The Language Hoax John H. McWhorter, 2014-04-01 Japanese has a term that covers both green and blue. Russian has separate terms for dark and light blue. Does this mean that Russians perceive these colors differently from Japanese people? Does language control and limit the way we think? This short, opinionated book addresses the Sapir-Whorf hypothesis, which argues that the language we speak shapes the way we perceive the world. Linguist John McWhorter argues that while this idea is mesmerizing, it is plainly wrong. It is language that reflects culture and worldview, not the other way around. The fact that a language has only one word for eat, drink, and smoke doesn't mean its speakers don't process the difference between food and beverage, and those who use the same word for blue and green perceive those two colors just as vividly as others do. McWhorter shows not only how the idea of language as a lens fails but also why we want so badly to believe it: we're eager to celebrate diversity by acknowledging the intelligence of peoples who may not think like we do. Though well-intentioned, our belief in this idea poses an obstacle to a better understanding of human nature and even trivializes the people we seek to celebrate. The reality -- that all humans think alike -- provides another, better way for us to acknowledge the intelligence of all peoples.

Bad Language Edwin L. Battistella, 2005-08-25 Is today's language at an all-time low? Edwin Battistella argues that it is wrong to think of slang, regional dialects and nonstandard grammar as simply breaking the rules of good English. Re-examining debates over relativism in language, Battistella argues that we should view language as made up of alternative forms of regularity and orderliness, which require informed engagement with usage.

Making Minds Paul Kelley, 2007-08-07 *Making Minds* is a controversial critique of our education

systems. The author is a school leader 'at the forefront of scientific and technological advancement in schools' who, as an American, 'felt comfortable taking on the British establishment' (The Times Educational Supplement). *Making Minds* is written for general readers- especially parents- as well as educational professionals. The book examines the underlying limitations that have been accepted in education over the past two thousand years. The author challenges common assumptions about education through evidence-based, political, ethical, and emotional arguments, as well as examining case studies such as university admissions and the autism 'epidemic'. *Making Minds* describes a more productive scientific approach to learning, drawing on recent research findings, particularly in the US and UK. The author illustrates how new research methods, new technologies, and very recent discoveries in neuroscience that will, in the end, allow us to make minds.

The Power of Babel John McWhorter, 2003-01-07 There are approximately six thousand languages on Earth today, each a descendant of the tongue first spoken by *Homo sapiens* some 150,000 years ago. While laying out how languages mix and mutate over time, linguistics professor John McWhorter reminds us of the variety within the species that speaks them, and argues that, contrary to popular perception, language is not immutable and hidebound, but a living, dynamic entity that adapts itself to an ever-changing human environment. Full of humor and imaginative insight, *The Power of Babel* draws its illustrative examples from languages around the world, including pidgins, Creoles, and nonstandard dialects.

Bad Language Herman Cappelen, Josh Dever, 2019-03-14 When theorizing about language, we tend to assume that speakers are cooperative, honest, helpful, and so on. This, of course, isn't remotely true of a lot of real-world language use. *Bad Language* is the first textbook to explore non-idealized language use, the linguistic behaviour of those who exploit language for malign purposes.

Two eminent philosophers of language present a lively and accessible introduction to a wide range of topics including lies and bullshit, slurs and insults, coercion and silencing: Cappelen and Dever offer theoretical frameworks for thinking about these all too common linguistic behaviours. As the text does not assume prior training in philosophy or linguistics, it is ideal for use as part of a philosophy of language course for philosophy students or for linguistics students. *Bad Language* belongs to the series *Contemporary Introductions to Philosophy of Language*, in which each book introduces an important area of the philosophy of language, suitable for students at any level.

Universal Grammar and American Sign Language D.C. Lillo-Martin, 2012-12-06 AMERICAN SIGN LANGUAGE American Sign Language (ASL) is the visual-gestural language used by most of the deaf community in the United States and parts of Canada. On the surface, this language (as all signed languages) seems radically different from the spoken languages which have been used to formulate theories of linguistic principles and parameters. However, the position taken in this book is that when the surface effects of modality are stripped away, ASL will be seen to follow many of the patterns proposed as universals for human language. If these theoretical constructs are meant to hold for language in general, then they should hold for natural human language in any modality; and if ASL is such a natural human language, then it too must be accounted for by any adequate theory of Universal Grammar. For this reason, the study of ASL can be vital for proposed theories of Universal Grammar. Recent work in several theoretical frameworks of syntax as well as phonology have argued that indeed, ASL is such a language. I will assume then, that principles of Universal Grammar, and principles that derive from it, are applicable to ASL, and in fact that ASL can serve as one of the languages which test Universal Grammar. There is an important distinction to be drawn, however, between what is called here 'American Sign Language', and other forms of manual

communication.

