Mathematics Learning in Early Childhood National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Committee on Early Childhood Mathematics, 2009-11-13 Early childhood mathematics is vitally important for young children's present and future educational success. Research demonstrates that virtually all young children have the capability to learn and become competent in mathematics. Furthermore, young children enjoy their early informal experiences with mathematics. Unfortunately, many children's potential in mathematics is not fully realized, especially those children who are economically disadvantaged. This is due, in part, to a lack of opportunities to learn mathematics in early childhood settings or through everyday experiences in the home and in their communities. Improvements in early childhood mathematics education can provide young children with the foundation for school success. Relying on a comprehensive review of the research, *Mathematics Learning in Early Childhood* lays out the critical areas that should be the focus of young children's early mathematics education, explores the extent to which they are currently being incorporated in early childhood settings, and identifies the changes needed to improve the quality of mathematics experiences for young children. This book serves as a call to action to improve the state of early childhood mathematics. It will be especially useful for policy makers and practitioners—those who work directly with children and their families in

shaping the policies that affect the education of young children.

Night Noise Guidelines for Europe Charlotte Hurlley, 2009 The WHO Regional Office for Europe set up a working group of experts to provide scientific advice to the Member States for the development of future legislation and policy action in the area of assessment and control of night noise exposure. The working group reviewed available scientific evidence on the health effects of night noise, and derived health-based guideline values. In December 2006, the working group and stakeholders from industry, government and nongovernmental organizations reviewed and reached general agreement on the guideline values and key texts for the final document of the Night noise guidelines for Europe. Considering the scientific evidence on the thresholds of night noise exposure indicated by $L_{night, outside}$ [L suffix night, outside] as defined in the Environmental Noise Directive (2002/49/EC), an $L_{night, outside}$ of 40 dB should be the target of the night noise guideline (NNG) to protect the public, including the most vulnerable groups such as children, the chronically ill and the elderly. $L_{night, outside}$ value of 55 dB is recommended as an interim target for the countries where the NNG cannot be achieved in the short term for various reasons, and where policy-makers choose to adopt a stepwise approach. These guidelines are applicable to the Member States of the European Region, and may be considered as an extension to, as well as an update of, the previous WHO Guidelines for community noise (1999). Innovative Biosystems Engineering for Sustainable Agriculture, Forestry and Food Production Antonio Coppola, Giovanni Carlo Di Renzo, Giuseppe Altieri, Paola D'Antonio, 2020-03-19 This book gathers the latest advances, innovations, and applications in the field of innovative biosystems engineering for sustainable agriculture, forestry and food production. Focusing on the challenges of implementing sustainability in various contexts in the fields of biosystems engineering, it shows how the research has addressed the sustainable use of renewable and non-renewable resources. It also presents possible solutions to help achieve sustainable production. The Mid-Term Conference of the Italian Association of Agricultural Engineering (AIIA) is part of a series of conferences, seminars and meetings that the AIIA organizes, together with other public and private stakeholders, to promote the creation and dissemination of new knowledge in the sector. The contributions included in the book were selected by means of a rigorous peer-review process, and offer an extensive and multidisciplinary overview of interesting solutions in the field of innovative biosystems engineering for sustainable agriculture.

III-Nitride Ultraviolet Emitters Michael Kneissl, Jens Rass, 2015-11-12 This book provides a comprehensive overview of the state-of-the-art in group III-nitride based ultraviolet LED and laser technologies, covering different substrate approaches, a review of optical, electronic and structural properties of InAlGaN materials as well as various optoelectronic components.

In addition, the book gives an overview of a number of key application areas for UV emitters and detectors, including water purification, phototherapy, sensing, and UV curing. The book is written for researchers and graduate level students in the area of semiconductor materials, optoelectronics and devices as well as developers and engineers in the various application fields of UV emitters and detectors.

Barron's AP Chinese Language and Culture Yan Shen, 2009-08-01 This brand-new manual prepares students for a subject that has just been added to the Advanced Placement program. Separate sections review all parts of the new exam: Listening, Reading, Grammar, Speaking, and Culture. Each section also includes exercises, and the listening and reading sections include practice questions with answer keys and answer explanations. The book reflects the AP exam's standards, presenting questions in both traditional and simplified Chinese characters. Two full-length practice exams are presented with answer keys. Enclosed with the manual are three audio compact discs, which present spoken material covering the exam's Listening and Speaking sections.

