Polyvagal Exercises for Safety and Connection: 50 Client-Centered Practices (Norton Series on Interpersonal Neurobiology) Deb Dana,2020-04-21 A practical guide to working with the principles of polyvagal theory beyond the therapy session. Deb Dana is the foremost translator of polyvagal theory into clinical practice. Here, in her third book on this groundbreaking theory, she provides therapists with a grab bag of polyvagal-informed exercises for their clients, to use both within and between sessions. These exercises offer readily understandable explanations of the ways the autonomic nervous system directs daily living. They use the principles of polyvagal theory to guide clients to safely connect to their autonomic responses and navigate daily experiences in new ways. The exercises are designed to be introduced over time in a variety of clinical sessions with accompanying exercises appropriate for use by clients between sessions to enhance the therapeutic change process. Essential reading for any therapist who wants to take their polyvagal knowledge to the next level and is looking for easy ways to deliver polyvagal solutions with their clients.

Antarctic Pioneer Joanna Kafarowski,2022-05-10 Jackie Ronne reclaims her rightful place in polar history as the first American woman in Antarctica. Jackie was an ordinary American woman whose life changed after a blind date with rugged Antarctic explorer Finn Ronne. After marrying, they began planning the 1946–1948 Ronne Antarctic Research Expedition. Her participation was not welcomed by the expedition team of red-blooded males eager to prove themselves in the frozen, hostile environment of Antarctica. On March 12, 1947, Jackie Ronne became the first American woman in Antarctica and, months later, one of the first women to overwinter there. The Ronne Antarctic Research Expedition secured its place in Antarctic history, but its scientific contributions have been overshadowed by conflicts and the dangerous accidents that occurred. Jackie dedicated her life to Antarctica: she promoted the achievements of the expedition and was a pioneer in polar tourism and an early supporter of the Antarctic Treaty. In doing so, she helped shape the narrative of twentieth-century Antarctic exploration.

So You Think You Know Rock and Roll? Peter E. Meltzer,2017-06-06 Rolling Stone magazine recently released its list of the 100 greatest albums in rock music history, a period spanning more than fifty years. Nearly 60 percent of those albums were released in the decade from 1965 to 1975—the golden age of classic rock. This book is a wide-ranging portrait of that transformative and remarkable time, from the dawn of the singer-songwriter era to days before disco. This book is presented in a question-and-answer format, but it is hardly a “trivia” book. It covers such diverse topics as censorship, chart phenomena, album covers, rock groupies, manufactured bands, one-hit wonders, rock festivals, supergroups, novelty songs, and the Beatles. All of the major figures of the ‘60s and ‘70s are here: Cream, CCR, Jimi Hendrix, Joni Mitchell, Simon and Garfunkel, the Who, the Rolling Stones, Led Zeppelin, Bruce Springsteen, Queen, Neil Young, the Eagles, the Allman Brothers, Lynyrd Skynyrd, Stevie Wonder, Elton John, Linda Ronstadt, Pink Floyd, Billy Joel, Marvin Gaye, David Bowie, James Taylor, Carole King, Aretha Franklin, Lou Reed, Carly Simon, Laura Nyro, and many others. Exhaustively researched, *So You Think You Know Rock and Roll?* is filled with “I never knew that!” moments on every page.

Accessing the Healing Power of the Vagus Nerve Stanley Rosenberg,2017-12-19 This practical guide to understanding the cranial nerves as the key to our psychological and physical well-being builds on Stephen Porges’s Polyvagal Theory—one of the most important recent developments in human neurobiology. Drawing on more than thirty years of experience as a craniosacral therapist and Rolfer, Stanley Rosenberg explores the crucial role that the vagus nerve plays in determining our psychological and emotional states and explains that a myriad of common psychological and physical symptoms—from anxiety and depression to migraines and back pain—indicates a lack of proper functioning in the vagus nerve. Through a series of easy self-help exercises, the book illustrates the simple ways we can regulate the vagus nerve in order to initiate deep relaxation, improve sleep, and recover from injury and trauma. Additionally, by exploring the link between a well-regulated vagus nerve and social functioning, Rosenberg’s findings and methods offer new hope that by improving social behavior it is possible to alleviate some of the symptoms at the core of many cases of autism spectrum disorders. Useful for psychotherapists, doctors, bodyworkers, and caregivers, as well as anyone who experiences the symptoms of chronic stress and depression, this book shows how we can optimize autonomic functioning in ourselves and others, and bring the body into the state of safety that activates its innate capacity to heal.

