Handbook of Research on Business Angels Hans Landström, Colin

Mason, 2016-09-28 Business angels are recognized as playing a key role in financing the start-up and early stages of new ventures. However, our knowledge of how business angels operate remains limited and highly fragmented. This Handbook provides a synthesis of research on business angels. It adopts an international perspective to reflect the spread of angel investing around the world. The increasing number of government initiatives to promote angel investing is also reflected in the book with an assessment of the most common support schemes. Adopting an international focus, the expert group of contributors examine business angels themselves, the evolution of the market, the various stages of the investment process and the role of public policy in influencing angel investment. They each conclude their chapters with an agenda for future research on business angels.

Students and scholars of entrepreneurship, entrepreneurial finance and related subjects will find this book to be an invaluable resource for their work. In particular, they will benefit from the research agendas that conclude each chapter. This Handbook will also be of interest to policy-makers and other practitioners looking to enhance their understanding of the design and need for such interventions.

The work addresses both theoretical and practical issues indicated by the broad range of areas covered including: Theorizing a Caribbean Criminology; Juvenile Delinquency and Public Policy; Domestic Violence and the Criminal Justice System; Community Policing, Police Styles and Use of Force; Corrections; Crime Statistics; the Jury System; Drug Trafficking; Terrorism, Social Upheaval and Political Violence and Human Trafficking. Much of the contributions are research and data-driven and overall have policy development as their focus.

This makes the volume suitable for courses in criminology and criminal justice at both the undergraduate and graduate levels as well as for specialist courses in various aspects of policing and law enforcement.

War Imagery in Women's Textiles Deborah A. Deacon, Paula E. Calvin, 2014-06-02 Through the centuries, women have used textiles to express their ideas and political opinions, creating items of utility that also function as works of art. Beginning with medieval European embroideries and tapestries such as the Bayeux Tapestry, this book examines the ways in which women around the world have recorded the impact of war on their lives using traditional fabric art forms of knitting, sewing, quilting, embroidery, weaving, basketry and rug making. Works from the United States, Canada, Latin America, Asia, the Middle and Near East, and Oceania are analyzed in terms of content and utility, and cultural and economic implications for the women who

created them are discussed. Traditional women's work served to document the upheaval in their lives and supplemented their family income. By creating textiles that responded to the chaos of war, women developed new textile traditions, modified old traditions and created a vehicle to express their feelings.

From archaeology to zoology, from dance to technology, the Directory provides information more than 5,500 carefully selected Web sites that represent the best of what the Internet has to offer. Night Hunters William Pace Head, 2014-03-18 In *Night Hunters*, air power historian William P. Head provides the first detailed study of the development and deployment of the AC-130 gunship. While other airframes and other types of close air support (CAS) and interdiction weapon systems preceded or flew with the AC-130s, this four-engine cargo airframe proved to be not only the longest serving fixed-wing gunship but also the most effective by far. During the Vietnam War, the US military developed new tactics and weapons systems to counter a diversity of enemy tactics and geographic features, the difficult climate, and the shifting diplomatic context. One of the most important was the development of the AC-130. Its ability to transport heavier payloads at higher altitudes across longer distances made it the logical choice to be the final Vietnam-era fixed-wing gunship and the only one that continues to fly missions in the twenty-first century. In addition, it employed many of the most advanced weapons, sensors, targeting devices, and fire control systems of the 1970s or of any era. By recounting both the technical development and the combat operations of the plane, and by looking at the proposed alternatives for its use in the War on Terror, *Night Hunters* offers a clear view of the role of gunships and of close air support in US wars. In today's never-ending brushfire wars, the AC-130s continue to uphold their reputation for excellence.
