*On Target* Tim Berry, Timothy Berry, Doug Wilson, 2001 Practical resources to write a marketing plan are difficult to find. *On Target: The Book on Marketing Plans* offers an excellent solution. *On Target* takes you through the process of writing an effective marketing plan from the initial concept to full implementation.

**Emotional Engineering, Vol. 8** Shuichi Fukuda, 2020-02-08 This book is focused on the importance of detecting people's motivation, how they make decisions and the way the actions they take is rapidly increasing with the progress of IoT and the Connected Society. It explores how emotion-related processes are increasing in importance rapidly. The contributors move through a variety of related topics, all aimed at revealing how humans and things must increasingly interact. It indicates how strategy becomes increasingly important, particularly creating the best adaptable strategy to respond to the quickly and extensively changing situations. With engineering quickly moving from product development to experience development, and the role of emotion in engineering becoming increasingly apparent, this book offers a timely and valuable resource for engineers and researchers alike.

*Irrationality* Stuart Sutherland, 2007 Why do qualified professionals make wrong decisions that cause enormous harm to others? And why do you sit through a boring play just because the tickets were expensive? Drawing on a mass of intriguing research, Stuart Sutherland analyses the causes of irrationality, demonstrating that the trait is present in all of us.

**Reel Knockouts** Martha McCaughey, Neal King, 2010-01-01 When Thelma and Louise outfought the men who had tormented them, women across America discovered what male fans of action movies have long known—the empowering rush of movie violence. Yet the duo's escapades also provoked censure across a wide range of viewers, from conservatives who felt threatened by the up-ending of women's traditional roles to feminists who saw the pair's use of male-style violence as yet another instance of women's co-optation by the patriarchy. In the first book-length study of violent women in movies, *Reel Knockouts* makes feminist sense of violent women in films from Hollywood to Hong Kong, from top-grossing to direct-to-video, and from cop-action movies to X-rated skin flicks. Contributors from a variety of disciplines analyze violent women's respective places in the history of cinema, in the lives of viewers, and in the feminist response to male violence against women. The essays in part one, *Genre Films*, turn to film cycles in which violent women have routinely appeared. The essays in part two, *New Bonds and New Communities*, analyze movies singly or in pairs to determine how women's movie brutality fosters solidarity amongst the characters or their audiences. All of the contributions look at films not simply in terms of whether they properly represent women or feminist principles, but also as texts with social contexts and possible uses in the re-construction of masculinity and femininity.

**Design with Intent** Dan Lockton, 2010

*Centers for Learning* James K. Elmborg, Sheril Hook, 2005 This collection examines the potential inherent in partnerships between libraries and writing centers and suggests that such partnerships might respond more effectively to student needs than separate efforts. The essays consist primarily of case studies of collaborations in institutions throughout the US. The concluding chapter reflects on the impl

**The Black Sea Encyclopedia** Sergei R. Grinevetsky, Igor S. Zonn, Sergei S. Zhiltsov, Aleksey N. Kosarev, Andrey G. Kostianoy, 2014-09-30 This publication is devoted to the natural feature – the Black Sea and its littoral states. At the same time the Azov Sea is also considered here. This region is the focus of many geopolitical, economic, social and environmental issues that involve not only the countries coming out to the Black and Azov Seas, but other world countries, too. This publication contains over 1500 articles and terms providing descriptions of geographical and oceanographic features, cities,

ports, transport routes, marine biological resources, international treaties, national and international programs, research institutions, historical and archaeological monuments, activities of prominent scientists, researchers, travelers, military commanders, etc. who had relation to the Black Sea. It includes a multi-century chronology of the events that became the outstanding milestones in the history of development of the Black Sea - Azov Sea region.

*101 Life Skills Games for Children* Bernie Badegruber, 2011-01-01 How do you teach tolerance, self-awareness, and responsibility? How can you help children deal with fear, mistrust, or aggression? Play a game with them! Games are an ideal way to help children develop social and emotional skills; they are exciting, relaxing, and fun. 101 LIFE SKILLS GAMES FOR CHILDREN: LEARNING, GROWING, GETTING ALONG (Ages 6-12) is a resource that can help children understand and deal with problems that arise in daily interactions with other children and adults. These games help children develop social and emotional skills and enhance self-awareness. The games address the following issues: dependence, aggression, fear, resentment, disability, accusations, boasting, honesty, flexibility, patience, secrets, conscience, inhibitions, stereotypes, noise, lying, performance, closeness, weaknesses, self confidence, fun, reassurance, love, respect, integrating a new classmate, group conflict. Organized in three main chapters: (I-Games, You-Games and We-Games), the book is well structured and easily accessible. It specifies an objective for every game, gives step-by-step instructions, and offers questions for reflection. It provides possible variations for each game, examples, tips, and ideas for role plays. Each game contains references to appropriate follow-up games and is illustrated with charming drawings.

**The Artful Mind** Mark Turner, 2006-10-26 All normal human beings alive in the last fifty thousand years appear to have possessed, in Mark Turner's phrase, irrepressibly artful minds. Cognitively modern minds produced a staggering list of behavioral singularities--science, religion, mathematics, language, advanced tool use, decorative dress, dance, culture, art--that seems to indicate a mysterious and unexplained discontinuity between us and all other living things. This brute fact gives rise to some tantalizing questions: How did the artful mind emerge? What are the basic mental operations that make art possible for us now, and how do they operate? These are the questions that occupy the distinguished contributors to this volume, which emerged from a year-long Getty-funded research project hosted by the Center for Advanced Study in the Behavioral Sciences at Stanford. These scholars bring to bear a range of disciplinary and cross-disciplinary perspectives on the relationship between art (broadly conceived), the mind, and the brain. Together they hope to provide directions for a new field of research that can play a significant role in answering the great riddle of human singularity.

