Computer Science and Ambient Intelligence Gaëlle Calvary, Thierry Delot, Florence Sedes, Jean-Yves Tigli, 2013-01-29 This book focuses on ambient intelligence and addresses various issues related to data management, networking and HCI in this context. Taking a holistic view, it covers various levels of abstraction, ranging from fundamental to advanced concepts and brings together the contributions of various specialists in the field. Moreover, the book covers the key areas of computer science concerned with the emergence of ambient intelligence (e.g. interaction, middleware, networks, information systems, etc.). It even goes slightly beyond the borders of computer science with contributions related to smart materials and ethics. The authors cover a broad spectrum, with some chapters dedicated to the presentation of basic concepts and others focusing on emerging applications in various fields such as health, transport and tourism.

Islamophobia and the West Imbesat Daudi, 2022-10-21 This book provides an engaging and insightful look into the definitions, discourse and experiences of Islamophobia and its steady rise since 9/11. It analyses concepts and binaries that are drawn around discussions on civilization, religious dogma, violence, and race. Is there a link between Islam and violence? Why does the West feel threatened by it? The author critically examines these questions and the birth of hate politics which packages hate in a marketable format and often demonizes victims. It also looks at the role of the media in the West in perpetuating stereotypes and its consequences and the nature of war reportage in Islamic countries while deconstructing the narrative of the clash of civilizations. Topical and lucid, this book is a must-read for students and scholars of sociology, international

relations, peace and conflict studies, political science, Islamic studies and for other readers interested in these topics.

In the Space of Theory Matthew Sparke, 2005 How is the meaning of the hyphen in “nation-state” changing in the context of globalization and proliferating political struggles? How can we investigate the transformation of the nation-state by marking the normally unmarked hyphen in “geo-graphy”? Debunking deterritorialization both as a discourse and as an antiessentialist abstraction, Matthew Sparke offers answers to these questions by examining the contemporary geographies of the United States and Canada. *In the Space of Theory* details the territorial implications of the Iraq war, NAFTA, welfare reform, constitutional reform, cross-border regional development, and the legal battles of First Nations. In using antiessentialist arguments to elucidate the complexity of these developments, Sparke seeks to ground and critique postfoundational theory itself. He shows how the postfoundational arguments of Homi Bhabha, Arjun Appadurai, Timothy Mitchell, Ernesto Laclau, Chantal Mouffe, Michael Hardt, and Antonio Negri obscure politically important processes of reterritorialization at the same time they deterritorialize diverse theoretical assumptions about the nation-state. Engaged with theory and grounded in close study of cultural, political, and economic change, *In the Space of Theory* explores the geographies of struggle that at once underlie and undermine the hyphen in contemporary nation-states. Matthew Sparke is associate professor of geography and international studies at the University of Washington.

Metal Sustainability Reed M. Izatt, 2016-07-29 The sustainable use of natural resources is an important global challenge, and improved metal sustainability is a crucial goal for the

21st century in order to conserve the supply of critical metals and mitigate the environmental and health issues resulting from unrecovered metals. Metal Sustainability: Global Challenges, Consequences and Prospects discusses important topics and challenges associated with sustainability in metal life cycles, from mining ore to beneficiation processes, to product manufacture, to recovery from end-of-life materials, to environmental and health concerns resulting from generated waste. The broad perspective presented highlights the global interdependence of the many stages of metal life cycles. Economic issues are emphasized and relevant environmental, health, political, industrial and societal issues are discussed. The importance of applying green chemistry principles to metal sustainability is emphasized. Topics covered include: • Recycling and sustainable utilization of precious and specialty metals • Formal and informal recycling from electronic and other high-tech wastes • Global management of electronic wastes • Metal reuse and recycling in developing countries • Effects of toxic and other metal releases on the environment and human health • Effect on bacteria of toxic metal release • Selective recovery of platinum group metals and rare earth metals • Metal sustainability from a manufacturing perspective • Economic perspectives on sustainability, mineral development, and metal life cycles • Closing the Loop – Minerals Industry Issues The aim of this book is to improve awareness of the increasingly important role metals play in our high-tech society, the need to conserve our metal supply throughout the metal life cycle, the importance of improved metal recycling, and the effects that unhindered metal loss can have on the environment and on human health.

Gender in Agriculture Sourcebook World Bank, Food and Agriculture Organization (FAO), International Fund for Agricultural Development (IFAD), 2008-10-07 The 'Gender in Agriculture Sourcebook' provides an up-to-date understanding of gender issues and a rich compilation of compelling evidence of good practices and lessons learned to guide practitioners in integrating gender dimensions into agricultural projects and programs. It serves as a tool for: guidance; showcasing key principles in integrating gender into projects; stimulating the imagination of practitioners to apply lessons learned, experiences, and innovations to the design of future support and investment in the agriculture sector. The Sourcebook draws on a wide range of experience from World Bank, Food and Agriculture Organization (FAO), International Fund for Agricultural Development (IFAD), and other donor agencies, governments, institutions, and groups active in agricultural development. The Sourcebook looks at: access to and control of assets; access to markets, information and organization; and capacity to manage risk and vulnerability through a gender lens. There are 16 modules covering themes of cross-cutting importance for agriculture with strong gender dimensions (Policy, Public Administration and Governance; Agricultural Innovation and Education; Food Security; Markets; Rural Finance; Rural Infrastructure; Water; Land; Labor; Natural Resource Management; and Disaster and Post-Conflict Management) and specific subsectors in agriculture (Crops, Livestock, Forestry, and Fisheries). A separate module on Monitoring and Evaluation is included, responding to the need to track implementation and development impact. Each module contains three different sub-units: (1) A Module Overview gives a broad introduction to the topic and provides a summary of major development issues in the sector and rationale of looking at

gender dimension; (2) Thematic Notes provide a brief and technically sound guide in gender integration in selected themes with lessons learned, guidelines, checklists, organizing principles, key questions, and key performance indicators; and (3) Innovative Activity Profiles describe the design and innovative features of recent and exciting projects and activities that have been implemented or are ongoing.

