Subdivision Design and Flood Hazard Areas James Schwab, 2016 Sustainability, resilience, and climate change are top of mind for planners and floodplain managers. For subdivision design, those ideas haven't hit home. The results? Catastrophic flood damage in communities across the country. This PAS Report is out to end the cycle of build-damage-rebuild and bring subdivision design into line with the best of floodplain planning. Readers will get the tools they need to save lives, protect property, and lay the foundation for a better future.

Retailing in the 21st Century Manfred Krafft, Murali K. Mantrala, 2009-12-17 With crisp and insightful contributions from 47 of the world's leading experts in various facets of retailing, Retailing in the 21st Century offers in one book a compendium of state-of-the-art, cutting-edge knowledge to guide successful retailing in the new millennium. In our competitive world, retailing is an exciting, complex and critical sector of business in most developed as well as emerging economies. Today, the retailing industry is being buffeted by a number of forces simultaneously, for example the growth of online retailing and the advent of 'radio frequency identification' (RFID) technology. Making sense of it all is not easy but of vital importance to retailing practitioners, analysts and policymakers.

World Economic Outlook, October 2019 International Monetary Fund. Research Dept., 2019-10-15 Global growth is forecast at 3.0 percent for 2019, its

lowest level since 2008–09 and a 0.3 percentage point downgrade from the April 2019 World Economic Outlook.

Lake Victoria Joseph L. Awange, Obiero Ong'ang'a, 2006-08-18 This book constitutes a pioneering and unique work on Lake Victoria. It is the world's second largest fresh-water lake and supports the livelihood of more than 30 million people. Surprisingly, there has been no comprehensive book addressing its problems and potentials. Ecology, environmental pollution and resource management are some of the issues addressed by this comprehensive insight into the limitations, challenges and opportunities facing Lake Victoria.

Enceladus and the Icy Moons of Saturn Paul M. Schenk, Roger N. Clark, Carly J. A. Howett, Anne J. Verbiscer, J. Hunter Waite, 2018-11-27 With active geysers coating its surface with dazzlingly bright ice crystals, Saturn's large moon Enceladus is one of the most enigmatic worlds in our solar system. Underlying this activity are numerous further discoveries by the Cassini spacecraft, tantalizing us with evidence that Enceladus harbors a subsurface ocean of liquid water. Enceladus is thus newly realized as a forefront candidate among potentially habitable ocean worlds in our own solar system, although it is only one of a family of icy moons orbiting the giant ringed planet, each with its own story. As a new volume in the Space Science Series, Enceladus and the Icy Moons of Saturn brings together nearly eighty of the world's top experts writing more than twenty chapters to set the foundation for what we currently understand, while building the framework for the highest-priority questions

to be addressed through ongoing spacecraft exploration. Topics include the physics and processes driving the geologic and geophysical phenomena of icy worlds, including, but not limited to, ring-moon interactions, interior melting due to tidal heating, ejection and reaccrretion of vapor and particulates, ice tectonics, and cryovolcanism. By contextualizing each topic within the profusion of puzzles beckoning from among Saturn's many dozen moons, Enceladus and the Icy Moons of Saturn synthesizes planetary processes on a broad scale to inform and propel both seasoned researchers and students toward achieving new advances in the coming decade and beyond.

Integrated Assessment of Water Resources and Global Change Eric Craswell, Mike Bonnell, Deborah Bossio, Siegfried Demuth, Nick van de Giesen, 2007-04-05 This book presents papers from an international conference, held in Bonn, Germany in February 2005, that dealt with integrated water resources management in industrialized and developing countries. The papers detail such emerging concepts as blue and green water, virtual water, the water footprints of nations, multi-agent modeling, linkages between water and biodiversity, and social learning and adaptive management.

Transforming Education Unesco, 2011 Este informe cita ejemplos de utilización de las TIC en diferentes regiones del mundo - África, la región árabe, Asia y América Latina - y proporciona un buen ejemplo de los cambios que las TIC aportan a los sistemas y políticas de educación. La gran diversidad que ofrecen los países seleccionados - Jordania, Namibia, Rwanda,

Singapur y Uruguay - en términos de desarrollo económico y educativo, sugiere que lo que está en juego no se limitan a un determinado grupo de países privilegiados.

Recent Advances in Technology Research and Education Dumitru Luca, Lucel Sirghi, Claudiu Costin, 2017-09-08 This book presents selected contributions to the 16th International Conference on Global Research and Education Inter-Academia 2017 hosted by Alexandru Ioan Cuza University of Iași, Romania from 25 to 28 September 2017. It is the third volume in the series, following the editions from 2015 and 2016. Fundamental and applied research in natural sciences have led to crucial developments in the ongoing 4th global industrial revolution, in the course of which information technology has become deeply embedded in industrial management, research and innovation – and just as deeply in education and everyday life. Materials science and nanotechnology, plasma and solid state physics, photonics, electrical and electronic engineering, robotics and metrology, signal processing, e-learning, intelligent and soft computing have long since been central research priorities for the Inter-Academia Community (I-AC) – a body comprising 14 universities and research institutes from Japan and Central/East-European countries that agreed, in 2002, to coordinate their research and education programs so as to better address today's challenges. The book is intended for use in academic, government, and industrial R&D departments as a reference tool in research and technology education. The 42

peer-reviewed papers were written by more than 119 leading scientists from 14 countries, most of them affiliated to the I-AC.

