The Making of a Homegrown Terrorist Peter A. Olsson MD,2014-02-25 What are the factors that lead some individuals to become terrorists? In this book, a psychiatrist and psychoanalyst examines case histories of terrorism and reveals how radicalized youths living next door can become dangerous homegrown terrorists. Religious zeal and passionate dogma can be powerful motivators for homegrown recruits of terrorist organizations. In this book, Peter A. Olsson, MD, applies his years of work with disordered personalities to the psychological understanding of why seemingly ordinary Americans turn into murderers of their countrymen. He identifies the psychodynamic patterns of the lives of those who become homegrown terrorists and commit acts of cold-blooded murder, examining 20 detailed case histories of individuals—often youths or young adults—to provide theoretical and practical understandings. The book focuses on individuals that include Timothy McVeigh; Ted Kaczynski, a.k.a. The Unabomber; the Shoe-Bomber Richard Reid; Colleen LaRose, a.k.a. Jihad Jane; Nidal Malik Hasan, an American-born, former U.S. Army officer who opened fire on American troops at Fort Hood, Killeen, TX, killing 13 and injuring more than 30; and Dzhokhar and Tamerlan Tzarnaev, the two brothers charged with placing pressure cooker bombs at the finish line area of the 2013 Boston Marathon. It also delves into topics such as distinguishing between good charisma in a youth versus evil charisma and recognizing the characteristics of a healthy group or leader versus those with unhealthy motivations—subject matter that will be of interest and importance to anyone from concerned citizens and parents to teachers and terrorism specialists.

The Cult of Osama Peter Alan Olsson, 2008 In *The Cult of Osama*, Psychiatrist Peter Olsson examines Osama bin Laden's early life experiences and explains, from a psychoanalytical perspective, how those created a mind filled with perverse rage at America, as well as why his way of thinking makes bin Laden in many cases a hero to Arab and Muslim youths. Many other writings totally demonize bin Laden, and therein strangely play into putting this troubled man onto a pedestal, says Olsson, who spent 25 years on a social psychological and psychoanalytical study of destructive cults and cult leaders. There are many journalistic, political, military, and intelligence books about bin Laden and his terror cult group. But this one offers a purely psychological and psychobiographical perspective on bin Laden and his mushrooming influence. Bin Laden's destructive Pied Piper appeal, leading youths to murder others and even themselves in suicide missions, stems from the peculiar and profoundly important synchrony of shared trauma and pain between bin Laden and Arab/Muslim youth, says Olsson. And we in the West neglect this topic, at our own peril. Among the insights Olsson provides as he traces the psychological threads of narcissistic wounds and unresolved grief from Osama's childhood are the death of his father when Osama was 10, separation from his mother even earlier, the humiliation of Osama as the son of a slave in his father's household, and his lifelong search for a surrogate older brother and father figures among radical Islamist teachers and mentors. Olsson also spotlights the idea that Osama experienced dark epiphanies as a young adult which further magnified and focused his unresolved disappointments and narcissistic rage. This psychobiography of one of the world's most notorious terrorists, written by an Assistant Professor at Dartmouth Medical School, shows how understanding the psychohistory and mindset of bin Laden could help prevent the development and actions of home-grown American and Western terrorists and their cells.