Landscape Architecture Documentation Standards Design Workshop, 2016-03-21 SUPERB EXECUTION RELIES UPON RIGOROUS PROJECT DOCUMENTATION A project will only be built as well as it is documented. This publication focuses on the key documentation needs of the landscape architectural design and construction documentation process. That includes both design documentation and construction documentation as well as all that which occurs in the transition from one phase to the other. Documentation requirements include those components necessary to explore and define design intent, logic, physical proposals, and ultimately, the specific components included within construction and bid documents. Discover how proper documentation facilitates every stage of the design process from pre-planning to construction, and leads to a highly resolved built outcome. Understand the principles behind these documentation practices. Implement best practices specific to each documentation phase and drawing, from title block and cover sheet design to soil plans and plant protection. Organize keynoting systems, cross-referencing and interdisciplinary coordination amongst multiple consultants and vendors. Study sample project documents from a leading landscape

architecture firm to better understand the elements and benefits of complete and well-coordinated project documentation. These standards have been time-tested by over 150 designers at the industry leading landscape architecture firm Design Workshop, reflecting a range of project types, including parks, streetscapes, urban spaces and over-structure construction. This guide shares the methods behind the success, to facilitate exceptional built outcomes through principled documentation practices.

**The Cognitive Artifacts of Designing** Willemien Visser, 2006-08-08 In this dynamic review and synthesis of empirical research and theoretical discussion of design as cognitive activity, Willemien Visser reconciles and integrates the classical view of design, as conceptualized by Herbert Simon's symbolic information processing approach, with modern views of design such as the situativity approach, as formulated by Donald Schön. The author goes on to develop her own view on design, in which design is most appropriately characterized as a construction of representations. The Cognitive Artifacts of Designing takes seriously the idea that design research warrants development in the cognitive sciences, and Visser lays the groundwork for the integration of design research and cognitive science. This seemingly simple framework -- designing is the construction of representations -- has implications that set the stage for this mutually beneficial integration. This volume will be of great interest to scholars concerned with design -- not only in cognitive design studies, but also in design methodology and engineering -- as well as cognitive scientists who are interested in problem solving in 'the real world.' Cognitive ergonomists and design practitioners will also be richly rewarded by a close reading of this volume.

*The Leader's Guide to Lateral Thinking Skills* Paul Sloane, 2006 Poses the question, how can you energize people to see problems not as obstacles to success but as opportunities for innovation? Looks at what makes a lateral leader - the kind of person who can create a climate of creativity by inspiring people to have the confidence to take risks, and who can then develop their skills in creative techniques. Presents practical exercises for implementing the principles of lateral thinking and uses real-life examples to illustrate the rules, principles and processes involved.

**More Java Gems** Dwight Deugo, 2000-01-28 This book presents the best articles and columns published in Java Report between 1997 and 1999. Each article is independent of any specific version of Java and relies mainly on those classes that are now part of the standard Java class library and APIs. Also, each article and column discusses Java topics and implementations that are not readily available in a single book. The book serves as an excellent reference to anyone involved with Java. The reader can learn more about the language, perform analysis, design and modeling, work on specific implementations, check performance, and perform testing. This book presents the good ideas of people who have used Java for Real applications.

Student Engagement and Information Literacy Craig Gibson, 2006 An assessment of, and instruction on, information literacy in curriculum.

*Java Precisely, third edition* Peter Sestoft, 2016-03-18 An updated, concise reference for the Java programming language, version 8.0, and essential parts of its class languages, offering more detail than a standard textbook. The third edition of Java Precisely provides a concise description of the Java programming language, version 8.0. It offers a quick reference for the reader who has already learned (or is learning) Java from a standard textbook and who wants to know the language in more detail. The book presents the entire Java programming language and essential parts of the class libraries: the collection classes, the input-output classes, the stream libraries and Java 8's facilities for parallel programming, and the functional interfaces used for that. Though written informally, the book describes the language in detail and offers many examples. For clarity, most of the general rules appear on left-hand pages with the relevant examples directly opposite on the right-hand pages. All examples are fragments of legal Java programs. The

complete ready-to-run example programs are available on the book's website. This third edition adds material about functional parallel processing of arrays; default and static methods on interfaces; a brief description of the memory model and visibility across concurrent threads; lambda expressions, method reference expressions, and the related functional interfaces; and stream processing, including parallel programming and collectors.

**Teaching Information Literacy Skills to Social Sciences Students and Practitioners** Douglas Cook, Natasha Cooper, 2006 Teaching Information Literacy to Social Sciences Students & Practitioners is a second discipline-based casebook from ACRL. This volume is based on the ACRL Information Literacy Competency Standards and presents cases on learning situations and how they can be analyzed and addressed. Also included are descriptions of instruction sessions for each case, notes, and teaching resources. Each case explicitly reflects one or more of the ACRL Information Literacy Standards. This practical collection of cases and applications brings a new set of resources to librarians doing instruction in the social sciences. Contributors cover such topics as data literacy, visual literacy, and developmental research skills training. Information on teaching undergraduate, graduate, and international students, and how to incorporate information literacy into various social science curricula are also presented.

*International Politics on the World Stage* John T. Rourke, Mark A. Boyer, 2005-06-01 Provides students and instructors with the information available, inviting them to explore international relations and its challenges in a straightforward, accessible way. A hallmark of the text is its position that international relations do matter to students and that the individual can have an impact on international relations.
