Good, Better, Best Jan Eric Larsson, 2021-06-25 Bridge players constantly argue about the 'best' bidding systems and conventions. Strong Club or Natural? With or without relays? Standard or 2/1? Weak or strong notrump? Was the Blue Club system really better than the natural systems in the 1950s and 1960s? Is two-way Stayman as good as Stayman and transfers? Disciplined or undisciplined weak twos -- which work better? And many, many more... Well, now we have the answer to those questions, provided by exhaustive analysis and the results of computer simulations. And not only which is better, but also by how much, typically tested in thousands of 24-board IMP matches. Playing the same deals via the same AI software eliminates the variable of player skill, and bidding methods are judged solely on their own merits. It is as objective a test as modern technology can provide. And the results may not be what you would expect.

Public Health Implications of Raising the Minimum Age of Legal Access to Tobacco Products Institute of Medicine, Board on Population Health and Public Health Practice, Committee on the Public Health Implications of Raising the Minimum Age for Purchasing Tobacco Products, 2015-07-23 Tobacco use by adolescents and young adults poses serious concerns. Nearly all adults who have ever smoked daily first tried a cigarette before 26 years of age. Current cigarette use among adults is highest among persons aged 21 to 25 years. The parts of the brain most responsible for cognitive and psychosocial maturity continue to develop and change through young adulthood, and adolescent brains are uniquely vulnerable to the effects of nicotine. At the request of the U.S. Food and Drug Administration, Public Health Implications of Raising

the Minimum Age of Legal Access to Tobacco Products considers the likely public health impact of raising the minimum age for purchasing tobacco products. The report reviews the existing literature on tobacco use patterns, developmental biology and psychology, health effects of tobacco use, and the current landscape regarding youth access laws, including minimum age laws and their enforcement. Based on this literature, the report makes conclusions about the likely effect of raising the minimum age to 19, 21, and 25 years on tobacco use initiation. The report also quantifies the accompanying public health outcomes based on findings from two tobacco use simulation models. According to the report, raising the minimum age of legal access to tobacco products, particularly to ages 21 and 25, will lead to substantial reductions in tobacco use, improve the health of Americans across the lifespan, and save lives. Public Health Implications of Raising the Minimum Age of Legal Access to Tobacco Products will be a valuable reference for federal policy makers and state and local health departments and legislators.

Reducing Tobacco-Related Cancer Incidence and Mortality Institute of Medicine, Board on Health Care Services, National Cancer Policy Forum, 2013-05-16 Tobacco use is the leading cause of preventable death in United States, causing more than 440,000 deaths annually and resulting in \$193 billion in health-related economic losses each year-\$96 billion in direct medical costs and \$97 billion in lost productivity. Since the first U.S. Surgeon General's report on smoking in 1964, more than 29 Surgeon General's reports, drawing

on data from thousands of studies, have documented the overwhelming and conclusive biologic, epidemiologic, behavioral, and pharmacologic evidence that tobacco use is deadly. This evidence base links tobacco use to the development of multiple types of cancer and other life-threatening conditions, including cardiovascular and respiratory diseases. Smoking accounts for at least 30 percent of all cancer deaths, and 80 percent of lung cancer deaths. Despite the widespread agreement on the dangers of tobacco use and considerable success in reducing tobacco use prevalence from over 40 percent at the time of the 1964 Surgeon General's report to less than 20 percent today, recent progress in reducing tobacco use has slowed. An estimated 18.9 percent of U.S. adults smoke cigarettes, nearly one in four high school seniors smoke, and 13 percent of high school males use smokeless tobacco products. In recognition that progress in combating cancer will not be fully achieved without addressing the tobacco problem, the National Cancer Policy Forum of the Institute of Medicine (IOM) convened a public workshop, Reducing Tobacco-Related Cancer Incidence and Mortality, June 11-12, 2012 in Washington, DC. In opening remarks to the workshop participants, planning committee chair Roy Herbst, professor of medicine and of pharmacology and chief of medical oncology at Yale Cancer Center and Smilow Cancer Hospital, described the goals of the workshop, which were to examine the current obstacles to tobacco control and to discuss potential policy, outreach, and treatment strategies that could overcome these obstacles and reduce tobacco-related cancer incidence and mortality. Experts explored a number of topics, including: the changing demographics of tobacco users and the changing patterns of tobacco product use; the influence of tobacco use on cancer incidence and cancer treatment outcomes; tobacco dependence and cessation programs; federal and state level laws and

regulations to curtail tobacco use; tobacco control education, messaging, and advocacy; financial and legal challenges to tobacco control efforts; and research and infrastructure needs to support tobacco control strategies, reduce tobacco related cancer incidence, and improve cancer patient outcomes. Reducing Tobacco-Related Cancer Incidence and Mortality summarizes the workshop.

Person Centered Approach to Recovery in Medicine Luigi Grassi,Michelle B. Riba,Thomas Wise,2018-12-07 This book offers a resource to aid in implementing psychosocial screening, assessment, and consequently integrating prevention, care and treatment (i.e. pharmacological, psychosocial rehabilitation and psychotherapeutic) in medicine. It is becoming increasingly recognized that one method of combating spiraling health care costs in developed nations is to integrate psychiatric care into medicine including primary care settings. This volume reviews the main issues relative to the paradigm of a person-centered and recovery-oriented approach that should imbue all medical areas and specialties. It proposes integration methods in screening and assessment, clinimetric approach, dignity conserving care, cross-cultural and ethical aspects, treatment and training as a basic and mandatory need of a whole psychosomatic approach bridging the several specialties in medicine. As such, the book addresses a topic that all physicians, including primary care and psychiatric professionals in a wide variety of mental health settings are currently discussing, planning and preoccupied with, namely the task of integrating mental health into all the medical fields, including primary care, cardiology, psychiatry, oncology and so on.

