by beginning with applications-level protocols and then working down the protocol stack. Focuses on a specific motivating example of a network-the Internet-as well as introducing students to protocols in a more theoretical context. New short interlude on putting it all together that follows the coverage of application, transport, network, and datalink layers ties together the various components of the Internet architecture and identifying aspects of the architecture that have made the Internet so successful. A new chapter covers wireless and mobile networking, including in-depth coverage of Wi-Fi, Mobile IP and GSM.

Also included is expanded coverage on BGP, wireless security and DNS. This book is designed for readers who need to learn the fundamentals of computer networking. It also has extensive material, on the very latest technology, making it of great interest to networking professionals.

Chinese Cyberspaces Jens Damm, Simona Thomas, 2006-02-08 The internet is developing more extensively in China than any other country in the world. Chinese Cyberspaces provides multidisciplinary perspectives on recent developments and the consequences of internet expansion in China. Including first-hand research and case studies, the contributors examine the social, political, cultural and economic impact of the internet in China. The book investigates the political implications of China's internet development as well as the effect on China's information policy and overall political stability. The contributors show how although the digital divide has developed along typical lines of gender, urban versus rural, and income, it has also been greatly influenced by the Communist Party's attempts to exert efficient control. This topical and interesting text gives a compelling overview of the

current situation regarding the Chinese internet development in China, while clearly signalling potential future trends.

Handbook of Transnational Crime and Justice Philip Reichel, Jay Albanese, 2013-04-29 Transnational crime and justice will characterize the 21st century in same way that traditional street crimes dominated the 20th century. In the Handbook of Transnational Crime and Justice, Philip Reichel and Jay Albanese bring together top scholars from around the world to offer perspectives on the laws, crimes, and criminal justice responses to transnational crime. This concise, reader-friendly handbook is organized logically around four major themes: the problem of transnational crime; analysis of specific transnational crimes; approaches to its control; and regional geographical analyses. Each comprehensive chapter is designed to be explored as a stand-alone topic, making this handbook an important textbook and reference tool for students and practitioners alike.

Networking Health National Research Council, Commission on Physical Sciences, Mathematics, and Applications, Computer Science and Telecommunications Board, Committee on Enhancing the Internet for Health Applications: Technical Requirements and Implementation Strategies, 2000-07-12 Consumer health websites have garnered considerable media attention, but only begin to scratch the surface of the more pervasive transformations the Internet could bring to health and health care. Networking Health examines ways in which the Internet may become a routine part of health care delivery and payment, public health, health education, and biomedical research. Building upon a series of site visits, this book: Weighs the role of the Internet versus private networks in uses ranging from the transfer of medical images to providing video-based medical consultations at a distance. Reviews technical challenges in the areas of quality of service, security, reliability, and access, and looks at the potential utility of the next generation of online technologies. Discusses ways health care organizations can use the Internet to support their strategic interests and explores barriers to a broader deployment of the Internet. Recommends steps that private and public sector entities can take to enhance the capabilities of the Internet for health purposes and to prepare health care organizations to adopt new Internet-based applications.

The Remarriage Book Peter K. Gerlach, 2003-04-14 Note - links below will take you articles and resources in the nonprofit Break the Cycle! Web site (formerly Stepfamily inFormation). Use your browsers back button to return to Xlibris.com. Love is not enough... Typical new stepparents and bioparents (co-parents) usually find that building a multi-home stepfamily is unexpectedly confusing and conflictual. Most recent stepfamily literature estimates that over half of American co-parents who attempt re/marriage after divorce or mate death ultimately re/divorce psychologically or legally -

despite their love, maturity, commitment, and experience. The / notes that it may be a stepparents first union. This unique guidebook results from 27 years research into why so many U.S. couples re/divorce. It appears that there are five factors that combine to often defeat loves brightest dreams: unseen psychological wounds from childhood in stepfamily adults and kids, and... blocked grief from two or three major sets of losses in some co-parents and/or stepkids; and... co-parent unawareness of (a) their inner family of subselves and related psychological wounds; (b) healthy grieving basics; (c) vital parenting and relationship skills and (d) stepfamily realities; and... These factors and high neediness causing one or both partners to commit to wounded, unaware people (mate + ex mate + stepkids), for the wrong reasons, at the wrong time; and... Little informed co-parent support available in the media and their community. My work as a stepfamily therapist since 1981 suggests that courting and re/married partners can work patiently at 12 Projects together to overcome these five re/marital hazards and forge a strong, nourishing re/marriage

