Multiple Classifier Systems Neamat El Gayar,Josef Kittler,Fabio Roli,2010-03-25 This book constitutes the proceedings of the 9th International Workshop on Multiple Classifier Systems, MCS 2010, held in Cairo, Egypt, in April 2010. The 31 papers presented were carefully reviewed and selected from 50 submissions. The contributions are organized into sessions dealing with classifier combination and classifier selection, diversity, bagging and boosting, combination of multiple kernels, and applications.

Information Retrieval Technology Hang Li,Ting Liu,Wei-Ying Ma,Tetsuya Sakai,Kam-Fai Wong,Guodong Zhou,2008-05-28 This book constitutes the thoroughly refereed post-conference proceedings of the 4th Asia Information Retrieval Symposium, AIRS 2008, held in Harbin, China, in May 2008. The 39 revised full papers and 43 revised poster papers presented were carefully reviewed and selected from 144 submissions. All current issues in information retrieval are addressed: applications, systems, technologies and theoretical aspects of information retrieval in text, audio, image, video and multi-media data. The papers are organized in topical sections on IR models image retrieval, text classification, chinese language processing, text processing, application of IR, machine learning, taxonomy, IR methods, information extraction, summarization, multimedia, Web IR, and text clustering.

Propensity Score Analysis Wei Pan,Haiyan Bai,2015-04-07 This book is designed to help researchers better design and analyze observational data from quasi-experimental studies and improve the validity of research on causal claims. It provides clear guidance on the use of different propensity score analysis (PSA) methods, from the fundamentals to complex, cutting-edge techniques. Experts in the field introduce underlying concepts and current issues and review relevant

software programs for PSA. The book addresses the steps in propensity score estimation, including the use of generalized boosted models, how to identify which matching methods work best with specific types of data, and the evaluation of balance results on key background covariates after matching. Also covered are applications of PSA with complex data, working with missing data, controlling for unobserved confounding, and the extension of PSA to prognostic score analysis for causal inference. User-friendly features include statistical program codes and application examples. Data and software code for the examples are available at the companion website (www.guilford.com/pan-materials).

English as a Medium of Instruction on the Arabian Peninsula Mark Wyatt,Glenda El Gamal,2023-03-15 Focusing on English as a Medium of Instruction (EMI) in the Arab Gulf states, the authors consider both sociolinguistic and pedagogical perspectives, and explore practical implications. This edited volume features chapters covering how teachers are negotiating the linguistic challenges posed by EMI; issues of ownership, choice and agency; the scaffolding of

academic literacies; how to support the development of content teachers' pedagogical content knowledge in EMI settings as well as the benefits of a bilingual education. Chapter authors all have extensive local experience that they draw upon reflectively in their writing. Policy-makers, teachers and teacher educators wondering how they can best balance the need to develop competence in English in students of all ages on the Arabian Peninsula in a globalizing world, together with the concern to nurture Arabic language, culture and identity, will gain rich insights from this book. Postgraduates and researchers exploring issues surrounding EMI, both locally and internationally, will benefit from the arguments presented in this volume.

Propensity Score Analysis Shenyang Guo, Mark W. Fraser, 2015 Provides readers with a systematic review of the origins, history, and statistical foundations of Propensity Score Analysis (PSA) and illustrates how it can be used for solving evaluation and causal-inference problems.

Credit Data and Scoring Eric Rosenblatt, 2020-01-07 Credit Data and Scoring: The First Triumph of Big Data and Big Algorithms illuminates the often-hidden practice of predicting an individual's

economic responsibility. Written by a leading practitioner, it examines the international implications of US leadership in credit scoring and what other countries have learned from it in building their own systems. Through its comprehensive contemporary perspective, the book also explores how algorithms and big data are driving the future of credit scoring. By revealing a new big picture and data comparisons, it delivers useful insights into legal, regulatory and data manipulation. Provides insights into credit scoring goals and methods Examines U.S leadership in developing credit data and algorithms and how other countries depart from it Analyzes the growing influence of algorithms in data scoring

English Language Assessment and the Chinese Learner Liying Cheng, Andy Curtis, 2010-03-17 Building on current theoretical and practical frameworks for English language assessment and testing, this book presents a comprehensive, up-to-date, relevant picture of English language assessment for students in China (Mainland China, Hong Kong and Taiwan) and for Chinese learners of English around the world.

Politics in China William A. Joseph, 2014-03-14 On October 1, 2009, the People's Republic of China (PRC) celebrated the 60th anniversary of its founding. And what an eventful and tumultuous six decades it had been. During that time, under the leadership of the Chinese Communist Party (CCP), China was transformed from one of the world's poorest countries into the world's fastest growing major economy, and from a weak state barely able to govern or protect its own territory to a rising power that is challenging the United States for global influence. Over those same years, the PRC also experienced the most deadly famine in human history, caused largely by the actions and inactions of its political leaders. Not long after, there was a collapse of government authority that pushed the country to the brink of (and in some places actually into) civil war and anarchy. Today, China is, for

the most part, peaceful, prospering, and proud. This is the China that was on display for the world to see during the Beijing Olympics in 2008. The CCP maintains a firm grip on power through a combination of popular support largely based on its recent record of promoting rapid economic growth and harsh repression of political opposition. Yet, the party and country face serious challenges on many fronts, including a slowing economy, environmental desecration, pervasive corruption, extreme inequalities, and a rising tide of social protest. Politics in China is an authoritative introduction to how the world's most populous nation and rapidly rising global power is governed today. Written by leading China scholars, the book's chapters offers accessible overviews of major periods in China's modern political history from the mid-nineteenth century to the present, key topics in contemporary Chinese politics, and developments in four important areas located on China's geographic periphery: Tibet, Xinjiang, Hong Kong, and Taiwan.