How to Survive a Pandemic Michael Greger, M.D., FACLM, 2020-05-26 A vital, timely text on the viruses that cause pandemics and how to face them, by the New York Times bestselling author of *How Not to Die*. From tuberculosis to bird flu and HIV to coronavirus, these infectious diseases share a common origin story: human interaction with animals. Otherwise known as zoonotic diseases for their passage from animals to humans, these pathogens—both pre-existing ones and those newly identified—emerge and re-emerge throughout history, sparking epidemics and pandemics that have resulted in millions of deaths around the world. How did these diseases come about? And what—if anything—can we do to stop them and their fatal march into our countries, our homes, and our bodies? In *How to Survive a Pandemic*, Dr. Michael Greger, physician and internationally-recognized expert on public health issues, delves into the origins of some of the deadliest pathogens the world has ever seen. Tracing their evolution from the past until today, Dr. Greger

spotlights emerging flu and coronaviruses as he examines where these pathogens originated, as well as the underlying conditions and significant human role that have exacerbated their lethal influence to large, and even global, levels. As the world grapples with the devastating impact of the novel coronavirus 2019, Dr. Greger reveals not only what we can do to protect ourselves and our loved ones during a pandemic, but also what human society must rectify to reduce the likelihood of even worse catastrophes in the future.

Organización, gestión y ejecución de proyectos industriales Storch de Gracia, José María, Herrero Sánchez, Borja, 2018-09-01 El lector tiene en sus manos un libro circunscrito a la organización y gestión de proyectos industriales. El texto se enfoca a la industria Química, pero la forma en que los autores exponen, analizan y desarrollan los conceptos de la gestión de proyectos, lo hace también válido para otros tipos de industria, como la energética. Los objetivos de los proyectos son evaluar, proponer, contratar, diseñar, construir y arrancar una o varias plantas industriales capaces de transformar unos bienes y servicios en otros de valor mayor. Ello no de cualquier manera, sino optimizando, a lo largo de la ejecución, la tensión entre precio, plazo y calidad. La obra se divide en dos partes. La primera aborda conceptos generales de la gestión de proyectos industriales, como son, por ejemplo: las estimaciones económicas, la planificación, el control de actividades, etc. La segunda parte desarrolla la secuencia normal en la ejecución de los proyectos partiendo de la propuesta técnica y económica, pasando por el diseño y la gestión de acopios hasta llegar a la construcción y la puesta en marcha de una planta industrial.

R for Data Science Hadley Wickham, Garrett Golemund, 2016-12-12 Learn how to use R to turn raw data into insight, knowledge, and understanding. This book introduces you to R, RStudio, and the tidyverse, a collection of R packages designed to work together to make data science fast, fluent, and fun. Suitable for readers with no previous programming experience, R for Data Science is designed to get you doing data science as quickly as possible. Authors Hadley Wickham and Garrett Golemund guide you through the steps of importing, wrangling, exploring, and modeling your data and communicating the results. You'll get a complete, big-picture understanding of the data science cycle, along with basic tools you need to manage the details. Each section of the book is paired with exercises to help you practice what you've learned along the way. You'll learn how to:

Wrangle—transform your datasets into a form convenient for analysis
Program—learn powerful R tools for solving data problems with greater clarity and ease
Explore—examine your data, generate hypotheses, and quickly test them
Model—provide a low-dimensional summary that captures true signals in your dataset
Communicate—learn R Markdown for integrating prose, code, and results

The Cambridge Companion to Tacitus A. J. Woodman, 2010-01-21 Tacitus is universally recognised as ancient Rome's greatest writer of history, and his account of the Roman Empire in the first century AD has been fundamental in shaping the modern perception of Rome and its emperors. This Companion provides a new, up-to-date and authoritative assessment of his work and influence which will be invaluable for students and non-specialists as well as of interest to established scholars in the field. First situating Tacitus within the tradition of Roman historical writing and his own contemporary society, it goes

движением, постоянными переселениями, добровольными и принудительными, несколькими волнами эмиграции. Культура российских немцев – это сложная, синкретичная культура, в которой непротиворечиво сочетаются, сливаются культуры Германии и России. Том богато иллюстрирован. Для этнологов, антропологов, историков и широкого круга читателей. Данный труд издается впервые. Право на издание не передавалось другим лицам и организациям.

Land Reform Policy Ben Chigara,2019-06-04 Originally published in 2004. The book examines the possibility of resolving past and continuing social injustices that are rooted in colonial or some such other similar experience of states from a variety of perspectives. First the issue is examined from an international law perspective, which evaluates the validity of counter claims to title to land in affected SADC states. Secondly the issue is examined from a human rights perspective, which privileges promotion for the respect of the inherent dignity of all persons. Thirdly, the issue is examined from victimology and psychology schools of thought in order to understand both the effect and impact on stakeholders of the operative dynamics in conflicts that arise from long standing social injustices that are connected to colonial or some such other similar historical experience of States. The book proposes humwefficiency as a model for resolution of this type of conflict. This model targets preservation of the inherent dignity of all stakeholders by combining international human rights morality with local intuition about land ownership and use. In this sense, the

book takes human rights theory beyond politics and utopia, and applies it to foster new social engineering technologies for the resolution of social injustices and promotion of social justice. This is justified by the fact that the human rights culture has evolved in a considerably short period of time to become the dominant culture of the world.
