The WEIRDest People in the World Joseph Henrich,2020-09-08 A New York Times Notable Book of 2020 A Bloomberg Best Non-Fiction Book of 2020 A Behavioral Scientist Notable Book of 2020 A Human Behavior & Evolution Society Must-Read Popular Evolution Book of 2020 A bold, epic account of how the co-evolution of psychology and culture created the peculiar Western mind that has profoundly shaped the modern world. Perhaps you are WEIRD: raised in a society that is Western, Educated, Industrialized, Rich, and Democratic. If so, you're rather psychologically peculiar. Unlike much of the world today, and most people who have ever lived, WEIRD people are highly individualistic, self-obsessed, control-oriented, nonconformist, and analytical. They focus on themselves—their attributes, accomplishments, and aspirations—over their relationships and social roles. How did WEIRD populations become so psychologically distinct? What role did these psychological differences play in the industrial revolution and the global expansion of Europe during the last few centuries? In The WEIRDest People in the World, Joseph Henrich draws on cutting-edge research in anthropology, psychology, economics, and evolutionary biology to explore these questions and more. He illuminates the origins and evolution of family structures, marriage, and religion, and the profound impact these cultural transformations had on human psychology. Mapping these shifts through ancient history and late antiquity, Henrich reveals that the most fundamental institutions of kinship and marriage changed dramatically under pressure from the Roman

Catholic Church. It was these changes that gave rise to the WEIRD psychology that would coevolve with impersonal markets, occupational specialization, and free competition—laying the foundation for the modern world. Provocative and engaging in both its broad scope and its surprising details, *The WEIRDest People in the World* explores how culture, institutions, and psychology shape one another, and explains what this means for both our most personal sense of who we are as individuals and also the large-scale social, political, and economic forces that drive human history. Includes black-and-white illustrations.

Weirder Shadows Over Innsmouth Stephen Jones, 2015-02-28 Respected horror anthologist Stephen Jones edits this collection of 17 stories inspired by the 20th century's master of horror, H.P. Lovecraft's *The Shadow Over Innsmouth*, in which a young man goes to an isolated, desolate fishing village in Massachusetts, and finds that the entire village has interbred with strange creatures that live beneath the sea, and worship ancient gods.

The Falcon Thief Joshua Hammer, 2021-02-16 A “well-written, engaging detective story” (Kirkus Reviews, starred review) about a rogue who trades in rare birds and their eggs—and the wildlife detective determined to stop him. On May 3, 2010, an Irish national named Jeffrey Lendrum was apprehended at Britain's Birmingham International Airport with a suspicious parcel strapped to his stomach. Inside were fourteen rare peregrine falcon eggs snatched from a remote cliffside in Wales. So begins a “vivid tale of obsession and international derring-do” (Publishers Weekly), following the parallel lives of a globe-trotting smuggler who spent two decades capturing endangered raptors worth millions of dollars as race champions—and Detective Andy McWilliam of the United Kingdom's National Wildlife Crime Unit, who's hell bent on protecting the world's birds of prey. “Masterfully constructed” (The New York Times) and “entertaining and illuminating” (The Washington Post), *The Falcon Thief* will whisk you away from the volcanoes of Patagonia to Zimbabwe's Matobo National Park, and from the frigid tundra near the Arctic Circle to luxurious aviaries in the deserts of Dubai, all in pursuit of a man who is reckless, arrogant, and gripped by a destructive compulsion to make the most beautiful creatures in nature his own. It's a story that's part true-crime narrative, part epic adventure—and wholly unputdownable until the very last page.

