**Rethinking Media Coverage** Lisa Parks, 2018-05-24 In the post-9/11 era, media technologies have become increasingly intertwined with vertical power as airwaves, airports, air space, and orbit have been commandeered to support national security and defense. In this book, Lisa Parks develops the concept of vertical mediation to explore how audiovisual cultures enact and infer power relations far beyond the screen. Focusing on TV news, airport checkpoints, satellite imagery, and drone media, Parks demonstrates how coverage makes vertical space intelligible to global publics in new ways and powerfully reveals what is at stake in controlling it.

*Direct Democracy and the Courts* Kenneth P. Miller, 2009-08-31 This book analyzes the conflict between two rising powers - direct democracy and the courts. Many voter-approved initiatives are challenged in court after the election and many are invalidated. The resulting conflict between the people and the courts threatens to produce a popular backlash against judges and raises profound questions about the proper scope of popular sovereignty and judicial power in a constitutional system.

*Political Parties and Terrorist Groups* Leonard Weinberg, Ami Pedahzur, Arie Perliger, 2008-11-19 This book is the definitive guide to the topical issue of the relationship between political parties that embrace the democratic process and terrorist groups which eschew the legal and procedural strictures of democracy. The fully revised edition continues to provide the most detailed theoretical and empirical analysis of this controversial issue, highlighting the fluid nature of boundaries between terrorist

organisation and legitimate political party. Drawing on a vast array of data, the authors examine a large number of international case studies from Italy, Spain, Lebanon, Turkey, Iran, Israel, Palestine, Peru, Argentina, Japan and Northern Ireland. By incorporating substantial new material on ETA, Hizbollah and Hamas, this book retains its position at the forefront of the worldwide political discussion on terrorism, and continues to be essential reading for all students, academics and readers with an interest in security studies, terrorism and political violence

**Who Controls the Internet?** Jack Goldsmith,Tim Wu,2006-03-17 Is the Internet erasing national borders? Will the future of the Net be set by Internet engineers, rogue programmers, the United Nations, or powerful countries? Who's really in control of what's happening on the Net? In this provocative new book, Jack Goldsmith and Tim Wu tell the fascinating story of the Internet's challenge to governmental rule in the 1990s, and the ensuing battles with governments around the world. It's a book about the fate of one idea--that the Internet might liberate us forever from government, borders, and even our physical selves. We learn of Google's struggles with the French government and Yahoo's capitulation to the Chinese regime; of how the European Union sets privacy standards on the Net for the entire world; and of eBay's struggles with fraud and how it slowly learned to trust the FBI. In a decade of events the original vision is uprooted, as governments time and time again assert their power to direct the future of the Internet. The destiny of the Internet over the next decades, argue Goldsmith and Wu, will reflect the interests of powerful nations and the conflicts within and between them. While acknowledging the many attractions of

the earliest visions of the Internet, the authors describe the new order, and speaking to both its surprising virtues and unavoidable vices. Far from destroying the Internet, the experience of the last decade has lead to a quiet rediscovery of some of the oldest functions and justifications for territorial government. While territorial governments have unavoidable problems, it has proven hard to replace what legitimacy governments have, and harder yet to replace the system of rule of law that controls the unchecked evils of anarchy. While the Net will change some of the ways that territorial states govern, it will not diminish the oldest and most fundamental roles of government and challenges of governance. Well written and filled with fascinating examples, including colorful portraits of many key players in Internet history, this is a work that is bound to stir heated debate in the cyberspace community.

**Digital Storytelling** Kay Teehan,2006 Digital Storytelling is a tool that was created to integrate the newest technology in the classroom. It has proven to be a powerful tool indeed. It is said that the reason for its power lies with the type of students we teach each day in our schools. Students today are multi-taskers, creative, and visual learners. They have grown up in a world of multimedia and respond to audio-visual in positive ways. Given the opportunity to tell their stories using digital storytelling models, they are transformed into self-motivated information consumers. Our job, as educators, becomes one of utilizing their natural gravitation to technology to fit our purposes of teaching state and national standards.
