**Slides for Students** Gary D. Fisk,2018-10-16 300 million powerpoint presentations are given daily, yet there is a disconnect between the amazing technology of powerpoint and a mediocre student learning experience. To unleash the full potential of powerpoint presentations, we must do a better job of creating presentations that fit the educational needs of students. Slides for Students does just that.Slides for Students is an open and honest discussion about powerpoint in the classroom. A need exists for thoughtfully designed and implemented classroom instruction that focuses on the learner rather than on the technology. This book was written to translate academic research findings into practical suggestions about powerpoint that educators can use. Divided into two parts, Slides for Students discusses the history of powerpoint, explores academic studies on the topic, and demonstrates how to design slides to best suit educational needs and engage with students to avoid the dreaded death by powerpoint.

Mobile devices offer a broad range of opportunities from entertainment service e.g. music, games or video up to transactions e.g. banking, shopping, auctions. It is still unclear if all the emerging opportunities can be commercialized successfully. Nevertheless, many scenarios of how the world could be like in the future have been made. Below an excerpt of the daily routine of a future mobile user is presented: Nancy D`Amato prepares to leave her office just before five o clock. She uses her mobile phone for a quick check of the local weather forecast, sees that fines conditions are expected for the evening, and decides to leave her umbrella by her desk. Nancy is due to meet her boyfriend Peter at seven o clock, so she has two hours in town to waste. As soon as the clock reaches five, she receives a text message telling her that the bar across the street has a happy hour when drinks are cheaper. Nancy deletes

the message almost without reading it. She has given her mobile service provider permission to send her unsolicited local promotional messages after five - otherwise she would have to pay a higher subscription rates - but that does not mean she actually has to read the message, does it? Five minutes later another message arrives, with a coupon offering a discount at the local branch of her favorite coffee bar. She shows the coffee-shop attendant the numbered message on her phone s screen, and he keys in the number on the till when charging for the coffee. Now comfortably seated with her cappuccino, Nancy begins to plan her evening. She uses her mobile to check which movies are showing nearby after seven [...]

Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). **After the Digital Tornado** Kevin Werbach,2020-07-23 Networks powered by algorithms are pervasive. Major contemporary technology trends - Internet of Things, Big Data, Digital Platform Power, Blockchain, and the Algorithmic Society - are manifestations of this phenomenon. The internet, which once seemed an unambiguous benefit to society, is now the basis for invasions of privacy, massive concentrations of power, and wide-scale manipulation. The algorithmic networked world poses deep questions about power, freedom, fairness, and human agency. The influential 1997 Federal Communications Commission whitepaper “Digital Tornado” hailed the “endless spiral of connectivity” that would transform society, and today, little remains untouched by digital connectivity. Yet fundamental questions remain unresolved, and even more serious challenges have emerged. This important collection, which offers a reckoning and a foretelling, features leading technology scholars who explain the legal, business,

ethical, technical, and public policy challenges of building pervasive networks and algorithms for the benefit of humanity. This title is also available as Open Access on Cambridge Core.
