W.H. Crossland Sheila Binns, 2020-09-24 The creative genius behind Founder's Building at Royal Holloway, University of London, arguably the most glorious building in England of the end of the nineteenth century, is widely respected and its architectural style is regarded as archetypally 'Victorian'. Yet its architect, William Henry Crossland, is little known, despite a substantial catalogue of buildings, most of which remain standing today. Bringing Crossland out of the shadows, this biography explores this mysterious and elusive figure in depth for the first time. Recently digitised documents and long-hidden archival material have thrown a powerful light on Crossland, which, together with the author's first-hand knowledge of his buildings, offer the reader an unprecedented appreciation and understanding of the man, his life and work, as well as his personal and artistic influences. W.H. Crossland fills a gap in nineteenth-century architectural knowledge, but it is also the touching story of an ambitious and talented man, who is long overdue to be recognised as one of the 'greats' among nineteenth-century architects. This book is intended for architects, architectural historians and anyone who is interested in the built environment, nineteenth-century history and intriguing personal stories.

Social Determinants of Health Dennis Raphael, 2016-05-06 In the current environment of deepening class and income inequality, it is essential to understand the socio-economic conditions that shape the health of individuals and communities. Now in its third edition, Dennis Raphael's *Social Determinants of Health* offers a comprehensive discussion of the primary factors that influence the health of Canada's population. This seminal text on the social determinants of health contains contributions from top academics and high-profile experts from across the country. Taking a public policy approach, the authors in this edited collection critically analyze the structural inequalities embedded in our society and the socio-economic factors that affect health, including income, education, employment, housing, food security, gender, and race. The thorough updates to this edition include a greater focus on the political mechanisms that explain the distribution of the social determinants of health and additional material on public policy, early childhood education in Canada, and the determinants of Indigenous peoples' health. Rich in pedagogical tools including critical thinking questions and lists of recommended readings and online resources, this book will actively engage students and researchers alike.
