**Protect Your Digital Privacy!** Glee Harrah Cady, Pat McGregor, 2002 Discusses such electronic privacy concerns as what privacy is, how it relates to individuals, laws and regulations, identity theft, monitoring devices, and how to protect Internet transactions.

**Web Cams For Dummies?** Wallace Wang, 2001-01-15 Web Cams for Dummies provides a detailed look at these hot gadgets! Veteran Dummies author Wally Wang gives users a complete overview of their web cam, including: setting up your web cam, selecting a webcam (for those users buying one after their system purchase), picking and using the software and in-depth coverage of the utility of this great visual tool!

**Math for Real Life** Jim Libby, 2017-01-05 Where are we ever going to use this? Every high school math student has asked this question. Often teachers themselves aren't sure how to respond. One answer is that higher mathematics learned in high school will be essential to learning yet more at the college level. A more satisfactory answer calls for an awareness of how math is applied in many specific areas. Written primarily for teachers, this book presents hundreds of practical applications for mathematics--from baseball statistics to the theory of relativity--that can be understood by anyone with a knowledge of high school algebra, geometry and trigonometry.

**Lunar and Planetary Webcam User's Guide** Martin Mobberley, 2006-08-03 This book demystifies the jargon of webcams and computer processing, and provides detailed hints and tips for imaging the Sun, Moon and planets with a webcam. It demonstrates how inexpensive tools are revolutionizing imaging in amateur astronomy. Anyone with a modest telescope and a webcam can now obtain jaw-dropping lunar and planetary images to rival those taken with mid-range astronomical CCD cameras costing thousands of dollars. A glance through the images in this book shows just what spectacular results can be achieved by using a webcam with your telescope! Your scientific results will be sought by professional astronomers.

**Web-Based Instruction** Susan Sharpless Smith, 2010-07-09 This updated edition of the classic covers new tools and trends, including current browsers, access methods, hardware, and software. Includes tips to secure project funding and provides strategic guidance for all types of libraries.

**Cyber Worship in Multifaith Perspectives** Mohamed Taher, 2006 Cyber Worship in Multifaith Perspectives, as is implied by its name, explores worship (i.e., Prayer, Praise, Scripture, Sacrament, Rituals, Confessions, Eucharist, Rites, Pilgrimages, Reflection, Contemplation, etc.) on the Internet. It is not an 'everything you need to know' guide about the subjects of faith and belief, religions-online, religions on the Net, or religions in cyberspace. Rather, it is a book about religious and spiritual experience under the rubric, cyber worship, which is the variety of ways religious devotion is performed and carried out on the Internet. The term 'Cyber Worship' is a catchall phrase, which includes variants such as online worship, virtual worship, electronic prayer, cyber puja, cyber synagogue, and so on. Dr. Mohamed Taher has thus assembled a quick reference for two groups: those communities that are involved in Cyber Worship and business Webs that collaborate in sustaining wired environments. As such, this book provides an interesting and current perspective on a practice that will continue to grow in the future.

**The Migration of Power and North-South Inequalities** E. Paoletti, 2010-11-17 This book examines negotiations on migration in the Mediterranean. It argues that migration is a bargaining chip which countries in the South use to increase their leverage versus their counterparts in the North. This proposition opens up new understandings reframing relations of inequalities among states.

**The Loch Ness Monster** Lori Hile, 2013 For hundreds of years, people have reported stories of something strange lurking in Loch Ness in Scotland. Are any of these stories true? If so, what could

the monster possibly be? Can science solve the mystery of the Loch Ness monster? Using the scientific method and other information, this book aims to find out.

*Science As Inquiry* Jack Hassard, 2011-03-01 Their eyes light up, they ask good questions, they can explain the concept to other students, and they relate what they learn in class to what happens in the world. That's how students respond to the project-based, cooperative-inquiry Earth, life, environmental, and physical science lessons this book fully describes. Theoretical discussion of constructivist learning introduces the detailed lessons, many of which hinge on reproducible handouts to present a puzzling scientific phenomenon for students to investigate. Grades 5-8. Index. Suggested resources. Illustrated. Good Year Books. 268 pages.