Olympic-Caliber Cybersecurity Cynthia Dion-Schwarz, Nathan Ryan, Julia A. Thompson, Erik Silfversten, Giacomo Persi Paoli, 2018-09-28 Understanding the cybersecurity threat landscape is critical to mitigating threats,

apportioning limited resources, and hosting a resilient, safe, and secure Olympic Games. To support the security goals of Tokyo 2020, this report characterizes the cybersecurity threats that are likely to pose a risk to the games, visualizes a threat actor typology, and presents a series of policy options to guide cybersecurity planning.

Implantable Neural Prostheses 1 David Zhou, Elias Greenbaum, 2009-06-10
Significant progress has been made in the development of neural prostheses to restore human functions and improve the quality of human life. Biomedical engineers and neuroscientists around the world are working to improve design and performance of existing devices and to develop novel devices for artificial vision, artificial limbs, and brain-machine interfaces. This book, *Implantable Neural Prostheses 1: Devices and Applications*, is part one of a two-book series and describes state-of-the-art advances in techniques associated with implantable neural prosthetic devices and their applications. Devices covered include sensory prosthetic devices, such as visual implants, cochlear implants, auditory midbrain implants, and spinal cord stimulators. Motor prosthetic devices, such as deep brain stimulators, Bion microstimulators, the brain control and sensing interface, and cardiac electro-stimulation devices are also included. Progress in magnetic stimulation that may offer a non-invasive approach to prosthetic devices is introduced. Regulatory approval of implantable medical devices in the United States and Europe is also discussed.

Emerging Technologies in Distance Education George Veletsianos, 2010
Highlighted are the pedagogical, organizational, cultural, social, and economic factors that influence the adoption and integration of emerging technologies in distance education. Advice is offered on how educators can launch effective and engaging distance education initiatives, in response to technological advancements, changing mindsets, and economic and organizational pressures.

Information Retrieval Architecture and Algorithms Gerald Kowalski, 2010-12-01
This text presents a theoretical and practical examination of the latest developments in Information Retrieval and their application to existing systems. By starting with a functional discussion of what is needed for an information system, the reader can grasp the scope of information retrieval problems and discover the tools to resolve them. The book takes a system approach to explore every functional processing step in a system from ingest of an item to be indexed to displaying results, showing how implementation decisions add to the information retrieval goal, and thus providing the user with the needed outcome, while minimizing their resources to obtain those results. The text stresses the current migration of information retrieval from just textual to multimedia, expounding upon multimedia search, retrieval and display, as well as classic and new textual techniques. It also introduces developments in hardware, and more importantly, search architectures, such as those introduced by Google, in

order to approach scalability issues. About this textbook: A first course text for advanced level courses, providing a survey of information retrieval system theory and architecture, complete with challenging exercises Approaches information retrieval from a practical systems view in order for the reader to grasp both scope and solutions Features what is achievable using existing technologies and investigates what deficiencies warrant additional exploration

Virtual and Networked Organizations, Emergent Technologies and Tools Goran D. Putnik, Maria Manuela Cruz-Cunha, 2012-07-25 This book constitutes the thoroughly refereed post-conference proceedings of the First International Conference on Virtual and Networked Organizations, Emergent Technologies, and Tools, ViNOrg 2011, held in Ofir, Portugal, in July 2011. The 35 revised full papers presented were carefully reviewed and selected from over 60 initial submissions. The papers cover a wide range of topics, such as ubiquitous computing and organizations, cloud computing and architectures, grid computing, human-computer interfaces, serious games, data mining, Web services, cognitive systems, social networks and other emergent IT/IS approaches in various function domains, such as decision support systems, planning, design, control, negotiation, marketing, management and many other, in the context of virtual and networked enterprises and organizations.

My Sisters Telegraphic Thomas C. Jepsen, 2000 This study also explores the surprising parallels between the telegraphy of the nineteenth century and the

work of women in technical fields today. The telegrapher's work, like that of the modern computer programmer, involved translating written language into machine-readable code. And anticipating the Internet by over one hundred years, telegraphers often experienced the gender-neutral aspect of the cyberspace they inhabited.--BOOK JACKET.

