Sentiment Analysis and Opinion Mining Bing Liu, 2022-05-31 Sentiment analysis and opinion mining is the field of study that analyzes people's opinions, sentiments, evaluations, attitudes, and emotions from written language. It is one of the most active research areas in natural language processing and is also widely studied in data mining, Web mining, and text mining. In fact, this research has spread outside of computer science to the management sciences and social sciences due to its importance to business and society as a whole. The growing importance of sentiment analysis coincides with the growth of social media such as reviews, forum discussions, blogs, micro-blogs, Twitter, and social networks. For the first time in human history, we now have a huge volume of opinionated data recorded in digital form for analysis. Sentiment analysis systems are being applied in almost every business and social domain because opinions are central to almost all human activities and are key influencers of our behaviors. Our beliefs and perceptions of reality, and the choices we make, are largely conditioned on how others see and evaluate the world. For this reason, when we need to make a decision we often seek out the opinions of others. This is true not only for individuals but also for organizations. This book is a comprehensive introductory and survey text. It covers all important topics and the latest developments in the field with over 400 references. It is suitable for students, researchers and practitioners who are interested in social media

analysis in general and sentiment analysis in particular. Lecturers can readily use it in class for courses on natural language processing, social media analysis, text mining, and data mining. Lecture slides are also available online. Digitalizing Consumption Franck Cochoy, Johan Hagberg, Magdalena Petersson McIntyre, Niklas Sörum, 2017-07-14 Contemporary consumer society is increasingly saturated by digital technology, and the devices that deliver this are increasingly transforming consumption patterns. Social media, smartphones, mobile apps and digital retailing merge with traditional consumption spheres, supported by digital devices which further encourage consumers to communicate and influence other consumers to consume. Through a wide range of empirical studies which analyse the impact of digital devices, this volume explores the digitization of consumption and shows how consumer culture and consumption practices are fundamentally intertwined and mediated by digital devices. Exploring the development of new consumer cultures, leading international scholars from sociology, marketing and ethnology

examine the effects on practices of consumption and marketing, through topics including big data, digital traces, streaming services, wearables, and social media's impact on ethical consumption. Digitalizing Consumption makes an important contribution to practice-based approaches to consumption, particularly the use of market devices in consumers' everyday consumer life, and will be of interest to scholars of marketing, cultural studies, consumer research, organization and management.

**Heroines of Film and Television** Norma Jones, Maja Bajac-Carter, Bob Batchelor, 2014-04-04 Despite the increasing variety of heroic women portrayed in film, television, and other popular culture channels, much of the understanding of heroines has been limited to females as versions of male heroes or simple stereotypes of overly weak/strong (and even violent) women. This book analyzes the new vision of female heroes in popular culture. It features award-winning authors from a variety of disciplines, broadening our understanding of how heroines are portrayed, as well as how these important popular culture representations both simultaneously empower and/or constrain real life women.

*High Efficiency Video Coding (HEVC)* Vivienne Sze, Madhukar Budagavi, Gary J. Sullivan, 2014-08-23 This book provides developers, engineers, researchers and students with detailed knowledge about the High Efficiency Video Coding

(HEVC) standard. HEVC is the successor to the widely successful H.264/AVC video compression standard, and it provides around twice as much compression as H.264/AVC for the same level of quality. The applications for HEVC will not only cover the space of the well-known current uses and capabilities of digital video – they will also include the deployment of new services and the delivery of enhanced video quality, such as ultra-high-definition television (UHDTV) and video with higher dynamic range, wider range of representable color, and greater representation precision than what is typically found today. HEVC is the next major generation of video coding design – a flexible, reliable and robust solution that will support the next decade of video applications and ease the burden of video on world-wide network traffic. This book provides a detailed explanation of the various parts of the standard, insight into how it was developed, and in-depth discussion of algorithms and architectures for its implementation.

*One Acre and Security* Bradford Angier, 2017-09-15 A passport to freedom that shows how to find fun, food, shelter, and income on land that may be within easy-driving distance of the city and suburbs. Why work a lifetime, asks Angier, to accumulate enough money to retire from the rat race during the last, least active years of life, when a little ground can provide healthful, relaxed living–now–and income too? *One Acre and Security* explains how “three-squares-a-day” and money to spend can come from the earth with instructions on: sheep or pig farming, raising bees for honey, keeping dairy herbs of cows

or goats, making money with herb culture, raising and selling rabbits and earthworms, running a poultry farm, raising fish, frogs, and turtles for profit and fun. Angier, the man who has done it all himself, shares too what he has learned about some of the ways to eat from nature's free banquet table, how to stretch country-living with hikes on famous trails or on any untrammelled path, where to find the best hunting and fishing, and how to catch bigger, healthier fish. "This book is written for those who want to move—not to the distant wilderness—but just far enough away from the smog and the screaming traffic to be where meat will be theirs for the raising, fish for the catching, fruit and vegetables for the picking, fuel for the cutting, home for the satisfaction of building...breathing cleaner air, beholden to none, doing what they want to do most and giving it their best," says Bradford Angier in *One Acre and Security*..

Sensor Network Operations Shashi Phoha, Thomas F. La Porta, Christopher Griffin, 2007-01-29 This excellent title introduces the concept of mission-oriented sensor networks as distributed dynamic systems of interacting sensing devices that are networked to jointly execute complex real-time missions under uncertainty. It provides the latest, yet unpublished results on the main technical and application challenges of mission-oriented sensor networks. The authors of each chapter are research leaders from multiple disciplines who are presenting their latest innovations on the issues. Together, the editors have compiled a comprehensive treatment of the subject

that flows smoothly from chapter to chapter. This interdisciplinary approach significantly enhances the science and technology knowledge base and influences the military and civilian applications of this field. Author Information: Dr. Shashi Phoha is the Guest Editor of IEEE Transactions in Mobile Computing, Special Issue on Mission-Oriented Sensor Networks. She is the Head of the Information Sciences and Technology Division of ARL and Professor of Electrical and Computer Engineering at Pennsylvania State University. **Widescreen Worldwide** John Belton, Sheldon Hall, Stephen Neale, 2010 Examining widescreen cinema as a worldwide aesthetic and industrial phenomenon, the essays in this volume situate the individual expressions of this new technology within the larger cultural and industrial practices that inform

them. What Hollywood sought to market globally as CinemaScope, SuperScope, Techniscope, Technirama, and Panavision took indigenous form in a host of compatible anamorphic formats developed around the world. The book documents how the aesthetics of the first wave of American widescreen films underwent revision in Europe and Asia as filmmakers brought their own idiolect to the language of widescreen mise-en-scène, editing, and sound practices. The work of Otto Preminger, Anthony Mann, Samuel Fuller, Sam Peckinpah, Seijun Suzuki, Kihachi Okamoto, and Tai Kato, among others, is addressed.