Modeling Financial Time Series with S-PLUS Eric Zivot, Jiahui Wang, 2013-11-11 The field of financial econometrics has exploded over the last decade This book represents an integration of theory, methods, and examples using the S-PLUS statistical modeling language and the S+FinMetrics module to facilitate the practice of financial econometrics. This is the first book to show the power of S-PLUS for the analysis of time series data. It is written for researchers and practitioners in the finance industry, academic researchers in economics and finance, and advanced MBA and graduate students in economics and finance. Readers are assumed to have a basic knowledge of S-PLUS and a solid grounding in basic statistics and time series concepts. This Second Edition is updated to cover S+FinMetrics 2.0 and includes new chapters on copulas, nonlinear regime switching models, continuous-time financial models, generalized method of moments, semi-nonparametric conditional density models, and the efficient method of moments. Eric Zivot is an associate professor and Gary

Waterman Distinguished Scholar in the Economics Department, and adjunct associate professor of finance in the Business School at the University of Washington. He regularly teaches courses on econometric theory, financial econometrics and time series econometrics, and is the recipient of the Henry T. Buechel Award for Outstanding Teaching. He is an associate editor of *Studies in Nonlinear Dynamics and Econometrics*. He has published papers in the leading econometrics journals, including *Econometrica*, *Econometric Theory*, the *Journal of Business and Economic Statistics*, *Journal of Econometrics*, and the *Review of Economics and Statistics*. Jiahui Wang is an employee of Ronin Capital LLC. He received a Ph.D. in Economics from the University of Washington in 1997. He has published in leading econometrics journals such as *Econometrica* and *Journal of Business and Economic Statistics*, and is the Principal Investigator of National Science Foundation SBIR grants. In 2002 Dr. Wang was selected as one of the 2000 Outstanding Scholars of the 21st Century by International Biographical Centre.

Statistical Challenges in Assessing and Fostering the Reproducibility of Scientific Results National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Board on Mathematical Sciences and Their Applications, Committee on Applied and Theoretical Statistics, 2016-03-29 Questions about the reproducibility of scientific research have been raised in numerous settings and have gained visibility through several high-profile journal and popular press articles. Quantitative issues contributing to reproducibility challenges have been considered (including improper data measurement and analysis, inadequate statistical expertise, and incomplete data, among others), but there is no clear consensus on how best to approach or to minimize these problems. A lack of reproducibility of scientific results has created some distrust in scientific findings among the general public, scientists, funding agencies, and industries. While studies fail for a variety

of reasons, many factors contribute to the lack of perfect reproducibility, including insufficient training in experimental design, misaligned incentives for publication and the implications for university tenure, intentional manipulation, poor data management and analysis, and inadequate instances of statistical inference. The workshop summarized in this report was designed not to address the social and experimental challenges but instead to focus on the latter issues of improper data management and analysis, inadequate statistical expertise, incomplete data, and difficulties applying sound statistic inference to the available data. Many efforts have emerged over recent years to draw attention to and improve reproducibility of scientific work. This report uniquely focuses on the statistical perspective of three issues: the extent of reproducibility, the causes of reproducibility failures, and the potential remedies for these failures.

Feature Extraction Isabelle Guyon, Steve Gunn, Masoud Nikravesh, Lofti A. Zadeh, 2008-11-16
This book is both a reference for engineers and scientists and a teaching resource, featuring tutorial chapters and research papers on feature extraction. Until now there has been insufficient consideration of feature selection algorithms, no unified presentation of leading methods, and no systematic comparisons.

From Antietam to Appomattox with Upton's Regulars Dewitt Clinton Beckwith, 2023-05-12
Thirty years after the Civil War, the 121st New York Volunteers (Upton's Regulars) finally published a history of their regiment. Its stated author was a man who had not served directly with the 121st but had based the book on a memoir written by a survivor who had enlisted at age 15. That boy, Dewitt Clinton Beckwith, published his memoir thirty years after the war in an obscure upstate New York newspaper, The Hekrimer Democrat. For years, the origin story lay hidden in plain sight, until editor Salvatore Cilella discovered it while researching for a regimental history. The original 53 weekly

installments, edited and annotated here, richly detail the horrors and folly of war. They reveal the slow maturation of a boy thrust into almost four years of war. Beckwith was present at nearly all the historic Eastern Theater engagements from Antietam to Appomattox, including an abortive stint with the 91st New York in Florida in 1861. He describes his various Tom Sawyer-like adventures with the VI Corps of the Army of the Potomac, dealing with death, disease, loss and ultimate elation at Lee's surrender, tempered only by Abraham Lincoln's death.

The Fabric of the Cosmos Brian Greene,2007-12-18 NATIONAL BESTSELLER • From one of the world's leading physicists and author of the Pulitzer Prize finalist The Elegant Universe, comes “an astonishing ride” through the universe (The New York Times) that makes us look at reality in a completely different way. Space and time form the very fabric of the cosmos. Yet they remain among the most mysterious of concepts. Is space an entity? Why does time have a direction? Could the universe exist without space and time? Can we travel to the past? Greene has set himself a daunting task: to explain non-intuitive, mathematical concepts like String Theory, the Heisenberg Uncertainty Principle, and Inflationary Cosmology with analogies drawn from common experience. From Newton's unchanging realm in which space and time are absolute, to Einstein's fluid conception of spacetime, to quantum mechanics' entangled arena where vastly distant objects can instantaneously coordinate their behavior, Greene takes us all, regardless of our scientific backgrounds, on an irresistible and revelatory journey to the new layers of reality that modern physics has discovered lying just beneath the surface of our everyday world.
