**An Obedient Father** Akhil Sharma,2022-07-12 Revised and featuring a new foreword by the author, this uncompromising novel returns, more powerful than ever: A portrait of a country ravaged by vendetta and graft, its public spaces loud with the complaints of religious bigots and its private spaces cradling unspeakable pain. (Hilary Mantel, New York Review of Books) An Obedient Father introduced one of the most admired voices in contemporary fiction. Set in Delhi in the 1990s, it tells the story of an inept bureaucrat enmired in corruption, and of the daughter who alone knows the true depth of his crimes. Decried in India for its frank treatment of child abuse, the novel was widely praised elsewhere for its compassion, and for a plot that mingled the domestic with the political, tragedy with farce. Yet, as Akhil Sharma writes in his foreword to this new edition, he was haunted by what he considered shortcomings within the book: almost twenty years later, he returned to face them. Here is the result, a leaner, surer version with even greater power.

The Autism Revolution Dr. Martha Herbert, Karen Weintraub, 2013-03-12 “An in-depth, scientific—yet hopeful and positive—look at how the brain and body work together . . . [Dr. Martha Herbert] has developed a new way of seeing

autism.”—Library Journal After years of treating patients and analyzing scientific data, Harvard Medical School researcher and clinician Dr. Martha Herbert offers a revolutionary new view of autism and a transformative strategy for dealing with it. Autism, she concludes, is not a hardwired impairment programmed into a child’s genes and destined to remain fixed forever. Instead, it is the result of a cascade of events, many seemingly minor. And while other doctors may dismiss your child’s physical symptoms—the anxiety, sensory overload, sleeplessness, frequent illnesses or seizures—as coincidental or irrelevant, Dr. Herbert sees them as vital clues to what the underlying problems are, and how to help. Drawing from the newest research, technologies, and insights, as well as inspiring case studies of both children and adults, Dr. Herbert guides you toward restoring health and resiliency in your loved one with autism. Her specific recommendations aim to provide optimal nutrition, reduce toxic exposures, limit stress, and open the door to learning and creativity. As thousands of families who have cobbled together these solutions themselves already know, this program can have dramatic benefits—for your child with autism, and for you, your whole family, and perhaps your next baby as well. “Invaluable . . . a must-read . . . Dr. Martha Herbert gets it. She not only gets it, but she puts it out there in an awesome book so the rest of us can get it, too.”—Autism Watch “[Herbert] goes further than most autism specialists. Her impressive science background merges with common sense and even intuitive sense [making] complex scientific

and medical materials seamlessly blend with a holistic viewpoint.”—Relieve Autism “Hope and practical guidance . . . With this easy-to-read book, parents can gain wisdom on how to guide your child to achieve a healthy and thriving life.”—Mom Central

**Greening the Industrial Facility** Thomas Graedel, Jennifer Howard-Grenville, 2006-04-09 This textbook and reference fills a critical gap in literature on the comprehensive environmental impacts of industrial organizations. Nineteen chapters examine individual industrial sectors inherent potential to pollute. The text goes on to analyze new technologies and practices for transforming environmentally degrading effects of industry, and shows how managers can navigate these changes and move their organizations towards long-term environmental sustainability.

Advanced Time-Correlated Single Photon Counting Techniques Wolfgang Becker, 2005-12-19 In 1984 Desmond O'Connor and David Phillips published their comprehensive book „Time-correlated Single Photon Counting“. At that time time-correlated single photon counting, or TCSPC, was used primarily to record fluorescence decay functions of dye solutions in cuvettes. From the beginning, TCSPC was an amazingly sensitive and accurate technique with excellent time-resolution. However, acquisition times were relatively slow due to the low repetition rate of the light sources and the limited speed of the electronics of the 70s and early 80s. Moreover, TCSPC was intrinsically one-dimensional, i.e. limited to the recording of the waveform of a periodic

light signal. Even with these limitations, it was a wonderful technique. More than 20 years have elapsed, and electronics and laser techniques have made impressive progress. The number of transistors on a single chip has approximately doubled every 18 months, resulting in a more than 1,000-fold increase in complexity and speed. The repetition rate and power of pulsed light sources have increased by about the same factor.