Disability and Poverty Eide, Arne H.,Ingstad, Benedicte,2011-05-31 This book is about being disabled and being poor and the social, cultural and political processes that link these two aspects of living in what has been characterised as a vicious circle (Yeo & Moore 2003). It is also about the strengths that people show when living with disability and being poor. How they try to overcome their problems and making the best out of what little they have. This book will appeal to academics, postgraduates and policymakers in disability studies, development studies, poverty and social exclusion

Engineering Geology for Society and Territory - Volume 1 Giorgio Lollino,Andrea Manconi,John Clague,Wei Shan,Marta Chiarle,2016-08-23 This book is one out of 8 IAEG XII Congress volumes and deals with climate change affecting different natural processes and environments, such as slope dynamics, water courses, coastal and marine environments, hydrological and littoral processes and permafrost terrain. Due to climate change, major effects are also expected on territorial planning and infrastructure, particularly in extreme climate regions. The volume and its contents aim to analyze the role of engineering geology and the solutions it may offer with

respect to the ongoing environmental changes. Contributions regard the modeling of both the factors and the effects induced by climate change. Potential impacts of the climate change on the common practice and routine work of engineering geologists are also analyzed, with particular attention to the risk assessment and mitigation procedures and to the adaptation measures adopted. The Engineering Geology for Society and Territory volumes of the IAEG XII Congress held in Torino from September 15-19, 2014, analyze the dynamic role of engineering geology in our changing world and build on the four main themes of the congress: environment, processes, issues and approaches. The congress topics and subject areas of the 8 IAEG XII Congress volumes are: Climate Change and Engineering Geology. Landslide Processes. River Basins, Reservoir Sedimentation and Water Resources. Marine and Coastal Processes. Urban Geology, Sustainable Planning and Landscape Exploitation. Applied Geology for Major Engineering Projects. Education, Professional Ethics and Public Recognition of Engineering Geology. Preservation of Cultural Heritage.

Proceedings of the 2nd International Conference on Microplastic Pollution in the Mediterranean Sea Mariacristina Cocca, Emilia Di Pace, Maria Emanuela Errico, Gennaro Gentile, Alessio Montarsolo, Raffaella Mossotti, Maurizio Avella, 2021-04-25 This book addresses a broad range of issues concerning microplastic pollution, including microplastic pollution in various environments (freshwater, marine, air and soil); the sources, fate and

effects of microplastics; detection systems for microplastic pollution monitoring; green approaches for the synthesis of environmentally friendly polymers; recovery and recycling of marine plastics; wastewater treatment plants as a microplastic entrance route; nanoplastics as emerging pollutants; degradation of plastics in the marine environment; impacts of microplastics on marine life; microplastics: from marine pollution to the human food chain; mitigation of microplastic impacts and innovative solutions; sampling, extraction, purification and identification approaches for microplastics; adsorption and transport of pollutants on and in microplastics; and lastly, the socio-economic and environmental impacts: assessment and risk analysis. In addition to presenting cutting-edge information and highlighting current trends and issues, the book proposes concrete solutions to help face this significant environmental threat. It is chiefly intended for researchers and industry decision-makers; international, national and local institutions; and NGOs, providing them with comprehensive information on the origin of the problem; its effects on marine environments, with a particular focus on the Mediterranean Sea and coasts; and recent and ongoing research activities and projects aimed at finding technical solutions to mitigate the phenomenon.

Access to History for the IB Diploma: Emergence of the Americas in global affairs 1880-1929 Peter Clements, 2013-07-12 Ensure your students have access to the authoritative, in-depth and accessible content of this series for the IB History Diploma. This series for the IB History Diploma has taken the

clarity, accessibility, reliability and in-depth analysis of our best-selling Access to History series and tailor-made it to better fit the IB learner's needs. Each title in the series provides depth of content, focussed on specific topics in the IB History guide, and examination guidance on different exam-style questions - helping students develop a good knowledge and understanding of the topic alongside the skills they need to do well. - Ensures students gain a good understanding of the IB History topic through an engaging, in-depth, reliable and up-to-date narrative - presented in an accessible way. - Helps students to understand historical issues and examine the evidence, through providing a wealth of relevant sources and analysis of the historiography surrounding key debates. - Gives students guidance on answering exam-style questions with model answers and practice questions

Hematopoietic Stem Cell Protocols Christopher A. Klug, Craig T.

Jordan, 2008-02-01 The ability to highly purify and characterize hematopoietic stem cells (HSC) from mice and humans has opened up an exceedingly rich field of basic science research with enormous clinical potential. Many of the techniques used in studies of HSC biology have become more standardized over the last several years, which makes it possible to compile a set of methods that can be used by both seasoned investigators and novices in the stem cell field. We have attempted to be as comprehensive as possible and yet focus on what we perceive to be the most widely used approaches for studies of murine and human HSC. This first edition of Hematopoietic Stem Cell Protocols will

therefore have some obvious omissions that were dictated by contemporary circumstances. It is our hope that readers will feel free to contribute their personal suggestions for further chapters as well as on how existing chapters can be improved for future editions. We certainly expect that old approaches will be refined, new assays will be developed, and other animal model and vector systems will be described that will become the new gold standards for future work. Our sincere thanks goes out to all of the contributors and to those in the stem cell field that have enlarged our thinking and provided new tools to further understand this fascinating cell type.