Talk on the Wild Side Lane Greene, 2018-09-20 Language is a wild animal: rough, ambiguous, inconsistent in countless ways. But that just makes it all the more tempting to tame it. Many have tried, from sticklers for supposedly correct grammar to inventors of supposedly perfect languages; from software engineers working on machine translation to governments that see language management as politics by another means. But when you enter the lair of a wild beast, you can be lucky to escape with your wits. Join Lane Greene on a journey of discovery into the deep strangeness of language. Learn why grammar rules can never capture the extraordinary variety of ordinary usage. See what happens when you try to design a language that really makes sense. Find out why, for all the talk of decline in English, no language in recorded history has ever gone to the dogs, or ever could. And learn the fate of those bold individuals who, through heroism or ignorance, ventured to teach their tongue some new tricks.

Babel Gaston Dorren, 2018-12-04 “Babel is an endlessly interesting book, and you don’t have to have any linguistic training to enjoy it . . . it’s just so much fun to read.” —NPR English is the world language, except that 80 percent of the world doesn’t speak it. Linguist Gaston Dorren calculates that to speak fluently with half of the world’s people in their mother tongues, you’d need to know no fewer than twenty languages. In *Babel*, he sets out to explore these top twenty world languages, which range from the familiar (French, Spanish) to the surprising (Malay, Javanese, Bengali). Whisking readers along on a delightful journey, he traces how these languages rose to greatness while others fell away, and shows how speakers today handle the foibles of their mother tongues. Whether showcasing tongue-tying phonetics, elegant but complicated writing scripts, or mind-bending quirks of grammar, *Babel* vividly illustrates that mother tongues are like nations: each has

its own customs and beliefs that seem as self-evident to those born into it as they are surprising to outsiders. Babel reveals why modern Turks can't read books that are a mere 75 years old, what it means in practice for Russian and English to be relatives, and how Japanese developed separate "dialects" for men and women. Dorren also shares his experiences studying Vietnamese in Hanoi, debunks ten myths about Chinese characters, and discovers the region where Swahili became the lingua franca. Witty and utterly fascinating, Babel will change how you look at and listen to the world. "Word nerds of every strain will enjoy this wildly entertaining linguistic study." —Publishers Weekly (starred review)

The Body in Autobiography and Autobiographical Novels Menotti Lerro, 2018-10-12 This volume explores a web of complex relationships between body and mind, discussing the efforts of individuals from a wide variety of backgrounds to define, to achieve, or to reject the “normal”; and, in some cases, to put something else in its place. After considering the problems arising from other people’s perceptions of non-standard bodies, the book turns to gender: is it written “upon the body”, established at birth, determined only by physical traits and distinguished by material things such as clothes; or is it written “within the body”, defined through the subject’s own feelings? It considers what happens when “males” consider themselves “female”, and “females” consider themselves “male”. It concludes with the analysis of four books, by different authors with different sexual orientations. Two of these volumes might be considered “genuine autobiographies”, while the other two are novels which include numerous autobiographical features that reflect the authors’ own thoughts.

In Search For The Gift Of The Holy Spirit Gaylon West, 2016-07-24 Not only is Acts 2:38 a controversial text because of the mention of baptism for the remission of sin but also because of the

second independent clause. The audience asks, What shall we do? Peter answers in two clauses. The second is, You shall receive the gift of the Holy Spirit. What does that mean? West has taken a fresh look at the many passages dealing with the Holy Spirit. He revisits Acts 5:32 where much misunderstanding has arisen. West deals with the English and Greek grammar in the passages in the context of the entire Bible. The major views of the gift of the Holy Spirit are dealt with: (1) the gift is salvation; (2) the gift is supernatural signs; (3) the expression is metaphorical; (4) the gift is the Spirit Himself. Major problems that influence beliefs are (a) learned scholars use their theology instead of their scholarship, (b) the grammar is treated as a complex sentence instead of a compound one, and (c) passages such as Acts 5:29-32 are misused to prove what the gift is.