Look Who's Watching Fen Osler Hampson, Eric Jardine, 2016-10-17 The Internet ecosystem is held together by a surprisingly intangible glue – trust. To meet its full potential, users need to trust that the Internet works reliably and efficiently when providing them with the information they are seeking, while also being secure, private and safe. When trust in the Internet wanes, the network's stock of “digital social capital” falls and users begin to alter their online behaviour. These often subtle changes in behaviour tend to be collectively highly maladaptive, hindering the economic, developmental and innovative potential of the globe-spanning network of networks. Look Who's Watching: Surveillance, Treachery and Trust Online confirms in vivid detail that the trust placed by users in the Internet is increasingly misplaced. Edward Snowden's revelations that the United States National Security Agency and other government agencies are spying on Internet users, the proliferation of cybercrime and the growing commodification of user data and regulatory changes – which threaten to fragment the system – are all rapidly eroding the confidence users have in the Internet ecosystem. Based on a combination of illustrative anecdotal evidence and analysis of new survey data, Look Who's Watching clearly demonstrates why trust matters, how it is being eroded and how, with care and deliberate policy action, the essential glue of the Internet can be restored.

Effiziente Gestaltung von virtual communities Stephan Franz Furtner,2002-03-01 Inhaltsangabe:Einleitung: Obwohl die möglichen Auswirkungen des Konzeptes der virtual community auf Wirtschaft und Gesellschaft in den letzten Jahren bereits erkannt und dargelegt wurden, existieren keinerlei Forschungsansätze, in denen die Beziehung zwischen dem Organisator und den Mitgliedern einer virtual community unter Verwendung einer fundierten ökonomischen Theorie analysiert werden. So wird zwar in der Literatur eine mögliche Entlohnung der Mitglieder für die Ausführung der an sie delegierten Tätigkeiten thematisiert; vor welchem theoretischen Hintergrund dies aber geschehen soll, bleibt gleichwohl unklar. Eine virtuelle Gemeinschaft ist genauso wie ihr realweltliches Pendant auf die aktive Partizipation ihrer Mitglieder angewiesen. Nach Hagel/Armstrong stellen Mitglieder und besonders die von ihnen zur Verfügung gestellten Inhalte einen „einzigartigen Aktivposten“ dar und sind somit ein kritischer Faktor für den wirtschaftlichen Erfolg einer virtual community. Die größte Anziehungskraft einer virtuellen Gemeinschaft resultiert in erster Linie aus den Beiträgen der aktiven Mitglieder und erst zweitrangig vom Design der virtual community oder dem redaktionell erstellten Inhalten. „Member participation is seen as a key ingredient in weaving the fabric of a virtual community.“ Der Organisator der virtual community überträgt gewisse Aufgaben an die Mitglieder. Diese Aufgaben umfassen folgende Tätigkeiten: die Veröffentlichung von Erfahrungsberichten und Meinungen, das Anwerben neuer Mitglieder, die Bewertung von Beiträgen anderer Mitglieder, die Ansprache neuer Mitglieder, das „Hosten“ von Chats, und die Verwaltung und Überwachung anderer Mitglieder innerhalb der virtual community. Je mehr das einzelne Mitglied sein Wissen und seine Erfahrung in Beiträgen publiziert und somit der Gemeinschaft zur Verfügung stellt, desto wertvoller ist es für den Aufbau der virtual community und desto größer wird das Wissen (in) der Gemeinschaft. Das primäre Ziel des Organisators einer virtual community (VCO) muss somit darauf ausgerichtet sein, die Online-Partizipation der Mitglieder

(Sammelbegriff für die Aktivitäten eines Mitgliedes in einer virtual community) zu koordinieren, zu unterstützen und zu fördern, dass die Mitglieder ein kollaboratives Verhalten zeigen, Informationen und Wissen austauschen und weitere Mitglieder akquirieren. Das Tätigen von Transaktionen durch Mitglieder im Rahmen der virtual community ist eine Tätigkeit, an der der VCO [...]
