**Language Variation □ European perspectives II** Stavroula Tsiplakou, Marilena Karyolemou, Pavlos Pavlou, 2009-11-19 This volume contains a selection of papers from the 4th International Conference on Language Variation in Europe (ICLaVE 4), which was held at the University of Cyprus from June 17th-19th 2007. The variety of theoretical frameworks and methodological perspectives (from Generative Grammar, Word Grammar, Government Phonology, Optimality Theory and Distributed Morphology to quantitative, Labovian and ethnographic approaches to variation and change, real and apparent time studies, phonetic analysis and metatheoretical papers on quantitative analysis), as well as the sheer number of linguistic varieties examined, attest both to the breadth and scope of the conference and to its status as a meeting-place for synchronic and diachronic linguistic description and theoretical exploration. One of the major themes running through the volume is the explicit concern with methodological refinement. Almost all the contributions address issues of methodology in various aspects of data collection and analysis, be they questionnaire surveys and interview data, spoken or written corpora, real- and apparent-time studies, dialect atlases and maps, statistical models or software. Alongside methodological issues, and especially with regard to the treatment of historical data, many of the papers in the volume explicitly address theoretical issues, for example the relative weighting of linguistic/systemic, cognitive and discourse factors in the exploration of language variation and change.

MCSA/MCSE Managing and Maintaining a Windows Server 2003 Environment (Exam 70-290) Syngress, 2003-12-09 MCSA/MCSE Managing and Maintaining a Windows Server 2003 Environment: Exam 70-290 Study Guide and DVD Training System is a one-of-a-kind integration of text, DVD-quality instructor led training, and Web-based exam simulation and remediation. In June, 2003 Microsoft will launch beta exams for the

Windows Server 2003 certification line. Exams will likely go live the following August and September. This launch is a comprehensive revamping of the MCSE (Microsoft Certified System Engineer) track with all new core exams and all new electives. In addition, the MCSA (Microsoft Certified System Administrator) certification will expand its program to include an additional upgrade exam for MCSAs wanting to become MCSEs. The launch of this new certification track means that all current MCSEs, representing an installed base of approximately 200,000 (source: MCP Magazine) will need to recertify under Windows Server 2003. In addition, any MCP looking to become an MCSE--estimates are about 1.2 million (source: MCP Magazine)--will also have to continue their certifications under the new program. Many industry experts expect the Windows 2003 certification, and product line as well, to be a more popular track since many organizations are still using NT and plan to skip 2000 and go directly to 2003. \* DVD Provides a Virtual Classroom: Get the benefits of instructor led training at a fraction of the cost and hassle. \* Guaranteed Coverage of All Exam Objectives: If the topic is listed in Microsoft's Exam 70-290 objectives, it is covered here. \* Fully Integrated Learning: This system includes a study guide, DVD training and Web-based practice exams.

*Race, Ethnicity, and Place in a Changing America, Third Edition* John W. Frazier, Eugene L. Tettey-Fio, Norah F. Henry, 2017-01-12 Uses both historical and contemporary case studies to examine how race and ethnicity affect the places we live, work, and visit. This book examines major Hispanic, African, and Asian diasporas in the continental United States and Puerto Rico from the nineteenth century to the present, with particular attention on the diverse ways in which these immigrant groups have shaped and reshaped American places and landscapes. Through both historical and contemporary case studies, the contributors examine how race and ethnicity affect the places we live, work, and visit, illustrating along the way the behaviors and concepts that comprise the modern ethnic and racial geography of immigrant and minority groups. While primarily addressed to students and scholars in the fields of racial and ethnic geography, these case studies will be accessible to anyone interested in race-place connections, race-ethnicity boundaries, the development of racialization, and the complexity of human settlement patterns and landscapes that make up the United States and Puerto Rico. Taken together, they show how individuals and culture groups, through their ideologies, social organization, and social institutions, reflect both local and regional processes of place-making and place-remaking that occur within and beyond the continental United States.