Napoleon's Egypt Juan Cole, 2007-08-07 In this vivid and timely history, Juan Cole tells the story of Napoleon's invasion of Egypt. Revealing the young general's reasons for leading the expedition against Egypt in 1798 and showcasing his fascinating views of the Orient, Cole delves into the psychology of the military titan and his entourage. He paints a multi-faceted portrait of the daily travails of the soldiers in Napoleon's army, including how they imagined Egypt, how their expectations differed from what they found, and how they grappled with military challenges in a foreign land. Cole ultimately reveals how Napoleon's invasion, the first modern attempt to invade the Arab world, invented and crystallized the rhetoric of liberal imperialism.

A Continent Moving West? Richard Black, Godfried Engbersen, Marek Okólski, 2010 Dit boek beschrijft de toename van migratie uit Oost-europese landen in de periode van 2004-2007, na toetreding tot de EU. Het bevat nieuwe empirische 'casestudies' van migratiepatronen, zowel gebaseerd op veldwerk als op de analyse van bestaande statistieken.

Election 2007 R.J. May, Ray Anere, Nicole Haley, Katherine Wheen, 2013-09-23 Papua New Guinea's general election in 2007 attracted particular interest for several reasons. Not only did it follow what was widely acknowledged as the country's worst election ever, in 2002 (in which elections in six of the

country's 109 electorates were declared to be 'failed elections'), it was the first general election to be held under a new limited preferential voting system. It also followed the first full parliamentary term under the Organic Law on the Integrity of Political Parties and Candidates, which had been introduced in 2001 in an attempt to strengthen political parties and create a greater degree of stability in the national parliament, and was the first to embrace a 'whole-of-government' approach to electoral administration, through an Interdepartmental Electoral Committee. This volume provides an analysis of the 2007 election, drawing on the work of a domestic monitoring team organized through the National Research Institute, and several visiting scholars. It addresses key issues such as voter education, electoral administration, election security, the role of political parties, women as candidates and voters, the shift to limited preferential voting, and HIV transmission, and provides detailed accounts of the election in a number of open and provincial electorates. It is generally agreed that the election of 2007 was an improvement on that of 2002. But problems of electoral administration and voting behaviour remain. These are identified in this volume, and recommendations made for electoral reform.

Multi-stakeholder Governance and the Internet Governance Forum Jeremy Malcolm, 2008 Multi-stakeholder governance is a fresh approach to the development of transnational public policy, bringing together governments, the private sector and civil society in partnership. The movement towards

this new governance paradigm has been strongest in areas of public policy involving global networks of stakeholders, too intricate to be represented by governments alone. Nowhere is this better illustrated than on the Internet, where it is an inherent characteristic of the network that laws, and the behaviour to which those laws are directed, will cross national borders; resulting not only in conflicts between national regimes, but also running up against the technical and social architecture of the Internet itself. In this book, Jeremy Malcolm examines the new model of multi-stakeholder governance for the Internet regime that the Internet Governance Forum (IGF) represents. He builds a compelling case for the reform of the IGF to enable it to fulfil its mandate as an institution for multi-stakeholder Internet governance.--

Earth Observation Science and Applications for Risk Reduction and Enhanced Resilience in Hindu Kush Himalaya Region Birendra Bajracharya, Rajesh Bahadur Thapa, Mir A. Matin, 2021-08-14 This open access book is a consolidation of lessons learnt and experiences gathered from our efforts to utilise Earth observation (EO) science and applications to address environmental challenges in the Hindu Kush Himalayan region. It includes a complete package of knowledge on service life cycles including multi-disciplinary topics and practically tested applications for the HKH. It comprises 19 chapters drawing from a decade's worth of experience gleaned over the course of our implementation of SERVIR-HKH – a joint initiative of NASA, USAID, and ICIMOD

– to build capacity on using EO and geospatial technology for effective decision making in the region. The book highlights SERVIR's approaches to the design and delivery of information services – in agriculture and food security; land cover and land use change, and ecosystems; water resources and hydro-climatic disasters; and weather and climate services. It also touches upon multidisciplinary topics such as service planning; gender integration; user engagement; capacity building; communication; and monitoring, evaluation, and learning. We hope that this book will be a good reference document for professionals and practitioners working in remote sensing, geographic information systems, regional and spatial sciences, climate change, ecosystems, and environmental analysis. Furthermore, we are hopeful that policymakers, academics, and other informed audiences working in sustainable development and evaluation – beyond the wider SERVIR network and well as within it – will greatly benefit from what we share here on our applications, case studies, and documentation across cross-cutting topics.

