A 21st Century System for Evaluating Veterans for Disability Benefits

Institute of Medicine, Board on Military and Veterans Health, Committee on Medical Evaluation of Veterans for Disability Compensation, 2007-09-30 21st Century System for Evaluating Veterans' Disability Benefits recommends improvements in the medical evaluation and rating of veterans for the benefits provided by the Department of Veterans Affairs (VA) to compensate for illnesses or injuries incurred in or aggravated by military service. Compensation is a monthly cash benefit based on a rating schedule that determines the degree of disability on a scale of 0 to 100. Although a disability rating may also entitle a veteran to ancillary services, such as vocational rehabilitation and employment services, the rating schedule is out of date medically and contains ambiguous criteria and obsolete conditions and language. The current rating schedule emphasizes impairment and limitations or loss of specific body structures and functions which may not predict disability well. 21st Century System for Evaluating Veterans' Disability Benefits recommends that this schedule could be revised to include modern concepts of disability including work disability, nonwork disability, and

quality of life. In addition to the need for an updated rating schedule, this book highlights the need for the Department of Veterans' Affairs to devote additional resources to systematic analysis of how well it is providing services or how much the lives of veterans are being improved, as well as the need for a program of research oriented toward understanding and improving the effectiveness of its benefits programs.

Security on IBM z/VSE Helmut Hellner, Ingo Franzki, Antoinette Kaschner, Joerg Schmidbauer, Heiko Schnell, Klaus-Dieter Wacker, IBM Redbooks, 2018-06-14 One of a firm's most valuable resources is its data: client lists, accounting data, employee information, and so on. This critical data must be securely managed and controlled, and simultaneously made available to those users authorized to see it. The IBM® z/VSE® system features extensive capabilities to simultaneously share the firm's data among multiple users and protect them. Threats to this data come from various sources. Insider threats and malicious hackers are not only difficult to detect and prevent, they might be using resources with the business being unaware. This IBM Redbooks® publication was written to assist z/VSE support and security personnel in providing the enterprise with a safe, secure and manageable environment. This book provides an overview of the security that is provided by z/VSE and the processes for the implementation and configuration of z/VSE security components, Basic Security Manager (BSM), IBM CICS® security, TCP/IP security, single sign-on using LDAP, and connector security.

IBM z/OS V1R13 Communications Server TCP/IP Implementation: Volume 2 Standard Applications Mike Ebberts, Rama Ayyar, Octavio L. Ferreira, Yohko Ojima, Gilson Cesar de Oliveira, Mike Riches, Maulide Xavier, IBM Redbooks, 2011-12-27 For more than 40 years, IBM® mainframes have supported an extraordinary portion of the world's computing work, providing centralized corporate databases and mission-critical enterprise-wide applications. The IBM System z®, the latest generation of the IBM distinguished family of mainframe systems, has come a long way from its IBM System/360 heritage. Likewise, its IBM z/OS® operating system is far superior to its predecessors, providing, among many other capabilities, world-class, state-of-the-art, support for the TCP/IP Internet protocol suite. TCP/IP is a large and evolving collection of communication protocols managed by the Internet Engineering Task Force (IETF), an open, volunteer, organization. Because of its openness, the TCP/IP protocol suite has become the foundation for the set of technologies that form the basis of the Internet. The convergence of IBM mainframe capabilities with Internet technology, connectivity, and standards (particularly TCP/IP) is dramatically changing the face of information technology and driving requirements for ever more secure, scalable, and highly available mainframe TCP/IP implementations. The IBM z/OS Communications Server TCP/IP Implementation series provides understandable, step-by-step guidance about how to enable the most commonly used and important functions of z/OS Communications Server TCP/IP. This IBM Redbooks® publication provides useful implementation scenarios and configuration recommendations for many of the TCP/IP standard applications that z/OS

Communications Server supports. For more specific information about z/OS Communications Server standard applications, high availability, and security, see the other volumes in the series: IBM z/OS V1R13 Communications Server TCP/IP Implementation: Volume 1 Base Functions, Connectivity, and Routing, SG24-7996 IBM z/OS V1R13 Communications Server TCP/IP Implementation: Volume 3 High Availability, Scalability, and Performance, SG24-7998 IBM z/OS V1R13 Communications Server TCP/IP Implementation: Volume 4 Security and Policy-Based Networking, SG24-7999 For comprehensive descriptions of the individual parameters for setting up and using the functions that we describe in this book, along with step-by-step checklists and supporting examples, see the following publications: z/OS Communications Server: IP Configuration Guide, SC31-8775 z/OS Communications Server: IP Configuration Reference, SC31-8776 z/OS Communications Server: IP User's Guide and Commands, SC31-8780 This book does not duplicate the information in those publications. Instead, it complements them with practical implementation scenarios that can be useful in your environment. To determine at what level a specific function was introduced, see z/OS Communications Server: New Function Summary, GC31-8771. For complete details, we encourage you to review the documents that are listed in the additional resources section at the end of each chapter.