Poe for Your Problems Catherine Baab-Muguira, 2021-09-07 When life's got you down and things aren't going your way, who better to turn to than Edgar Allan Poe? Discover how to say nevermore to your problems in this darkly comedic and refreshing self-help guide. Of all the writers anywhere, Poe would seem to be the least likely person you'd want to turn to for advice. His life was a complete dumpster fire: he had tons of failed relationships; not many people liked him; he was a drunk; he was always broke; he often went hungry; even his own death was somewhat of a mystery. However, that's also precisely the point. Somehow, even when Poe failed, he also persevered. Drawing deeply on his works and life, Catherine Baab-Muguira takes the familiar image of Poe in a new and surprising direction in this darkly inspiring self-help book. Despite what you might think, Edgar Allan Poe somehow is the perfect person to teach you to say Nevermore, problems! and show you how to use all the terrible situations, tough breaks, bad luck, and even your darkest emotions in novel and creative ways to make a name for yourself and carve out your own unique, notorious place in the world. An inspirational tale for black sheep everywhere, *Poe for Your Problems* will teach you how to overcome life's biggest challenges and succeed at work, love, and art—despite the odds and no matter your flaws.

Confessions of a Recovering Environmentalist and Other Essays Paul Kingsnorth, 2017-08-01 A provocative and urgent essay collection that asks how we can live with hope in “an age of ecocide” Paul Kingsnorth was once an activist—an ardent environmentalist. He fought against rampant development and the depredations of a corporate world that seemed hell-bent on ignoring a looming climate crisis in its relentless pursuit of profit. But as the environmental movement began to focus on “sustainability” rather than the defense of wild places for their own sake and as global conditions worsened, he grew disenchanted with the movement that he once embraced. He gave up what he saw as the false hope that residents of the First World would ever make the kind of sacrifices that might avert the severe consequences of climate change. Full of grief and fury as well as passionate, lyrical evocations of nature and the wild, *Confessions of a Recovering Environmentalist* gathers the wave-making essays that have charted the change in Kingsnorth's thinking. In them he articulates a new vision that he calls “dark ecology,” which stands firmly in opposition to the belief that technology can save us, and he argues for a renewed balance between the human and nonhuman worlds. This iconoclastic, fearless, and ultimately hopeful book, which includes the much-discussed “Uncivilization” manifesto, asks hard questions about how we've lived and how we should live.

The Origin of Consciousness in the Breakdown of the Bicameral Mind Julian Jaynes, 2000-08-15 National Book Award Finalist: “This man's ideas may be the most influential, not to say controversial, of the second half of the twentieth century.”—Columbus Dispatch At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. “Don't be put off by the academic title of Julian Jaynes's *The Origin of Consciousness in the Breakdown of the Bicameral Mind*. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor.”—The New York Times “When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis.”—John Updike,

The New Yorker “He is as startling as Freud was in *The Interpretation of Dreams*, and Jaynes is equally as adept at forcing a new view of known human behavior.”—American Journal of Psychiatry

An authoritative Introduction by Strong makes this an outstanding edition. Select Bibliography and Index.

