The Reason for My Hope Billy Graham,2013-10-22 The saving message of the Gospel is the heartbeat of this preacher and evangelist. Millions around the world heard Billy Graham proclaim this unchanging truth. He never forgot the transformation of his own life, when he first said yes to God's gift of salvation, and he witnessed multitudes turn their hearts to the God of Hope. What is the most hopeful word in History? For Billy Graham, that word is SALVATION. Billy Graham proclaimed God's Gospel with resolve and deep compassion. It is a message he preached for more than seventy years. And in this book you will sense its urgency, filled with hope for the future. Salvation is what we all long for, when we are lost or in danger or have made a mess of our lives. And salvation belongs to us, when we reach out for the only One who can rescue us—Jesus. The Reason for My Hope: Salvation presents the essence of that transformative message. It is biblical

and timeless, and though simple and direct, it is far from easy. There are hard words, prophetic words, directed toward a culture that denies the reality of sin and distracts us from the veracity of Hell. But through its ominous warnings shines a light that cannot be extinguished—a beacon of hope that Jesus came “to seek and to save that which was lost” (Luke 19:10).

Cochrane Handbook for Systematic Reviews of Interventions Julian P. T. Higgins, Sally Green, 2008-11-24 Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions.

Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.