Tough Liberal Richard D. Kahlenberg, 2007-08-30 In Woody Allen's 1973 film, *Sleeper*, a character wakes up in the future to learn that civilization was destroyed when a man by the name of Albert Shanker got hold of a nuclear warhead. Shanker was condemned by many when he shut down the New York City school system in the bitter strikes of 1967 and 1968, and he was denounced for stirring up animosity between black parents and Jewish teachers. Later, however, he built alliances with blacks, and at the time of his death in

1997, such figures as Bill Clinton celebrated Shanker for being an educational reformer, a champion of equality, and a promoter of democracy abroad. Shanker lived the lives of several men bound into one. In his early years, he was the George Washington of the teaching profession, helping to found modern teacher unionism. During the 1980s, as head of the American Federation of Teachers, he became the nation's leading education reformer. Shanker supported initiatives for high education standards and accountability, teacher-led charter schools, and a system of peer review to weed out inadequate teachers. Throughout his life, Shanker also fought for tough liberalism, an ideology favoring public education and trade unions but also colorblind policies and a robust anticommunism all of which, Shanker believed, were vital to a commitment to democracy. Although he had a coherent worldview, Shanker was a complex individual. He began his career as a pacifist but evolved into a leading defense and foreign policy hawk. He was an intellectual and a populist; a gifted speaker who failed at small talk; a liberal whose biggest enemies were often on the left; a talented writer who had to pay to have his ideas published; and a gruff unionist who enjoyed shopping and detested sports. Richard D. Kahlenberg's biography is the first to offer a complete narrative of one of the most important voices in public education and American politics in the last half century. At a time when liberals are accused of not knowing what they stand for, Tough Liberal illuminates an engaging figure who suggested an alternative liberal path.

Using z/VM for Test and Development Environments: A Roundup Lydia Parziale, Klaus Egeler, Eravimangalath P Naveen, Manoj S Pattabhiraman, Kyle Smith, IBM Redbooks, 2007-02-27 This IBM Redbooks publication shows the strengths of z/VM and how you can use these strengths to create a highly flexible test and production environment. Some of the strengths of z/VM that are shown in this book are that you can run Linux on z/VM, you can run a sysplex under z/VM, and you can develop code under z/VM for z/TPF. You can also provision Linux guests under z/VM. A vswitch allows you to connect all of your guests (all operating systems that run under z/VM) easily to the network. You can simulate your production environment on a sysplex. The intention of this book is to show the strengths of z/VM and how you can use these strengths to simulate your production environment and expand your application development and testing environments.

What Is the Evidence on the Role of the Arts in Improving Health and Well-Being Daisy Fancourt, Saoirse Finn, 2019-06 Over the past two decades, there has been a major increase in research into the effects of the arts on health and well-being, alongside developments in practice and policy activities in

different countries across the WHO European Region and further afield. This report synthesizes the global evidence on the role of the arts in improving health and well-being, with a specific focus on the WHO European Region. Results from over 3000 studies identified a major role for the arts in the prevention of ill health, promotion of health, and management and treatment of illness across the lifespan. The reviewed evidence included study designs such as uncontrolled pilot studies, case studies, small-scale cross-sectional surveys, nationally representative longitudinal cohort studies, community-wide ethnographies and randomized controlled trials from diverse disciplines. The beneficial impact of the arts could be furthered through acknowledging and acting on the growing evidence base; promoting arts engagement at the individual, local and national levels; and supporting cross-sectoral collaboration.

Regulating Gun Sales Daniel W Webster, Jon S Vernick, Emma E McGinty, Ted Alcorn, 2013-03-26 This excerpt from the “masterful, timely, data-driven” study of the gun control debate examines the potential of stronger purchasing laws (Choice). As the debate on gun control continues, evidence-based research is needed to answer a crucial question: How do we reduce gun violence? One of the biggest gun policy reforms under consideration is the regulation of firearm sales and stopping the diversion of guns to criminals. This selection from the major anthology of studies *Reducing Gun Violence in America* presents compelling evidence that stronger purchasing laws and better enforcement of these laws result in lower gun violence. Additional material for this edition includes an introduction by Michael R. Bloomberg and Consensus Recommendations for Reforms to Federal Gun Policies from the Johns Hopkins University.

A system of health accounts 2011 World Health Organization, European Union, Organisation for Economic Co-operation and Development, 2022-05-31 A System of Health Accounts 2011 provides a systematic description of the financial flows related to the consumption of health care goods and services. As demands for information increase and more countries implement and institutionalise health accounts according to the system, the data produced are expected to be more comparable, more detailed and more policy relevant. This publication summarises the System of Health Accounts 2011 (SHA 2011) Manual, which was jointly produced by OECD, the European Commission and WHO. The SHA 2011 Manual itself draws inspiration from and builds on the original manual, published in 2000, and the Guide to Producing National Health Accounts (2003) to create a single global framework for producing health expenditure accounts that can help track resource flows from sources to uses. The manual is the result of a four-year collaborative effort between OECD, Eurostat and WHO, and sets out in more detail the boundaries, the definitions and the concepts responding to health care systems around the globe - from the simplest to the more complicated.

z/VM and Linux Operations for z/OS System Programmers Lydia Parziale, Omar Badreddin, Roy P Costa, Rodrigo Ceron Ferreira de Castro, Marian Gasparovic, Kenneth P Haas, Guillaume Lasmayous, Raymond Van Deurs, IBM Redbooks, 2008-10-28 This IBM Redbooks publication discusses z/VM and Linux operations from the perspective of the z/OS programmer or system programmer. Although other books have been written about many of these topics, this book gives enough information about each topic to describe z/VM and Linux on IBM

System z operations to somebody who is new to both environments. This book is intended for z/OS programmers and system programmers who are transitioning to the z/VM and Linux on System z environments and who want a translation guide for assistance. We base this book on our experiences using System z10 Enterprise Edition, z/VM version 5.3 RSU 0701, and Novell SUSE Linux Enterprise Server (SLES) 10 on System z.