Freezing Fertility Lucy van de Wiel,2020-12-15 Analyzes how the possibility of egg freezing changes what it means to be fertile and to age in the 21st century Welcomed as liberation and dismissed as exploitation, egg freezing (oocyte cryopreservation) has rapidly become one of the most widely-discussed and influential new reproductive technologies of this century. In *Freezing Fertility*, Lucy van de Wiel takes us inside the world of fertility preservation—with its egg freezing parties, contested age limits, proactive anticipations and equity investments—and shows how the popularization of egg freezing has profound consequences for the way in which female fertility and reproductive aging are understood, commercialized and politicized. Beyond an individual reproductive choice for people who may want to have children later in life, *Freezing Fertility* explores how the rise of egg freezing also reveals broader cultural, political and economic negotiations about reproductive politics, gender inequities, age normativities and the financialization of healthcare. Van de Wiel investigates these issues by analyzing a wide range of sources—varying from sparkly online platforms to heart-breaking court cases and intimate autobiographical accounts—that are emblematic of each stage of the egg freezing procedure. By following the egg’s journey, *Freezing Fertility* examines how contemporary egg freezing practices both reflect broader social, regulatory and economic power asymmetries and repoliticize fertility and aging in ways that affect the public at large. In doing so, the book explores how the possibility of egg freezing shifts our relation to the beginning and end of life.

Modi 2.0 Sunil Sharan,2021-04-18 German Chancellor Angela Merkel has been known to be critical about India's policies in Kashmir. But when on Prime Minister Narendra Modi's birthday in 2020, Merkel sent him a note wishing him with the words *Liebe Narendra* (Dear Narendra), written in hand, one knew that Modi had arrived on the world stage. *Modi 2.0: Beyond the Ordinary* is an objective analysis of the prime minister, his struggles and achievements, his spiritual journey, the men and the women in his life, and his friends and enemies. It also doesn't shy away from discussing the difficult questions surrounding Modi-Godhra and his relations with India's Muslims. Self-confessedly, author Sunil Sharan was once critical of Narendra Modi but after carefully observing him for years, he realised that Modi is indeed a transformational man. Today, India stands rejuvenated, its prestige around the world high, the spirit of its people uplifted. Once the question used to be: Who after Nehru? Now the question is: Who after Modi? *Modi 2.0* debates the possibilities.

Bringing Down the Banking System G. Johnsen,2014-01-09 divThe combined collapse of Iceland's three largest banks in 2008 is the third largest bankruptcy in history and the largest banking system collapse suffered by any country in modern economic history, relative to GDP. How could tiny Iceland build a banking system in less than a decade that proportionally exceeded Switzerland's? Why did the bankers decide to grow the system so fast? How did businesses tunnel money out of the banking system? And why didn't anybody stop them? *Bringing Down the Banking System* answers these questions. Gudrun Johnsen, Senior Researcher with Iceland's Special Investigation Commission, tells the riveting story of the rise and fall of the Icelandic banking system, describes the Commission's findings on the damaging effects of holding company cross-ownership, and explains what we can learn from it all.“/div>

Mass Awakening Shoshi Herscu,2018-10-08 The Truth has been hidden from us while a global policy of mass depopulation and exploitation has been carried out behind the scenes for the past half-century. The author, an independent journalist, became aware of this agenda only in the past few years. She found it hard to believe, but in-depth research and the testimony of whistleblowers worldwide have exposed these strategies. They include geoengineering (chemtrails), fluoridation of water supplies, GMOs, vaccinations, false flag terrorist attacks, and economic warfare by the group David Wilcock calls the Cabal. However, despite this grim reality, a positive shift of mass awakening is occurring worldwide. Tribunals are being established to prosecute elite offenders; revelations of hidden technology like free-energy and new economic models are being put forth. The author shows how humanity is claiming its rightful heritage as spiritual beings and charts the course of our elevation of consciousness. MASS AWAKENING gives us all real hope for an amazing future. Mass Awakening is Shoshi Herscu's well researched and yet profoundly personal handling of intensely shocking material, rarely covered in print. It is both a true inspiration and a much- needed breath of fresh air. —Ada Tourtsakis PrepareForChangeLeadership.org

