Uncle Dan's Report Card Barbara C. Unell,Bob Unell,2011-08-02 A Unique Approach to Teaching Children Timeless Values The worth of the child cannot be measured in terms of Per Cent alone. The home life of the child is an important part of the whole life. The teacher's judgment will be a much better one if the home will kindly co-operate. Parents are asked to carefully consider and mark Home Report as indicated. -M. E. Pearson, Superintendent, Kansas City, Kansas, Public Schools, 1914 With the discovery of their Uncle Dan's school report card from 1914, in which a Home Report section of the card was to be completed by parents, Barbara and Robert Unell were inspired to explore the behaviors and values

upon which students were graded in addition to the standard academic subjects. They realized that these surprising entries, ranging from acts of kindness and truthfulness to personal habits and reading for pleasure, were as timeless and relevant today as they were almost a century ago. Uncle Dan's Report Card gives every parent and caregiver not only a reminder of the worth of these values and behaviors but also a practical means to encourage children to recognize and practice good habits. This book provides the positive, proven tools they can use with toddlers to teens to help them be successful and happy in their everyday lives, personally and academically.

Energy Efficiency in Domestic Appliances and Lighting Paolo Bertoldi,2022-05-18 This book contains peer-reviewed papers presented at the 10th International Conference on Energy Efficiency in Domestic Appliances and Lighting (EEDAL'19), held in Jinan, China from 6-8 November 2019. Energy efficiency helps to mitigate CO2 emissions and at the same time increases the security of energy supply. Energy efficiency is recognized as the cleanest, quickest and cheapest energy source. Not only this, but energy efficiency brings several additional benefits for society and end-users, such as lower energy costs, reduced local pollution, better outdoor and indoor air quality, etc. However, in some sectors, such as the residential sector, barriers to investments in energy efficiency remain. Legislation adopted in several jurisdictions (EU, Japan, USA, China, India, Australia, Brazil, etc.) helps in removing barriers and fosters investments in energy efficiency. These initiatives complement

innovative financing schemes for energy efficiency, the provision of energy services by energy service companies and different types of information programs. At the same time, progress in appliance technologies and in solid state lighting offer high levels of efficiency. LED lighting is an example. As with previous conferences in this series, EEDAL'19 provided a unique forum to discuss and debate the latest developments in energy and environmental impact of households, including appliances, lighting, heating and cooling equipment, electronics, smart meters, consumer behavior, and policies and programs. EEDAL addressed non-technical issues such as consumer behavior, energy access in developing countries, and demand response.