International Labour Migration D. Bartram,2005-05-11 Studies of international labour migration typically assume that foreign labour is a universal feature of wealthy economies. Exploitation of foreign

workers can contribute significantly to employers' profits. However, some wealthy societies do not import workers on a large scale, despite employers' pressures. Using Israel and Japan as empirical cases, this comparative-historical work investigates why some governments allow employers relatively free access to foreign labour, while others require alternative responses to labour shortages. A focus on variation leads to an innovative and insightful argument to explain international labour migration.

Handbook of Probiotics and Prebiotics Yuan Kun Lee, Seppo Salminen, 2009-02-17 Since the publication of the first edition in 1999, the science of probiotics and prebiotics has matured greatly and garnered more interest. The first handbook on the market, *Handbook of Probiotics and Prebiotics: Second Edition* updates the data in its predecessor, and it also includes material topics not previously discussed in the first edition, including methods protocols, cell line and animal models, and coverage of prebiotics. The editors supplement their expertise by bringing in international experts to contribute chapters. This second edition brings together the information needed for the successful development of a pro- or prebiotic product from laboratory to market.

Business Model Management Bernd W. Wirtz, 2020-09-30 “How are business models purposeful designed and structured? How can the models be implemented professionally and managed successfully and sustainably? In what ways can existing business models be adapted to the constantly changing conditions? In this clearly structured reference work, Bernd W. Wirtz gives an answer to all these issues and provides the reader with helpful guidance. Although, ‘Business Model Management’ is first and foremost a scientific reference book, which comprehensively addresses the theory of business models, with

his book Bernd W. Wirtz also turns to practitioners. Not least, the many clearly analyzed case studies of companies in different industries contribute to this practical relevance. My conclusion: 'Business Model Management' is an informative and worthwhile read, both for students of business administration as a textbook as well as for experienced strategists and decision makers in the company as a fact-rich, practical compendium." Matthias Müller, Chief Executive Officer Porsche AG (2010-2015), Chief Executive Officer (2015-2018) Volkswagen AG "In dynamic and complex markets a well thought out business model can be a critical factor for the success of a company. Bernd Wirtz vividly conveys how business models can be employed for strategic competition and success analysis. He structures and explains the major theoretical approaches in the literature and practical solutions in an easy and understandable way. Numerous examples from business practice highlight the importance of business models in the context of strategic management. The book has the potential to become a benchmark on the topic business models in the German-speaking world." Hermann-Josef Lamberti, Member of the Board Deutsche Bank AG 1999-2012/ Member of the Board of Directors, Airbus Group "The business environment has become increasingly complex. Due to changing conditions, the executive board of a company is confronted with growing challenges and increasing uncertainty. Thus, a holistic understanding of the corporate production and performance systems is becoming more and more important. At this point, Bernd W. Wirtz introduces and presents the concept of the structured discussion of the own business model. Business models present operational service processes in aggregated form. This holistic approach channels the attention of management, supports a sound understanding of relationships and facilitates the adaption of the business to changing conditions. The

management of business models is thus an integrated management concept. Through the conceptual presentation of complex issues the author makes a valuable contribution to the current literature. In particular, the referenced case studies from various industries make the book clear and very applicable to practice.” Dr. Lothar Steinebach, Member of the Board, Henkel AG 2007-2012/ Supervisory Board, ThyssenKrupp AG

Each Woman’s Menopause: An Evidence Based Resource Patricia Geraghty, 2021-12-02 This book is designed to meet the needs of nurse practitioners, other advanced practice nurses, and allied health professionals working in women’s health, primary care, and other specialties. The multiple roles the clinician embraces in menopause management include that of direct caregiver, manager of therapeutics, educator, and interdisciplinary team member or leader. This book provides updated, evidence based information on the menopause transition from the late reproductive stage to post-menopause to optimize the interaction of the clinician and the individual woman in each of those roles. Women’s lived experiences of menopause and women’s concerns regarding both the menopause transition and the choice of care options are included as critical components of shared therapy decisions. The review of natural menopause physiology and the variability of menopause symptoms are inclusive of diverse women and diverse trajectories. The impact of menopause on chronic disease, sleep, weight and nutrition, mood and cognition, urogenital health and sexuality, as well as vasomotor symptoms are each developed as individual topics by experts in those fields. Evidence based management using hormonal and non-hormonal options, and life-

style and other complementary interventions are discussed with the most updated advantages and disadvantages of each treatment option. Consistent with advanced practice nursing theory, the approach is whole patient focused.

Irrationality Stuart Sutherland,2007 Why do qualified professional make wrong decisions that cause enormous harm to others? And why do you sit through a boring play just because the tickets were expensive? Drawing on a mass of intriguing research, Stuart Sutherland analyses the causes of irrationality, demonstrating that the trait is present in all of us.

Doing Business in Europe Alina Mihaela Dima,2018-04-09 The book brings together an international panel of experts on economic integration and international business to address the essential link between the two fields, namely the impact of integration processes on the business environment. Focusing on the

European Union, it presents numerous examples and case studies to demonstrate how local business is becoming international business, and addresses the opportunities, constraints and overall historical changes. Starting with the regional and global economic integration framework, and subsequently exploring the institutional structure that makes everything possible and how the union came to be, the book reveals how the common policies of the EU impact businesses and entrepreneurship within both the common market and the member states. Readers will learn about the economic and political context that affect businesses in Europe; understand the basic concepts of integration, accompanied by cases and examples; gain a new perspective on important EU sectoral policies and challenges for individuals and businesses; become aware of the main challenges to EU enlargement; and better grasp the advantages and disadvantages of doing business in Europe in the present context.