99 Jumpstarts for Kids' Science Research Peggy Whitley, Susan Williams Goodwin, 2005-12-30 This third entry in the Jumpstarts series focuses on Science topics for upper elementary and middle school students. Maintaining the 99 Jumpstarts format of the two previous books, 99 Jumpstarts for Kids Science Research is divided into ten broad topical sections. Each topic is arranged in alphabetical order under its section. Topics include Body Parts, Energy, Animals, Heavens, Weather, Matter, Medicine, Technology, Environment, and Geology. This pathfinder approach aides students in the research process, helping them define important terms, offer beginning questions to help narrow their topic, furnish source ideas and some fun activities to explore each topic. Grades 4-8.

Inventing the Camera Joanne Richter, 2006 With the invention of the camera, the last century and a half has become the most visually documented age in history. This fascinating book describes in simple terms how a camera works and identifies the inventors who helped develop this important technology. Topics include - the first cameras and the birth of photography - the marketing industry and big players - advances in film, lenses, flashes and color photos - some of the world's most famous photographers Teacher's guide available.

**Webcam** Daniel Miller, Jolynna Sinanan, 2014-03-12 The use of webcam, especially through Skype, has recently become established as one more standard media technology, but so far there has been no attempt to assess its fundamental nature and consequences. Yet webcam has profound implications for many facets of human life, from self-consciousness and intimacy to the sustaining of long-distance relationships and the place of the visual within social communications. Based on research in London and Trinidad, this book shows how 'always-on' webcam is becoming an entirely different phenomenon from the initial use of webcam as a videophone. Webcam is examined within the framework of 'polymedia' - that is, the new environments created by the simultaneous presence of a multiplicity of communication technologies - and used to exemplify a theory of attainment that accepts media technologies as aspects of, rather than detracting from, our basic humanity.

Sharing a Vision Dezhen Song, 2009-01-17 By the dawn of the new millennium, robotics has undergone a major transformation in scope and dimensions. This expansion has been brought about by the maturity of the field and the advances in its related technologies. From a largely dominant industrial focus, robotics has been rapidly expanding into the challenges of the human world. The new generation of robots is expected to safely and dependably co-habitat with humans in homes, workplaces, and communities, providing support in services, entertainment, education, healthcare, manufacturing, and assistance. Beyond its impact on physical robots, the body of knowledge robotics has produced is revealing a much wider range of applications reaching across diverse research areas and scientific disciplines, such as: biomechanics, haptics, neuroscience, virtual simulation, animation, surgery, and sensor networks among others. In return, the challenges of the new emerging areas are proving an abundant source of stimulation and insights for the field of robotics. It is indeed at the intersection of disciplines that the most striking advances happen. The goal of the series of Springer Tracts in Advanced Robotics (STAR) is to bring, in a timely fashion, the latest advances and developments in robotics on the basis of their significance and quality. It is our hope that the wider dissemination of research developments will stimulate more exchanges and collaborations among the research community and contribute to further advancement of this rapidly growing field.

