Cybersecurity Framework Manufacturing Profile National Institute of Standards,2017-05-31 March 2017 If you like this book (or the Kindle version), please leave positive review. This document provides the Cybersecurity Framework implementation details developed for the manufacturing environment. The Manufacturing Profile of the Cybersecurity Framework can be used as a roadmap for reducing cybersecurity risk for manufacturers that is aligned with manufacturing sector goals and industry best practices. The Profile gives manufacturers:* A method to identify opportunities for improving the current cybersecurity posture of the manufacturing system* An evaluation of their ability to operate the control environment at their acceptable risk level* A standardized approach to preparing the cybersecurity plan for ongoing assurance of the manufacturing system's security Why buy a book you can download for free? First you gotta find it and make sure it's the latest version (not always easy). Then you gotta print it using a network printer you share with 100 other people - and its outta paper - and the toner is low (take out the toner cartridge, shake it, then put it back). If it's just 10 pages, no problem, but if it's a 250-page book, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. An engineer that's paid \$75 an hour has to do this himself (who has assistant's anymore?). If you are paid more than \$10 an hour and use an ink jet printer, buying this book will save you money. It's much more cost-effective to just order the latest version from Amazon.com This book is published by 4th Watch Books and includes copyright material. Data Mining and Big Data Ying Tan,Hideyuki Takagi,Yuhui Shi,2017-07-18 This book constitutes the refereed proceedings of the Second International Conference on Data Mining and Big Data, DMBD 2017, held in Fukuoka, Japan, in July/August 2017. The 53 papers presented in this volume were carefully reviewed and selected from 96 submissions. Object-Based Image Analysis Thomas Blaschke,Stefan Lang,Geoffrey Hay,2008-08-09 This book brings together a collection of invited interdisciplinary perspectives on the recent topic of Object-based Image Analysis (OBIA). Its content is based on select papers from the 1 OBIA International Conference held in Salzburg in July 2006, and is enriched by several invited chapters. All submissions have passed through a blind peer-review process resulting in what we believe is a timely volume of the highest scientific, theoretical and technical standards. The concept of OBIA first gained widespread interest within the GIScience (Geographic Information Science) community circa 2000, with the advent of the first commercial software for what was then termed 'object-oriented image analysis'. However, it is widely agreed that OBIA builds on older segmentation, edge-detection and classification concepts that have been used in remote sensing image analysis for several decades. Nevertheless, its emergence has provided a new critical bridge to spatial concepts applied in multiscale landscape analysis, Geographic Information Systems (GIS) and the synergy between image-objects and their radiometric characteristics and analyses in Earth Observation data (EO).

Chemoinformatics in Drug Discovery Tudor I. Oprea,2006-03-06 This handbook provides the first-ever inside view of today's integrated approach to rational drug design. Chemoinformatics experts from large pharmaceutical companies, as well as from chemoinformatics service providers and from academia demonstrate what can be achieved today by harnessing the power of computational methods for the drug discovery process. With the user rather than the developer of chemoinformatics software in mind, this book describes the successful application of computational tools to real-life problems and presents solution strategies to commonly encountered problems. It shows how almost every step of the drug discovery pipeline can be optimized and accelerated by using chemoinformatics tools -- from the management of compound databases to targeted combinatorial synthesis, virtual screening and efficient hit-to-lead transition. An invaluable resource for drug developers and medicinal chemists in academia and industry.

Nanoarchitecture John M. Johansen,2002 John Johansen, now 85 years old, has been one of the preeminent architects in the United States for more than half a century. After studying under Walter Gropius (who became his father-in-law) at Harvard, he embarked on an extraordinary career marked by experimental domestic and public design. Since retiring from practice, Johansen has devoted himself to producing futuristic architecture that looks to the newest technologies science has to offer--from nanotechnology to magnetic levitation to material science--for its inspiration. Nanoarchitecture presents eleven of Johansen's most inspired visions. A floating conference center, an apartment building that sprouts from the earth and grows on its own, and a levitating auditorium all demonstrate Johansen's capricious yet thought-provoking ideas. Taken together, they offer an antidote to much of today's form-driven practice. The projects in Nanoarchitecture are presented through a series of idiosyncratic models, drawings, and computer animations suggesting what it would be like to inhabit these fantastic spaces. Nanoarchitecture is designed by the award-winning practice COMA.[Johansen] points toward the creation of a new vernacular, a new fabric of space and time in which modern experience can increase, expand, and deepen. -- Lebbeus Woods
