Impostures al-Ḥarīrī, 2021-09-07 One of the Wall Street Journal's Top 10 Books of the Year Winner, 2020 Sheikh Zayed Book Award, Translation Category Shortlist, 2021 National Translation Award Finalist, 2021 PROSE Award, Literature Category Fifty rogue's tales translated fifty ways An itinerant con man. A gullible eyewitness narrator. Voices spanning continents and centuries. These elements come together in *Impostures*, a groundbreaking new translation of a celebrated work of Arabic literature. *Impostures* follows the roguish Abū Zayd al-Sarūjī in his adventures around the medieval Middle East—we encounter him impersonating a preacher, pretending to be blind, and lying to a judge. In every escapade he shows himself to be a brilliant and persuasive wordsmith, composing poetry, palindromes, and riddles on the spot. Award-winning translator Michael Cooperson transforms Arabic wordplay into English wordplay of his own, using fifty different registers of English, from the distinctive literary styles of authors such as Geoffrey Chaucer, Mark Twain, and Virginia Woolf, to global varieties of English including Cockney rhyming slang, Nigerian English, and Singaporean English. Featuring picaresque adventures and linguistic acrobatics, *Impostures* brings the spirit of this masterpiece of Arabic literature into English in a dazzling display of translation. An English-only edition.

Reconstructing Earth's Climate History Kristen St. John, R. Mark Leckie, Kate Pound, Megan Jones, Lawrence Kressek, 2021-06-25 Reconstructing Earth's Climate History There has never been a more critical time for students to understand the record of Earth's climate history, as well as the relevance of that history to understanding Earth's present and likely future climate. There also has never been a more critical time for students, as well as the public-at-large, to understand how we know, as much as what we know, in science. This book addresses these needs by placing you, the student, at the center of learning. In this book, you will actively use inquiry-based explorations of authentic scientific data to develop skills that are essential in all disciplines: making observations, developing and testing hypotheses, reaching conclusions based on the available data, recognizing and acknowledging uncertainty in scientific data and scientific conclusions, and communicating your results to others. The context for understanding global climate change today lies in the records of Earth's past, as preserved in archives such as sediments and sedimentary rocks on land and on the seafloor, as well as glacial ice, corals, speleothems, and tree rings. These archives have been studied for decades by geoscientists and paleoclimatologists. Much like detectives, these researchers work to reconstruct what happened in the past, as well as when and how it happened, based on the often-incomplete and indirect records of those events preserved in these archives. This book uses guided-inquiry to build your knowledge of foundational concepts needed to interpret such archives. Foundational concepts include: interpreting the environmental meaning of sediment composition, determining ages of geologic materials and events (supported by a new section on radiometric dating), and understanding the role of CO₂ in Earth's climate system, among others. Next, this book provides the opportunity for you to apply your foundational knowledge to a collection of paleoclimate case studies. The case studies consider: long-term climate trends, climate cycles, major and/or abrupt episodes of global climate change, and polar paleoclimates. New sections on sea level change in the past and future, climate change and life, and climate change and civilization expand the book's examination of the causes and effects of Earth's climate history. In using this book, we hope you gain new knowledge, new skills, and greater confidence in making sense of the causes and consequences of climate change. Our goal is that science becomes more accessible to you. Enjoy the challenge and the reward of working with scientific data and results! *Reconstructing Earth's Climate History, Second Edition*, is an essential purchase for geoscience students at a variety of levels studying paleoclimatology, paleoceanography, oceanography, historical geology, global change, Quaternary science and Earth-system science.

TASER® Conducted Electrical Weapons: Physiology, Pathology, and Law Mark W. Kroll,Jeffrey D. Ho,2009-02-27 TASER® Conducted Electrical Weapons are rapidly replacing the club for law-enforcement control of violent subjects within many countries around the globe. A TASER CEW is a hand-held device that delivers a 400-volt pulse with a duration tuned to control the skeletal muscles without affecting the heart at a distance of up to 6.5 meters over tiny wires. If necessary, it begins with an arcing voltage of 50,000 V to penetrate thick clothing; the 50,000 V is never delivered to the body itself. Due to the widespread usage of these devices and the widespread misconceptions surrounding their operation, this book will have significant utility. This volume is written for cardiologists, emergency physicians, pathologists, law enforcement management, corrections personnel, and attorneys.

Private Entrance Kathryn Harvey,2012-05-01 BOOK THREE OF THE BUTTERFLY TRILOGY New York Times bestselling author Kathryn Harvey captivates again in this sensual tale of murder, corruption, and passion. Abby Tyler is a woman on a mission. For more than thirty years, Abby has been desperately searching for her child—an infant stolen at birth before she even had a chance to see it. To locate her child and end years of heartache, Abby formulates a plan that will bring her face to face with a past she has tried to forget. Elsewhere, three strangers receive word that they've each won a contest that, oddly, they don't recall entering. None of them are prepared for the luxurious and erotic prize that awaits them—a week at The Grove, an exclusive anything-goes, no-questions-asked resort in the Southern California desert. Amid the glamour of movie stars and the super-rich, the three strangers—Coco, Sissy, and Ophelia—find themselves embroiled in a baffling mystery involving the reclusive spa owner, Abby Tyler. As a deadly sandstorm approaches the resort, a murderer stalks the trapped guests. Someone will die, someone will find love, and all three women will come to astonishing realizations about themselves. From the sensual heat of the desert to the corrupt underworld of Las Vegas, author Kathryn Harvey delivers a stimulating tale with Private Entrance.