Military Encounters with Extraterrestrials Frank Joseph,2018-09-11 The first, comprehensive military history of armed confrontations between humans and extraterrestrials • Includes documentation of incidents from World War I, World War II, the Korean War, the Vietnam War, the Gulf War, and the ongoing hostilities in the Middle East • Reveals the U.S. Navy’s defeat in Antarctica by ETs, the shoot-down of “flying saucers” at Roswell, alien sabotage of nuclear weapons, in-flight abductions of USAF and Soviet officers, and photographic evidence of the Battle of Los Angeles • Explains the link between the development of atomic bombs and ballistic missiles and the increase in extraterrestrial intervention in the 20th century Although close encounters with alien space craft are reported as far back as the reign of Pharaoh Thutmosis III in Egypt, it wasn’t until the 20th century that UFO sightings and extraterrestrial encounters were truly documented, due to advances in technology and record-keeping as well as the vast increase in incidents, particularly with military forces. Revealing his extensive research and the verifiable evidence he’s discovered, Frank Joseph presents a comprehensive military history of armed confrontations between humans and extraterrestrials in the 20th and 21st centuries. He explains how, with the development of atomic bombs and ballistic missiles, the frequency of extraterrestrial intervention in human affairs increased dramatically. He documents incidents both famous and little known, including the explosive demolition of U.S. munitions factories in 1916 by unearthly aerial vehicles, the Red Baron’s dogfight with a UFO during World War I, “foo fighter” sightings and battles with Allied and Axis combatants during World War II, and eye-witness reports from encounters during the Korean War, the Vietnam War, the Gulf War in Iraq, and the ongoing hostilities in the Middle East. He examines the evidence for the shoot-down of “flying saucers” at Roswell and Aztec, New Mexico, alien sabotage of nuclear weapons systems, and in-flight abductions of USAF and Soviet officers and airplanes. He explores the photo evidence for the Battle of Los Angeles, which occurred three months after Pearl Harbor, and the details of Operation Highjump, the U.S. Navy’s defeat in

Antarctica by ET forces 17 months after the atomic bomb was dropped on Nagasaki, while also uncovering evidence of secret Antarctic German bases. The author also examines recent, 21st-century examples of alien interdiction in Earthly affairs, such as the meltdown of the Fukushima Daiichi nuclear plant in Japan and the fiery abort of Elon Musk’s Falcon 9 missile launch, both events accompanied by UFOs. Offering complete disclosure of the multitude of ET events over the past century, Frank Joseph gives us the first true reference book in the field of alien military encounters.

Confessions of a Recovering Environmentalist and Other Essays Paul Kingsnorth,2017-08-01 A provocative and urgent essay collection that asks how we can live with hope in “an age of ecocide” Paul Kingsnorth was once an activist—an ardent environmentalist. He fought against rampant development and the depredations of a corporate world that seemed hell-bent on ignoring a looming climate crisis in its relentless pursuit of profit. But as the environmental movement began to focus on “sustainability” rather than the defense of wild places for their own sake and as global conditions worsened, he grew disenchanted with the movement that he once embraced. He gave up what he saw as the false hope that residents of the First World would ever make the kind of sacrifices that might avert the severe consequences of climate change. Full of grief and fury as well as passionate, lyrical evocations of nature and the wild, Confessions of a Recovering Environmentalist gathers the wave-making essays that have charted the change in Kingsnorth’s thinking. In them he articulates a new vision that he calls “dark ecology,” which stands firmly in opposition to the belief that technology can save us, and he argues for a renewed balance between the human and nonhuman worlds. This iconoclastic, fearless, and ultimately hopeful book, which includes the much-discussed “Uncivilization” manifesto, asks hard questions about how we’ve lived and how we should live.