The Redemption of Time Baoshu, 2019-07-16 Set in the universe of the New York Times bestselling *Three-Body Problem* trilogy, *The Redemption of Time* continues Cixin Liu’s multi-award-winning science fiction saga. This original story by Baoshu—published with Liu’s support—envisions the aftermath of the conflict between humanity and the extraterrestrial Trisolarans. Captured and tortured beyond endurance for decades, Yun eventually succumbed to helping the aliens subjugate humanity in order to save Earth from complete destruction. Granted a healthy clone body by the Trisolarans, Yun has spent his very long life in exile as a traitor to the human race. Nearing the end of his existence at last, he suddenly receives another reprieve—and another regeneration. Ball Lightning Cixin Liu, 2018-08-14 From the New York Times bestselling author of the *Three-Body Trilogy*, Cixin Liu's *Ball Lightning* is the story of what happens when the beauty of scientific inquiry runs up against the drive to harness new discoveries with no consideration of their possible consequences. When Chen’s parents are incinerated before his eyes by a blast of ball lightning, he devotes his life to cracking the secret of this mysterious natural phenomenon. His search takes him to stormy mountaintops, an experimental military weapons lab, and an old Soviet science station. The more he learns, the more he comes to realize that ball lightning is just the tip of an entirely new frontier. While Chen’s quest for answers gives purpose to his lonely life, it also pits him against soldiers and scientists with motives of their own: a beautiful army major with an obsession with dangerous weaponry, and a physicist who has no place for ethical considerations in his single-minded pursuit of knowledge. Wildly imaginative.—Barack Obama on *The Three-Body Problem* trilogy Tor books by Cixin Liu *The Remembrance of Earth's Past* #1 *The Three-Body Problem* #2 *The Dark Forest* #3 *Death's End* At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Fabric of the Cosmos Brian Greene, 2007-12-18 NATIONAL BESTSELLER • From one of the world’s leading physicists and author of the Pulitzer Prize finalist *The Elegant Universe*, comes “an astonishing ride” through the universe (*The New York Times*) that makes us look at reality in a completely different way. Space and time form the very fabric of the cosmos. Yet they remain among the most mysterious of concepts. Is space an entity? Why does time have a direction? Could the universe exist without space and time? Can we travel to the past? Greene has set himself a daunting task: to explain non-intuitive, mathematical concepts like String Theory, the Heisenberg Uncertainty Principle, and Inflationary Cosmology with analogies drawn from common experience. From Newton’s unchanging realm in which space and time are absolute, to Einstein’s fluid conception of spacetime, to quantum mechanics’ entangled arena where vastly distant objects can instantaneously coordinate their behavior, Greene takes us all, regardless of our scientific backgrounds, on an irresistible and revelatory journey to the new layers of reality that modern physics has discovered lying just beneath the surface of our everyday world.

Unhealthy Profits John Lister, 2018-11-19 The Private Finance Initiative (PFI) ? the use of private funds to build public sector infrastructure ? began in 1992. Since then it has been one of the most contentious policies advocated by both Conservative and Labour governments. After 25 years of costly failure the policy has now been abandoned by Labour and Tory parties. 125 British PFIs are NHS projects, which will cost over ?80 billion for buildings built for ?12bn. Many PFI companies are now owned offshore, paying no tax on profits, while the extra costs of PFI hang like a millstone dragging down NHS trusts. *Unhealthy Profits* explores the theory and practice, costs and consequences of PFI, how it has spread world-wide, and what can be done about it. And as a unique case study, it tells the story of the UNISON Branch in Mid Yorkshire Hospitals Trust that has commissioned the book ? and fought PFI all the way.

Echopraxia Peter Watts, 2014-08-26 Prepare for a different kind of singularity in Peter Watts' *Echopraxia*, the follow-up to the Hugo-nominated novel *Blindsight* It's the eve of the twenty-second century: a world where the dearly departed send postcards back from Heaven and evangelicals make scientific breakthroughs by speaking in tongues; where genetically engineered vampires solve problems intractable to baseline humans and soldiers come with zombie switches that shut off self-awareness during combat. And it's all under surveillance by an alien presence that refuses to show itself. Daniel Bruks is a living fossil: a field biologist in a world where biology has turned computational, a cat's-paw used by terrorists to kill thousands. Taking refuge in the Oregon desert, he's turned his back on a humanity that shatters into strange new subspecies with every heartbeat. But he awakens one night to find himself at the center of a storm that will turn all of history inside-out. Now he's trapped on a ship bound for the center of the solar system. To his left is a grief-stricken soldier, obsessed by whispered messages from a dead son. To his right is a pilot who hasn't yet found the man she's sworn to kill on sight. A vampire and its entourage of zombie bodyguards lurk in the shadows behind. And dead ahead, a handful of rapture-stricken monks takes them all to a meeting with something they will only call The Angels of the Asteroids. Their pilgrimage brings Dan Bruks, the fossil man, face-to-face with the biggest evolutionary breakpoint since the origin of thought itself.
