Against The Wall Simon Yates, 2010-04-01 Simon Yates is 'the one who cut the rope' in Joe Simpson's award-winning account of their epic struggle for survival in *Touching the Void*. Afterwards, Yates continued mountaineering on the hardest routes. Perhaps the most testing of all was one of the world's largest vertical rockfaces, the 4, 000-ft East Face of the Central Tower of Paine in Chile. Battered by ferocious storms and almost crippled with fear just below the summit, Yates and his three companions are forced into a nightmare retreat. After resting in a nearby town, they return to complete the climb, but Yates knows he still has to face one of life's greatest challenges...

And secretly, she records her experiences. *The Yellow Wall-Paper* [1892] is the short but intense, Gothic horror story, written as a diary, about a woman in an attic - imprisoned in her gender; by the story. Hartford, Connecticut, was an American feminist theorist, sociologist, novelist, short story writer, poet, and playwright. Her writings are precursors to many later feminist theories. With her radical life attitude, Perkins Gilman has been an inspiration for many generations of feminists in the USA. Her most famous work is the short story *The Yellow Wall-Paper* [1892], written when she suffered from postpartum psychosis.

Case Studies in Parametric Design Jeffrey Collins, 2023-09-28 *Case Studies in Parametric Design* is a guide to scripting digital models for architects, designers, and builders. The use of parametric design in architecture has afforded the realization of incredible built work; modelling software can

resolve complex geometry and aid in the development of stunning creations. Methods for creating the digital models to achieve these results, however, can be perplexing. Learning curves are steep, and benefits garnered from adapting existing workflows to incorporate new tools may appear trivial. This book describes programming techniques for a variety of buildings and provides novices an understanding of language and processes, challenges intermediate users with rigor and intentionality, and offers proficient practitioners objectives beyond novel form-making. The case studies consist of six mass topologies and six facade topologies; each includes sample topology models and scripts, descriptions of steps for generating customizable parametric models, and suggestions for additional modelling inquiries. This is essential reading for students and practitioners interested in harnessing the full potential of parametric design.

Consuming Race Ben Pitcher, 2014-04-09 From the rise of Nordic noir to a taste for street food, from practices of natural gardening to the aesthetics of children's TV, contemporary culture is saturated with racial meanings. By consuming race we make sense of other groups and cultures, communicate our own identities, express our needs and desires, and discover new ways of thinking and being. This book explores how the meanings of race are made and remade in acts of creative consumption. Ranging across the terrain of popular culture, and finding race in some unusual and unexpected places, it offers fresh and innovative ways of thinking about the centrality of race to our lives. *Consuming Race* provides an accessible and highly readable overview of the latest research and a detailed reading of a diverse range of objects, sites and practices. It gives students of

sociology, media and cultural studies the opportunity to make connections between academic debates and their own everyday practices of consumption.

Stripping Wallpaper from the Sky Jules Leigh Koch, 2015-06-04 Written over seven years, Jules Leigh Koch's latest collection depicts people living between pension day and charity. Fringe dwellers whose lives are constructed like origami cranes: defiant, yet quite fragile. Staged in large Australian cities that kaleidoscope between dark back streets and sunlit harbours. The Sociocultural Activity of High Stakes Standardised Language Testing Dawn Karen Booth, 2018-02-26 This book explores the influence of high stakes standardised testing within the context of South Korea. South Korea is regarded as a shining example of success in educational achievement and, as this book reveals, pressurised standardised testing has been a major contributing factor to its success. This unique country provides an excellent setting from which to explore the powerful relationship that exists between testing and learning and can advance our understanding of which factors and test conditions will positively and negatively influence learning. This book follows the test activity of a group of Korean university students preparing for the TOEIC (Test of English for International Communication) and posits a revised model of the influence of testing on learning. It calls for a more socially situated view of tests and test-takers considered in relation to the sociocultural, historical, political and economic contexts in which they are embedded.

Childhood in a Global Perspective Karen Wells, 2015-02-02 The second edition of this compelling and popular book offers a unique global perspective on children's lives throughout the world. It shows how the notion of childhood is being radically re-shaped, in part as a consequence of

globalization. Taking an engaging historical and comparative approach, the book explores social issues such as how children are constituted as raced, classed and gendered subjects; how children's involvement in war is connected to the globalization of capitalism and organized crime; and how school and work operate as sites for the governing of childhood. The book discusses wide-ranging topics including children's rights, the family, children and war, child labour and young people's activism around the globe. In addition to updated literature throughout, the revised edition includes new chapters on migration and trafficking, and the role of play. The book will continue to be of great value to students and scholars in the fields of sociology, geography, social policy and development studies. It will also be a valuable companion to practitioners of international development and social work, as well as to anyone interested in childhood in the contemporary world.

Cybercrime David Wall, 2007-09-17 Looking at the full range of cybercrime, and computer security he shows how the increase in personal computing power available within a globalized communications network has affected the nature of and response to criminal activities. We have now entered the world of low impact, multiple victim crimes in which bank robbers, for example, no longer have to meticulously plan the theft of millions of dollars. New technological capabilities at their disposal now mean that one person can effectively commit millions of robberies of one dollar each. Against this background, David Wall scrutinizes the regulatory challenges that cybercrime poses for the criminal (and civil) justice processes, at both the national and the international levels.
