Justice for Sale Gary Stein, 2023-07-01 Martin T. Manton was a corrupt federal appeals court judge in New York who was convicted in 1939 and sent to prison. At the time, this was a hugely important story: Manton was considered the highest-ranking judge in the United States after the nine Justices of the Supreme Court, and was nearly appointed to that august body in 1922. Yet his story has never been told in book-length form before, and never with the benefit of such exhaustive research. More than just a biography, *Justice for Sale* examines Manton's misconduct in the context of the culture of corruption and organized crime that permeated New York City in the first part of the twentieth century. Dozens of others--prominent business executives, leading Wall Street lawyers, accountants, bankers, fixers, con men, another federal judge--participated in Manton's crimes. The book profiles these unscrupulous and often colorful characters as well. It wasn't until Manhattan D.A. and future presidential candidate Thomas Dewey's successful pursuit of Manton, a federal grand jury investigation, and a sensational prosecution and trial in federal court that shocked the nation that Manton and his corrupt schemes were finally brought down.

Facebook Nation Newton Lee, 2014-10-16 Facebook's psychological experiments and Edward Snowden's NSA leaks epitomize a world of increasing information awareness in the social media ecosystem. With over a billion monthly active users, Facebook as a nation is overtaking China as the largest country in the world. President Barack Obama, in his 2011 State of the Union Address, called America "the nation of Edison and the Wright brothers" and "of Google and Facebook." U.S. Chief Information Officer Steven VanRoekel opines that America has become a "Facebook nation" that demands increased transparency and interactivity from the federal government. Ubiquitous social networks such as Facebook, Google+, Twitter, and YouTube are creating the technologies, infrastructures, and big data necessary for Total Information Awareness -- a controversial surveillance program proposed by DARPA after the 9/11 attacks. NSA's secret PRISM program has reinvigorated WikiLeaks founder Julian Assange's accusation that "Facebook is the most appalling spying machine that has ever been invented." Facebook CEO Mark Zuckerberg once said, "We exist at the intersection of technology and social issues." This book offers discourse and practical advice on the privacy issue in the age of big data, business intelligence in social media, e-government and e-activism, as well as personal total information awareness. This expanded edition also includes insights from Wikipedian Emily Temple-Wood and Facebook ROI experts Dennis Yu and Alex Houg.

Xhtml Jitendra Patel, 2013-05-22 XHTML XHTML is a markup language for Web pages from the W3C (World Wide Web Consortium). XHTML combines HTML and XML into a single format (HTML 4.0 and XML 1.0). Like XML, XHTML can be extended with proprietary tags. Also like XML, XHTML must be coded more rigorously than HTML. Over the years, HTML coders have become sloppy, because Web browser software was originally written to tolerate many variations in HTML coding, but, with XHTML, coders must conform to the XML rules. In one sentence we can say that XHTML is a superset of HTML, but unlike HTML it is stricter to rules and requires a document to follow XML rules. Whereas HTML is an application of SGML, a very flexible markup language, XHTML is an application of XML, a more restrictive subset of SGML. Because they need to be well-formed, true XHTML documents allow for automated processing to be performed using standard XML tools unlike HTML, which requires a relatively complex, lenient, and generally custom parser. XHTML can be thought of as the intersection of HTML and XML in many respects, since it is a reformulation of HTML in XML.

Seventeen distinguished scholars from the United States, Russia, and Europe analyze the institutions, social forces, and ideas that are transforming Russia and are, in turn, being transformed in Russia today. The first multidisciplinary assessment of the Yeltsin era, *Russia in the New Century: Stability or Disorder?* focuses on superpresidentialism, the Constitutional Court, the military, the virtual economy, the network society, organized crime, the new entrepreneurs, workers, survival networks, Russian political parties and nationalism, and the crisis in Dagestan. Thirteen essays and the editors' introduction offer new perspectives on Russia's prospects for stability and disorder in the twenty-first century.