Mobile Unleashed Don Dingee, 2015-12-08 This is the origin story of technology super heroes: the creators and founders of ARM, the company that is responsible for the processors found inside 95% of the world's mobile devices today. This is also the evolution story of how three companies - Apple, Samsung, and Qualcomm - put ARM technology in the hands of billions of people through smartphones, tablets, music players, and more. It was anything but a straight line from idea to success for ARM. The story starts with the triumph of BBC Micro engineers Steve Furber and Sophie Wilson, who make the audacious decision to design their own microprocessor - and it works the first time. The question becomes, how to sell it? Part I follows ARM as its founders launch their own company, select a new leader, a new strategy, and find themselves partnered with Apple, TI, Nokia, and other companies just as digital technology starts to unleash mobile devices. ARM grows rapidly, even

as other semiconductor firms struggle in the dot com meltdown, and establishes itself as a standard for embedded RISC processors. Apple aficionados will find the opening of Part II of interest the moment Steve Jobs returns and changes the direction toward fulfilling consumer dreams. Samsung devotees will see how that firm evolved from its earliest days in consumer electronics and semiconductors through a philosophical shift to innovation. Qualcomm followers will learn much of their history as it plays out from satellite communications to development of a mobile phone standard and emergence as a leading fabless semiconductor company. If ARM could be summarized in one word, it would be collaboration. Throughout this story, from Foreword to Epilogue, efforts to develop an ecosystem are highlighted. Familiar names such as Google, Intel, Mediatek, Microsoft, Motorola, TSMC, and others are interwoven throughout. The evolution of ARM's first 25 years as a company wraps up with a shift to its next strategy: the Internet of Things, the ultimate connector for people and devices. Research for this story is extensive, simplifying a complex mobile industry timeline and uncovering critical points where ARM and other companies made fateful and sometimes surprising decisions. Rare photos, summary diagrams and tables, and unique perspectives from insiders add insight to this important telling of technology history.

International Marketing and Export Management Gerald S. Albaum, Edwin Duerr, Jesper Strandskov, 2005 Albaum, Duerr and Strandskov offer a unique

focus on export management. The comprehensive coverage provides a wealth of examples and cases with a good spread of academic and non-academic sources. The balance between theory and practice is just right. I highly recommend this text. Geraldine Cohen, Lecturer, School of Business and Marketing, Brunel University Looking to learn about marketing decisions and management processes needed to develop export operations either in a small to medium size business or in a global corporation? With changing opportunities and challenges in the global environment, International Marketing and Export Management 5th edition provides the most comprehensive and up-to-date coverage on the topic. In my opinion Albaum, Duerr and Strandskov have written an excellent text book on the subject of International Marketing and students will find it both readable and extremely informative. David Demick, Senior Lecturer, School of Marketing, Entrepreneurship and Strategy, University of Ulster Geared to both undergraduate and postgraduate courses on International Marketing or Export Marketing/International Trade, this book can also be used as a supplementary text on International Business courses and as a useful source of reference to even the most experienced of practitioners. New to this edition! In response to recent global developments, the authors have increased emphasis on the following: the impact of the Internet, World Wide Web, and e-commerce the increasing use of specialized software to assist in managing marketing functions, increasing efficiency in logistics, and coordinating and controlling enterprises the

impact of technological advances on international marketing the changes resulting from China's rapid, export-led growth and from its entry into the World Trade Organization the growing concerns with respect to social responsibility, and the costs of failure to meet societal expectations. Visit www.booksites.net/albaum to access valuable teaching tools, including an Instructor's Manual and Power Point Slides. Gerald Albaum is Research Professor at the Robert O. Anderson Schools of Management, University of New Mexico and Professor Emeritus of Marketing at the University of Oregon, USA. He is also Senior Research Fellow at the IC2 Institute, University of Texas, Austin, USA. He has been a visiting professor and scholar at universities in Canada, Denmark, New Zealand, Australia, Turkey, France, Finland and Hong Kong. Edwin Duerr is a Professor Emeritus of International Business at San Francisco State University, USA. He has been a visiting professor at universities in Japan, Brazil, Germany, Denmark, Sweden and the Netherlands and has extensive consulting business around the globe. Duerr is also Senior Editor of The Journal of International Business and Economy. Jesper Strandskov is a Professor of International Business at Aarhus School of Business, Denmark. He has been visiting professor at universities in the USA and Australia. He also acts as an international business consultant to several business companies and public institutions.