**Transparent Electronics** John F. Wager, Douglas A. Keszler, Rick E. Presley, 2007-11-20 This monograph is the first roadmap for transparent electronics. It defines and assesses what and where the field is, where it is going, and what needs to happen to get it there. Although the central focus of this monograph involves transparent electronics, many of the materials, devices, circuits, and process integration strategies discussed will be of great interest to researchers working in other emerging fields, including printed electronics, large-area electronics, low-cost electronics, and disposable electronics.

*Mother Land* Leah Franqui, 2020-07-14 “Lively and evocative, *Mother Land* is a deftly crafted exploration of identity and culture, with memorable and deeply human characters who highlight how that which makes us different can ultimately unite us.”—Amy Myerson, author of *The Bookshop of Yesterdays* and *The Imperfects* From the critically acclaimed author of *America for Beginners*, a wonderfully insightful, witty, and heart-piercing novel, set in Mumbai, about an impulsive American woman, her headstrong Indian mother-in-law, and

the unexpected twists and turns of life that bond them. When Rachel Meyer, a thirtysomething foodie from New York, agrees to move to Mumbai with her Indian-born husband, Dhruv, she knows some culture shock is inevitable. Blessed with a curious mind and an independent spirit, Rachel is determined to learn her way around the hot, noisy, seemingly infinite metropolis she now calls home. But the ex-pat American's sense of adventure is sorely tested when her mother-in-law, Swati, suddenly arrives from Kolkata—a thousand miles away—alone, with an even more shocking announcement: she's left her husband of more than forty years and moving in with them. Nothing the newlyweds say can budge the steadfast Swati, and as the days pass, it becomes clear she is here to stay—an uneasy situation that becomes more difficult when Dhruv is called away on business. Suddenly these two strong-willed women from such very different backgrounds, who see life so differently, are alone together in a home that each is determined to run in her own way—a situation that ultimately brings into question the very things in their lives that had seemed perfect and permanent . . . with results neither of them expect. Heartfelt, charming, deeply insightful and wise, Mother Land introduces us to two very different women from very different cultures . . . who maybe aren't so different after all.

**The Great American Mission** David Ekbladh, 2011-08-08 The Great American Mission traces how America's global modernization efforts during the twentieth century were a means to remake the world in its own image. David

Ekbladh shows that the emerging concept of modernization combined existing development ideas from the Depression. He describes how ambitious New Deal programs like the Tennessee Valley Authority became symbols of American liberalism's ability to marshal the social sciences, state planning, civil society, and technology to produce extensive social and economic change. For proponents, it became a valuable weapon to check the influence of menacing ideologies such as Fascism and Communism. Modernization took on profound geopolitical importance as the United States grappled with these threats. After World War II, modernization remained a means to contain the growing influence of the Soviet Union. Ekbladh demonstrates how U.S.-led nation-building efforts in global hot spots, enlisting an array of nongovernmental groups and international organizations, were a basic part of American strategy in the Cold War. However, a close connection to the Vietnam War and the upheavals of the 1960s would discredit modernization. The end of the Cold War further obscured modernization's mission, but many of its assumptions regained prominence after September 11 as the United States moved to contain new threats. Using new sources and perspectives, *The Great American Mission* offers new and challenging interpretations of America's ideological motivations and humanitarian responsibilities abroad.

**Everyday Aesthetics** Katya Mandoki, 2016-04-22 Katya Mandoki advances in this book the thesis that it is not only possible but crucial to open up the field of aesthetics (traditionally confined to the study of art and beauty) toward the richness and complexity of everyday life. She argues that in every process of communication, whether face to face or through the media, fashion, and political propaganda, there is always an excess beyond the informative and functional value of a message. This excess is the aesthetic. Following Huizinga's view of play as an ingredient of any social environment, Mandoki

explores how various cultural practices are in fact forms of playing since, for the author, aesthetics and play are Siamese twins. One of the unique contributions of this book is the elaboration and application of a semiotic model for the simultaneous analysis of social interactions in the four registers, namely visual, auditory, verbal and body language, to detect the aesthetic strategies deployed in specific situations. She argues that since the presentation of the self is targeted towards participants' sensibilities, aesthetics plays a key role in these modes of exchange. Consequently, the author updates important debates in this field to clear the way for a socio-aesthetic inquiry through contexts such as the family, school, medical, artistic or religious traditions from which social identities emerge.