*Technobiophilia* Sue Thomas, 2013-09-26 Why are there so many nature metaphors - clouds, rivers, streams, viruses, and bugs - in the language of the internet? Why do we adorn our screens with exotic images of forests, waterfalls, animals and beaches? In *Technobiophilia: Nature and Cyberspace*, Sue Thomas interrogates the prevalence online of nature-derived metaphors and imagery and comes to a surprising conclusion. The root of this trend, she believes, lies in biophilia, defined by biologist E.O. Wilson as 'the innate attraction to life and lifelike processes'. In this wide-ranging transdisciplinary study she explores the strong thread of biophilia which runs through our online lives, a phenomenon she calls 'technobiophilia', or, the 'innate attraction to life and lifelike processes as they appear in technology'. The restorative qualities of biophilia can alleviate mental fatigue and enhance our capacity for directed attention, soothing our connected minds and easing our relationship with computers. *Technobiophilia: Nature and Cyberspace* offers new insights on what is commonly known as 'work-life balance'. It explores ways to make our peace with technology-induced anxiety and achieve a 'tech-nature balance' through practical experiments designed to enhance our digital lives indoors, outdoors, and online. The book draws on a long history of literature on nature and technology and breaks new ground as the first to link the two. Its accessible style will attract the general reader, whilst the clear definition of key terms and concepts throughout should appeal to undergraduates and postgraduates of new media and communication studies, internet studies, environmental psychology, and human-computer interaction. **Moving Images** John Fullerton, Astrid Söderbergh Widding, 2000-06-22 Seventeen essays examining the impact of new media on the history of cinema. In 1888, Thomas Edison announced that he was experimenting on "an instrument which does for the eye what the phonograph does for the ear, which is the recording and reproduction of things in motion." Just as Edison's investigations were framed in terms of the known technologies of the phonograph and the microscope, the essays in this collection address the contexts of innovation and reception that have framed the development of moving images in the last one hundred years. Three concerns are of particular interest: the contexts of innovation and reception for moving image technologies; the role of the observer, whose vision and cognitive processes define some of the limits of inquiry and epistemological insight; and the role of new media, which, engaging with the domestic sphere as cultural interface, are transforming our understanding of public and private spheres. The seventeen previously unpublished essays in *Moving Images* represent the best of current research in the history of this field. They make a timely and stimulating contribution to debates concerning the impact of new media on the history of cinema. Contributors include: William Boddy, Carlos Bustamante, Warren Buckland, Valeria Camporesi, Bent Fausing, Oliver Gaycken, Alison Griffiths, Christopher Hales, Jan Holmberg, Solveig Jülich, Frank Kessler, Jay Moman, Sheila C. Murphy, Pelle Snickars, Paul C. Spehr, Björn Thuresson, and Åke Walldius.

**Encyclopedia of Computer Science and Technology** Harry Henderson, 2009 Presents an illustrated A-Z encyclopedia containing approximately 600 entries on computer and technology related topics.

*Caribbean Islands Cruising Guide* Michael Briant, 2018-07-05 The Caribbean is probably the biggest and best cruising ground in the world. Wonderful climate, beautiful islands, nice people and for the most part very inexpensive. With predictable weather and such good sailing winds it makes the Mediterranean look like a very poor relation. This book details how to get there and how to get home plus details of all the Island groups and anchorages. Pictures and chart details together with descriptions of the islands. Contents: 1. Overview (Equipment, timing, seasons and main cruising routes) 2. Getting there (From Europe and USA) 3. Trinidad and Tobago 4. Grenada & Grenadines 5. St Lucia to Dominica and Indian River 6. The Saints & Guadeloupe 7. Antigua to St Martin 8. The Virgin Islands 9. Trinidad to Venezuela and ABC Islands 10. Route back to the USA (via the Bahamas) 11. Route back to Europe (Via Bermuda and or Azores to Gib and Solent)

The Webcam as an Emerging Cinematic Medium Paula Albuquerque, 2018 Paula Albuquerque's original research and experimental films, presented in this book, expose fictionalising elements in archival webcams and explore video surveillance as an urban condition.

Bald Eagles In The Wild Jeffrey Rich, 2018-05-01 The majestic Bald Eagle was adopted in 1782 as America's official bird. It has historically been a symbol of freedom and patriotism in the United States of America, and for good reason. The bird is associated with authority and has a fierce beauty that speaks to those who look upon it. Today, the Bald Eagle is a protected species. Once on the brink of extinction, it is currently enjoying a comeback. In this book, wildlife and bird photography specialist Jeffrey Rich showcases over 150 of his storytelling photographs of Bald Eagles and shares insights into the birds' habitat, feeding habits, mating patterns, the care of their young, and more. Readers will marvel over images of birds in flight, in nests with their young, at rest, preening, and capturing prey, as Rich chronicles the daily lives, in detail, of America's favorite bird.