Review of Civil Litigation Costs Great Britain. Ministry of Justice, Rupert M. Jackson, 2010 In January 2009, the then Master of the Rolls, Sir Anthony Clarke, appointed Lord Justice Jackson to lead a fundamental review of the rules and principles governing the costs of civil litigation. This report intends to establish how the costs rules operate and how they impact on the behavior of both parties and lawyers.

E-Commerce Strategy Zheng Qin, Yang Chang, Shundong Li, Fengxiang

Li,2014-10-30 E-Commerce Strategy builds awareness and sharpens readers' understanding of the key issues about e-commerce strategies. To link theory of e-commerce strategy with practice in the real world, it brings together theoretical perspectives based on academic research, integrated use of technologies and large amount of cases, especially those of China. With regard to the innovative technical standards and frameworks, it proposes strategic analysis from a technical point of view. The book is intended for postgraduate students in e-commerce and computer science as well as government officials, entrepreneurs and managers. Prof. Zheng Qin is the Director of Software Engineering and Management Research Institute, Tsinghua University, China; Dr. Shundong Li is a Professor at the School of Computer Science, Shaanxi Normal University, China; Dr. Yang Chang and Dr. Fengxiang Li are both Research Assistants at the School of Software, Tsinghua University, China.

Frontiers in Protein Structure, Function, and Dynamics Dev Bukhsh Singh,Timir Tripathi,2020-07-02 This book discusses a broad range of basic and advanced topics in the field of protein structure, function, folding, flexibility, and dynamics. Starting with a basic introduction to protein purification, estimation, storage, and its effect on the protein structure, function, and dynamics, it also discusses various experimental and computational structure determination approaches; the importance of molecular

interactions and water in protein stability, folding and dynamics; kinetic and thermodynamic parameters associated with protein-ligand binding; single molecule techniques and their applications in studying protein folding and aggregation; protein quality control; the role of amino acid sequence in protein aggregation; muscarinic acetylcholine receptors, antimuscarinic drugs, and their clinical significances. Further, the book explains the current understanding on the therapeutic importance of the enzyme dopamine beta hydroxylase; structural dynamics and motions in molecular motors; role of cathepsins in controlling degradation of extracellular matrix during disease states; and the important structure-function relationship of iron-binding proteins, ferritins. Overall, the book is an important guide and a comprehensive resource for understanding protein structure, function, dynamics, and interaction.

Urban Informatics Wenzhong Shi, Michael F. Goodchild, Michael Batty, Mei-Po Kwan, Anshu Zhang, 2021-04-06 This open access book is the first to systematically introduce the principles of urban informatics and its application to every aspect of the city that involves its functioning, control, management, and future planning. It introduces new models and tools being developed to understand and implement these technologies that enable cities to function more efficiently – to become ‘smart’ and ‘sustainable’. The smart city has quickly emerged as computers have become ever smaller to the point where they can be embedded into the very fabric of the city, as

well as being central to new ways in which the population can communicate and act. When cities are wired in this way, they have the potential to become sentient and responsive, generating massive streams of 'big' data in real time as well as providing immense opportunities for extracting new forms of urban data through crowdsourcing. This book offers a comprehensive review of the methods that form the core of urban informatics from various kinds of urban remote sensing to new approaches to machine learning and statistical modelling. It provides a detailed technical introduction to the wide array of tools information scientists need to develop the key urban analytics that are fundamental to learning about the smart city, and it outlines ways in which these tools can be used to inform design and policy so that cities can become more efficient with a greater concern for environment and equity.

Globalization and Maritime Power Sam Tangredi, 2012-07-18 Prior to September 11, 2001, most Americans viewed globalization as primarily -perhaps exclusively-an economic phenomenon.¹ The economic evidence -rapidly shifting flows of world capital, expansion of overseas markets and investments, the global connections of e-commerce and the Internet, as examples -seemed readily apparent, even if some critics viewed globalization itself as an illdefined term. But appropriately defined or not, the concept of globalization had already achieved considerable stature, causing corporate boards and shareholders to thirst after presumably growing international markets, Internet junkies to claim their own transnational community, and

antiglobalization protestors to smash municipal trash cans from Seattle to Washington.

Asia and Africa in the Global Economy Ernest Aryeetey, 2003 This publication considers the different economic experiences of countries in Southeast Asia and sub-Saharan Africa, in terms of policy, institutional and structural aspects, divergence in economic growth and performance levels, and the extent of their integration into the global economy. Chapters discuss a variety of issues including the dynamics of globalisation, local entrepreneurship, exports, foreign direct investment, management of financial flows, foreign aid, debt and development.
